"Because of its focus specifically on the needs of the secondary ELA classroom teacher (and students), this book in the Five to Thrive series takes a slightly different approach, focusing less on content and more on instructional philosophy and wellbeing. The five sections address some of the major shifts that have occurred over the past 5-10 years, specifically around engagement and motivation, equity and cultural relevance, building and sustaining community in the classroom, feedback and assessment, and teacher wellbeing. The authors each have strong voices on these topics, and their combined 40+ years in ELA classrooms - as well as the lessons learned during the pandemic year(s) - will help new and early career teachers to feel support in areas they may not have received pre-service instruction or practice in"--

Today's tech-savvy and digitally connected students present a new challenge for

today's school librarians. This book offers the 21st-century tools and know-how necessary for educators to appeal to and challenge students to learn—and to want to learn. What are the best ways to motivate students to become engaged and develop a passion for learning? Can appealing to their desire for socialization and constant communication—attributes of their lives outside of education—via the integration of cutting-edge technologies and "new media" in the library or classroom serve to ignite creativity, curiosity, and critical thinking? This book shows how you can make use of non-traditional tools such as popular social networks, collaborative technologies, and cloud computing to teach information and communications technologies integrated with the school curriculum to improve student learning—and demonstrates how these same technologies can help you measure skills and mastery learning. The book provides an easy-to-follow blueprint for using collaborative techniques, innovation, and teaching for creativity to achieve the new learning paradigm of self-directed learning, such as flipping the classroom or library. Readers of this book will find concrete, step-by-step examples of proven lesson plans, collaborative models, and time-saving strategies for

the successful integration of American Association of School Librarians (AASL) standards. The authors—both award-winning teachers—explain the quantitatively and qualitatively measurable educational value of using these technologies for core curricular and information and communications technologies instruction, showing that they both enhance student learning outcomes and provide data for measuring their impact on learning. "Margie Pearse and Katie Walton have given us a rich treasury of research-based best math practices. This book offers practical, engaging numeracy strategies to support our struggling students and sets the bar high for our advanced young mathematicians." —Mary Dunwoody, Director of Secondary Curriculum and Professional Development Southeast Delco School District, Folcroft, PA Transform mathematics learning from "doing" to "thinking" Do some of your students arrive at wildly wrong answers to mathematical problems but have no idea why? If so, they are not alone. Many students lack basic numeracy—the ability to think through the math logically, solve problems, and apply math outside the classroom. This book outlines nine critical thinking habits that foster numeracy and details practical ways to incorporate those habits into instruction. Referencing the new common

core standards, NCTM standards, and established literacy practices, the authors include "How Can I Do This in My Math Class...Tomorrow?" applications throughout the book that shows you how to: Monitor and repair students' understanding Represent mathematics nonlinguistically Develop students' mathematics vocabulary Create numeracy-rich lesson plans Teaching Numeracy will help you move your students from simply "doing the math" to a deeper understanding of how to think through the math.
