InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

LIFE SAGE

In this exciting new book, Mike Michael uses case studies of mundane technologies such as the walking boot, the car and the TV remote control to question some of the fundamental dichotomies through which we make sense of the world. Drawing on the insights of Bruno Latour, Donna Haraway and Michel Serres, the author elaborates an innovative methodology through which new hybrid objects of study are creatively constructed, tracing the ways in which the cultural, the natural and the technological interweave in the production of order and disorder. This book critically engages with and draws connections between a wide range of literature including those concerned with the environment, consumption and the body.

Popular Mechanics

Understanding Culture offers an accessible and comprehensive overview of the field of cultural studies whilst also proposing a different way of 'doing' cultural studies. It focuses on the ways in which cultural objects and practices serve as both a means of ordering people's lives and as markers of that ordering. The book reviews the state of the discipline of cultural studies and suggests a new theoretical and methodological orientation drawing on the work of: Foucault; scepticism, Wittgenstein; Harvey Sacks and John Law; uses insights from a variety of sources to examine the complex ways in which meanings are manufactured as lives are ordered in particular social settings: personal life, education, health, the city and law; and presents case studies that illustrate what the new cultural studies looks like, covering: colonialism, everyday life and identity, and technology.
