The importance of this fourth edition of Educational Measurement is to extensively update and extend the topics treated in the previous three editions. As such, the fourth edition documents progress in the field and provides critical guidance to the efforts of new generations of researchers and practitioners. This new edition of Educational Measurement is edited by Robert Brennan and jointly sponsored by ACE and the National Council

on Measurement in Education. It provides in-depth treatments of important measurement topics, and the chapter authors are acknowledged experts in their respective fields. NATIONAL COUNCIL ON MEASUREMENT IN EDUCATION is an organization incorporated for scientific, educational, literary, and charitable purposes: i.e., advancing of the science of measurement instruments and procedures: improving applications of measurement; and disseminating knowledge about measurement theory, techniques, and instrumentation.

Linguistics: An Introduction to Linguistic Theory is a textbook, written for introductory courses in linguistic theory for undergraduate linguistics majors and first-year graduate

students. Twelve major figures in the field bring their expertise to each of the core areas of the field - morphology, syntax, semantics, phonetics, phonology, and language acquisition. In each section the book is concerned with discussing the underlying principles common to all languages, showing how these are revealed in language acquisition and in the specific grammars of the world's languages. Theoretical concepts are introduced through the analysis of a wide set of language data from Arabic to Zulu. The student will learn how to do linguistics by working through real linguistic data. Each section explains how to define and solve a problem; organizes the data

into paradigms revealing the structured patterns in the data; formulates generalizations based on these patterns; proposes rules or principles to account for the generalization; seeks independent evidence in its argument for the proposed theoretical construct. The book brings the latest developments in theoretical linguistics to bear in its discussion of the traditional issues. It covers these subjects in greater depth than is found in most introductory texts permitting the student to proceed directly, after using this text, to graduate courses in the field. It contains problems, a glossary, and a bibliography for further reading. Linguistics is

supported by an instructor's manual.
