Why are so many people attracted to narrative fiction? How do authors in this genre reframe experiences, people, and environments anchored to the real world without duplicating "real life"? In which ways does fiction differ from reality? What might fictional narrative and reality have in common--if anything? By analyzing novels such as Arundhati Roy's *The God of Small Things*, Amitav Ghosh's *The Glass Palace*, Zadie Smith's *White Teeth*, and Hari Kunzru's *The Impressionist*, along with selected Latino comic books and short fiction, this book explores the peculiarities of the production and reception of postcolonial and Latino borderland fiction. Frederick Luis Aldama uses tools from disciplines such as film studies and cognitive science that allow the reader to establish how a fictional narrative is built, how it functions, and how it defines the boundaries of concepts that appear susceptible to limitless interpretations. Aldama emphasizes how postcolonial and Latino borderland narrative fiction authors and artists use narrative devices to create their aesthetic blueprints in ways that loosely guide their readers' imagination and emotion. In *A User's Guide to Postcolonial and Latino Borderland Fiction*, he argues that the study of ethnic-identified narrative fiction must acknowledge its active engagement with world narrative fictional genres, storytelling modes, and techniques, as well as the way such fictions work to move their audiences.

Why are there morning people and night people? How come time flies when you're having fun and three minutes can sometimes seem an eternity? Would time exist if we didn't measure it and why is there never enough of it? Our modern lives are ruled by minutes and hours. We race from one thing to the next, all of us believing on some level that a mysterious cosmic force called time is ticking on. And it's always in short supply. But is the time we live really like that? Could there in fact be another, alternative version, entwined with the official one? Here Stefan Klein explores the hidden dimensions of time, looking at everything from when the present becomes the past to the tribe that see the future backwards, from when sex is best to why the years seem to speed by as we age. And he reveals how we can learn to live in harmony with the secret clock within us, altering our perceptions to transform our lives. To be enjoyed in the morning or the evening (depending on your body clock), this book will make you think the next time you check your watch and maybe even slow down a little.
