A bidirectional approach of detoxifying the liquid and gaseous effluents of oil refineries is elucidated in this thesis. Liquid effluents of oil refineries contain selenium oxyanions and phenol, while gaseous effluents contain CO/syngas. To remove the phenol and simultaneously reduce the selenite oxyanions, a fungal-bacterial co-culture of *Phanerochaete chrysosporium* and *Delftia lacustris* was developed. Two modes of co-cultures of the fungus and the bacterium were developed. Both cultures were investigated for phenol degradation and selenite reduction. In order to valorize the CO/syngas by bioconversion techniques, an anaerobic methanogenic sludge was acclimatized to use CO as the sole carbon substrate to produce acetic acid, butyric acid, and hexanoic acid. Later, the acids were metabolized at lower pH, producing alcohols ethanol, butanol and hexanol, confirming the successful enrichment strategy. The next experiment focused on the absence of the trace element tungsten, and consecutively selenium on the previously CO acclimatized sludge under the same operating conditions. An in-situ synthesized co-polymeric gel of N-ter-butyl-acrylamide and acrylic acid was used to recover ethanol, propanol and butanol from a synthetic fermentation broth. The scope of repeated use of the gel for alcohol recovery was investigated and 98% alcohol was recovered.

Understanding reporting standards issued by the IASB is essential for those who prepare and/or interpret financial statements and are required to comply with the increasingly complex set of international accounting and financial reporting standards. The International Accounting/Financial Reporting Standards Guide is your survival handbook in today's global economy. It keeps you up-to-date on the latest general and industry-specific international reporting standards and the proposed changes on your immediate horizon that will most likely alter the way in which you must account for and disclose information. The International Accounting/Financial Reporting Standards Guide organizes accounting pronouncements into two parts: general standards and industry-specific standards. The Practice Pointers featured throughout this edition point out, in plain English, how to apply the standards just discussed. Material in the International Accounting/Financial Reporting Standards Guide can be easily located several ways: the Cross-Reference shows the chapter in which a particular pronouncement is discussed; the Table of Contents directs you to a specific topic area; and the Index provides a quick page reference.

On Lucio Fontana's little-known engagement with ceramics
Given the sculptural properties of his famous slashed canvases, it is perhaps little wonder that Lucio Fontana

(1899-1968) began his career as a sculptor. Less well-known is his work as a ceramicist, which commenced in the mid-1930s and produced an exploration of materiality that profoundly informed his practice as an artist. This interest was developed parallel to his painting and was, in many ways, indistinguishable from his work as a sculptor. As Fontana continued to create ceramics, he became increasingly obsessed with the concept of matter as it related to the mass and volume of the sculpted object. His exploration of the physicality and weight of a work of art prefigured his later desire to diminish the materiality of his art. As Fontana scholar Paolo Campiglio writes here, "he sought to discover a form that could exceed its own materiality. He sought to test the possibilities of space. He sought to create an object with absolute plasticity. And he sought to discover an ideal abstract form, opposed to the accepted, geometrical forms."

An inspiring speaker and brilliantly sophisticated theorist, Michael Kidron was a leading figure in the International Socialist tradition from the 1950s until his death in 2003. Never satisfied with merely restating the assumed tenets of Marxism, Kidron insisted that theory must evolve alongside a changing world &mdash an iconoclastic orientation which led him to clash with others on the left,

including the British Communist Party and, later, the Socialist Workers Party itself under the leadership of Kidron's long-time comrade Tony Cliff. This undoctrinaire commitment to theoretical openness was also evident in Kidron's period as an editor with Pluto Books in the 1970s and 1980s, when the publisher became a crucial forum for developing socialist ideas and bringing them to a wider audience. Selected Writings collects a number of Kidron's most important essays: 'Reform and Revolution' offers a critique of post-war social democracy, written several decades before its collapse into neoliberalism; 'The Permanent Arms Economy' succinctly lays out what is perhaps Kidron's best-known theoretical contribution; 'Black Reformism' both provides an analysis of the imperialism of Kidron's day, and attacks the then-common assumption that Third World revolutions opened a road to world socialism. In recognition of Kidron's commitment to constantly re-examining theory, this volume also includes his 1977 essay 'Two Insights Don't Make a Theory', in which he criticises and updates his own earlier work in light of historical developments. Edited and introduced by Richard Kuper, who worked alongside Kidron at Pluto, this volume is the best introduction to one of the most original Marxist thinkers of recent times.

"What are you thinking about?" I asked my six year-old son as he was eating his after school snack. I never expected him to say, "I was thinking...if I were a Dragon, there would be a lot of things to do." I couldn't help but giggle and both our imaginations started to soar as I asked him about all the things he would do if he were a Dragon.
