Save some green by going green with these environmentally friendly gadgets! With concern for the future of our environment growing stronger and more serious every day, there has never been a better time to take a new approach to some of the most popular gizmos and gadgets on the market and learn how you can convert to electronics that have minimal environmental impact. Green gadgets encompass everything from iPods to energy-efficient home entertainment devices to solar laptop chargers and crank-powered gizmos. This helpful resource explains how to research green gadgets, make a smart purchasing decision, use products you already own in a more environmentally

friendly way, and say goodbye to electronics that zap both energy and money. Explore the environmental and financial benefits of green gadgets with this friendly reference Discusses which gadgets save energy-and which ones create energy Learn ways to offset your carbon footprint when you can't reduce consumption Get tips for understanding products labels and avoiding "greenwash" Discover how to calculate the energy and money your gadgets consume Get moving and start living green with this informative guide to environmentally and wallet-friendly gadgets! Note: CD-ROM/DVD and other supplementary materials are not included as part of eBook file.

*Magellan* John Wiley & Sons

.. "in many developing countries, there are large differences in economic conditions and the standard of living between regions, and even between communities within the same region. In many countries, poverty has a clear geographic dimension, since the poor are often concentrated in pockets of poverty. Therefore, the design of poverty alleviation policies must also have a significant spatial component." Although development projects are

---

carefully designed and meticulously evaluated for cost effectiveness and benefits, too many of them are not sufficiently targeted geographically. The growing availability and use of spatial data, organized in a computer system such as a geographical information system (GIS), makes it more feasible to analyze the impact of projects in specific locales and to achieve more effective targeting.

'Geographical Targeting for Poverty Alleviation' introduces the basic concepts of a GIS. It also demonstrates how to organize geographic and nongeographic data. In addition, it presents different methods for using the data of the Household Income and Expenditure Survey, together with other surveys and the population census, to provide estimates for the standard of living and the incidence of poverty incidence in different geographical areas of a country. Ultimately, these estimates should be used to establish guidelines for targeting poverty alleviation projects. This publication illustrates different GIS applications for identifying the project's target population, determining the project's spatial 'sphere of influence' or deciding where to locate public facilities. This publication is of interest to task managers, economists, development researchers, and geographers. The Standard Pesticide User's Guide World Bank

Covers all aspects of pesticide principles and use, including topics such as: environmental considerations; insects; plant disease agents; weeds; integrated pest management; laws; liability; recordkeeping; labels; safety; formulations; application equipment; transportation; storage; decontamination; and disposal. Using a non-technical presentation, it helps readers gain an understanding of why pesticides are used, how to apply them safely and how to do this within the letter of the law. Supplies the necessary information for pesticide applicators to use pesticides in a responsible manner. Offer readers quick and easy access to reference material such as the United States and Canadian Pesticide Control Offices, restricted use pesticides, pesticide information telephone numbers and Web page addresses, cold weather handling of liquid chemical products, etc. Because the science of pesticide use has become a highly specialized field, this books is an excellent desk reference for those seeking re-certification and those currently working in the field.
