Research shows that today's students are unique. Whether anxious, overwhelmed, or too busy to ask for help, modern students trust and turn to the resources at their fingertips for guidance. Tara Kuther created The Psychology Major's Handbook for this purpose, to bridge the gap between advisor and manual. Created to support and follow along with a student through college, this text provides the support of an advisor as students navigate choosing a major, learning how to study, writing papers, and deciding what to do after college. Within each chapter, Kuther supports learners in applying concepts to their own lives through embedded exercises. The updated Sixth Edition encourages students to take an active role in their education and explains all of the ways that students can influence their own college experiences. Three individual chapters emphasize academics and cover crucial study and college skills, such as writing a review paper, and an APA Style empirical paper. The final four chapters of the text focus on bachelor's and graduate opportunities to help students to look past graduation.

The unwritten rules of success that every student must follow to thrive in college The Secret Syllabus equips students with the tools they need to succeed, revealing the unwritten rules and cultural norms and expectations not included in the official curriculum. Left to figure out on their own how the academic world works, students frequently stumble, underperform, and miss opportunities. Without mastery of the secret syllabus, too many miss out on the full, rich experience available to them in college. Jay Phelan and Terry Burnham share the essential lessons they have learned from struggling, unfocused students as well as award-winning college instructors and researchers. The Secret Syllabus draws on Phelan and Burnham's experiences with thousands of undergraduate and graduate students. Weaving engaging storytelling with practical, actionable advice, they illustrate both productive and counterproductive approaches to achieving academic excellence, and highlight the importance of setting and attaining goals, nurturing strong relationships, developing resiliency, and more. This fresh, funny, and boldly innovative book enables students to develop the consistently winning and effective behaviors that will equip them to thrive on campus and beyond.

Today's tech-savvy and digitally connected students present a new challenge for today's school librarians. This book offers the 21st-century tools and know-how necessary for educators to appeal to and challenge students to learn—and to want to learn. What are the best ways to motivate students to become engaged and develop a passion for learning? Can appealing to their desire for socialization and constant communication—attributes of their lives outside of education—via the integration of cutting-edge technologies and "new media" in the library or classroom serve to ignite creativity, curiosity, and critical thinking? This book shows how you can make use of non-traditional tools such as popular social networks, collaborative technologies, and cloud computing to teach information and communications technologies integrated with the school curriculum to improve student learning—and demonstrates how these same technologies can help you measure skills and mastery learning. The book provides an easy-to-follow blueprint for using collaborative techniques, innovation, and teaching for creativity to achieve the new learning paradigm of self-directed learning, such as flipping the classroom or library. Readers of this book will find concrete, step-by-step examples of proven lesson plans, collaborative models, and time-saving strategies for the successful integration of American Association of School Librarians (AASL) standards. The authors—both award-winning teachers—explain the quantitatively and qualitatively measurable educational value of using these technologies for core curricular and information and communications technologies instruction, showing that they both enhance student learning outcomes and provide data for measuring their impact on learning.

"Because of its focus specifically on the needs of the secondary ELA classroom teacher (and students), this book in the Five to Thrive series takes a slightly different approach, focusing less on content and more on instructional philosophy and wellbeing. The five sections address some of the major shifts that have occurred over the past 5-10 years, specifically around engagement and motivation, equity and cultural relevance, building and sustaining community in the classroom, feedback and assessment, and teacher wellbeing. The authors each have strong voices on these topics, and their combined 40+ years in ELA classrooms - as well as the lessons learned during the pandemic year(s) - will help new and early career teachers to feel support in areas they may not have received pre-service instruction or practice in"--
