Understanding Culture offers an accessible and comprehensive overview of the field of cultural studies whilst also proposing a different way of `doing? cultural studies. It focuses on the ways in which cultural objects and practices serve as both a means of ordering people?s lives and as markers of that ordering. The book reviews the state of the discipline of cultural studies and suggests a new theoretical and methodological orientation drawing on the work of: Foucault; scepticism, Wittgenstein; Harvey Sacks and John Law; uses insights from a variety of

sources to examine the complex ways in which meanings are manufactured as lives are ordered in particular social settings: personal life, education, health, the city and law; and presents case studies that illustrate what the new cultural studies looks like, covering: colonialism, everyday life and identity, and technology.  
*Billboard*

Includes results of evaluation of contests conducted, and examples of promotional materials, v.1; Includes responses to committee questionnaire on sweepstakes practices from companies using sweepstakes promotions, v.2.  
*Videodisc/microcomputer Courseware Design*  
This book brings together research working at the boundary between design knowledges and mobilities, offering a novel collection for both theorists and practitioners. Drawing upon detailed case studies, it demonstrates the diverse roles of design in shaping mobility at different spaces and scales: across cities; within different types of buildings and infrastructures; and through commuting, work and leisure activities. A range of international scholars illustrate the designed mobilities of car parks, traffic lights, street benches, pedestrian wayfinding systems and accessible design in the urban environment; they examine spaces within hospitals, airports and train stations and investigate design practices for bicycles, future urban vehicles and MotoGP motorcycle racing. Other contributions explore overlooked mobile artefacts such as television and video game remote controls, 3D printing and the types of packaging which enable objects themselves to move around. This book demonstrates how the tools, assumptions and processes of design shape spaces of mobility, and also illuminates how shifts in the fluidity and circulation of people, practices and materials in turn reconfigure practices of design. Mobilising Design develops multi-disciplinary understandings of design, drawing upon diverse literatures including design history, product design, architecture and cultural geography. By highlighting often invisible artefacts and associated knowledges and controversies, the book foregrounds the taken-for-granted ways in which everyday mobility is designed. It will be of interest to scholars in geography, sociology, economic history, architecture, design and urban theory.

**LIFE**
