BESTSELLER • More than two million copies in print! The premier resource for how to deliver results in an uncertain world, whether you 're running an entire company or in your first management job. "A must-read for anyone who cares about business." —The New York Times When Execution was first published, it changed the way we did our jobs by focusing on the critical importance of "the discipline of execution": the ability to make the final leap to success by actually getting things done. Larry Bossidy and Ram Charan now reframe their empowering message for a world in

which the old rules have been shattered, radical change is becoming routine, and the ability to execute is more important than ever. Now and for the foreseeable future:

- Growth will be slower. But the company that executes well will have the confidence, speed, and resources to move fast as new opportunities emerge.
- Competition will be fiercer, with companies searching for any possible advantage in every area from products and technologies to location and management.
- Governments will take on new roles in their national economies, some as partners to business, others imposing constraints. Companies that execute well will be more attractive to government entities as partners and suppliers and better prepared to adapt to a new wave of regulation.
- Risk management will become a top priority for every leader. Execution gives you an edge in detecting new internal and external threats and in weathering crises that can never be fully predicted. Execution shows how to link together people, strategy, and operations, the three core processes

of every business. Leading these processes is the real job of running a business, not formulating a "vision" and leaving the work of carrying it out to others. Bossidy and Charan show the importance of being deeply and passionately engaged in an organization and why robust dialogues about people, strategy, and operations result in a business based on intellectual honesty and realism. With paradigmatic case histories from the real world—including examples like the diverging paths taken by Jamie Dimon at JPMorgan Chase and Charles Prince at Citigroup—Execution provides the realistic and hard-nosed approach to business success that could come only from authors as accomplished and insightful as Bossidy and Charan.

In 1920 the League of Nations Advisory Committee on the Traffic in Opium and Other Dangerous Drugs captured eight decades of political turmoil over opium trafficking. Steffen Rimner shows how

local protests crossed imperial, national, and colonial boundaries to harness naming and shaming in international politics—a deterrent that continues today.

Opening in July 1914, as Mohandas Gandhi leaves South Africa to return to India, *Gandhi: The Years That Changed the World, 1914-1918* traces the Mahatma's life over the three decades preceding his assassination.

Drawing on new archival materials, acclaimed historian Ramachandra Guha follows Gandhi's struggle to deliver India from British rule, to forge harmonious relations between India's Hindus and Muslims, to end the pernicious practice of untouchability, and to nurture India's economic and moral self-reliance. He shows how in each of these campaigns, Gandhi adapted methods of nonviolence that successfully challenged British authority and would influence revolutionary movements throughout

the world. A revelatory look at the complexity of Gandhi's thinking and motives, the book is a luminous portrait of not only the man himself, but also those closest to him—family, friends, and political and social leaders.

"Described by his contemporaries as a cross between Albert Schweitzer and Paul Gauguin, Elwin was a man of contradictions, at times taking on the role of evangelist, social worker, political activist, poet, government worker, and more. Intensely political, the Oxford-trained scholar tirelessly defended the rights of the indigenous and despite the deep religious influences of St.

Reimagining India brings together leading thinkers from around the world to explore the challenges and opportunities faced by one of the most important and least understood nations on earth. India's abundance of life—vibrant, chaotic, and tumultuous—has long been its foremost asset. The nation's rising economy and burgeoning middle class have earned

India a place alongside China as one of the world's two indispensable emerging markets. At the same time, India's tech-savvy entrepreneurs and rapidly globalizing firms are upending key sectors of the world economy. But what is India's true potential? And what can be done to unlock it? McKinsey & Company has pulled in wisdom from many corners—social and cultural as well as economic and political—to launch a feisty debate about the future of Asia's "other superpower."

Reimagining India features an all-star cast of contributors, including CNN's Fareed Zakaria; Mukesh Ambani, CEO of India's largest private conglomerate; Microsoft founder Bill Gates; Google chairman Eric Schmidt; Harvard Business School dean Nitin Nohria; award-winning authors Suketu Mehta (*Maximum City*), Edward Luce (*In Spite of the Gods*), and Patrick French (*India: A Portrait*); Nandan Nilekani, Infosys cofounder and chairman of the Unique Identification Authority of India; and a host of other leading executives, entrepreneurs, economists, foreign policy experts, journalists, historians, and cultural luminaries. These essays explore topics like the strengths and weaknesses of India's political system, growth prospects for India's economy, the competitiveness of Indian firms, India's rising international profile, and the rapid evolution of India's culture. Over the next decade India has the opportunity to show the rest of the developing world how open, democratic societies can achieve high growth and shared prosperity. Contributors offer creative strategies for seizing that opportunity. But they also offer a frank assessment of the risks that India's social and political fractures will instead thwart progress, condemning hundreds of millions of people to enduring poverty.

Reimagining India is a critical resource for readers seeking to understand how this vast and vital nation is changing—and how it promises to change the world around us. *Savaging the Civilized* IVP Academic

A wide-ranging survey of the Indian sub-continent, *Modern South Asia* gives an enthralling account of South Asian history. After sketching the pre-modern history of the subcontinent, the book concentrates on the last three centuries from c.1700 to the present. Jointly written by two leading Indian and Pakistani historians, *Modern South Asia* offers a rare depth of understanding of the social, economic and political realities of this region. This comprehensive study includes detailed discussions of: the structure and ideology of the British raj; the meaning of subaltern resistance; the refashioning of social relations along lines of caste class, community and gender; and the state and economy, society and politics of post-colonial South Asia. The new edition includes a rewritten, accessible introduction

and a chapter by chapter personalities. revision to take into account recent research. The second edition will also bring the book completely up to date with a chapter on the period from 1991 to 2002 and a discussion of the last millennium in sub-continental history.

Making of Martyrs unravels an epic saga of populist politics in the postcolonial Indian subcontinent. Indira Gandhi, Zulfikar Ali Bhutto and Sheikh Mujibur Rahman were towering figures and have been simultaneously loved and hated in equal measure. During their heyday, each of these leaders garnered extraordinary power and charisma. Their followers, admirers and loyal supporters continue to idolise and romanticise them, yet in the eyes of their critics they were ruthless, power-hungry tyrants and partisan villains. These dichotomies remain irreconcilable since their followers venerate them as a model for the future and their critics relegate them to a haunted past. Drawing on years of research, Faisal Khosa explores the turbulent lives and times of these three leaders and gives us a vivid account of their politics and personalities.

Between 1939 and 1945 India underwent extraordinary and irreversible change. Hundreds of thousands of Indians suddenly found themselves in uniform, fighting in the Middle East, North and East Africa, Europe and—something simply never imagined—against a Japanese army poised to invade eastern India. With the threat of the Axis powers looming, the entire country was pulled into the vortex of wartime mobilization. By the war's end, the Indian Army had become the largest volunteer force in the conflict, consisting of 2.5 million men, while many millions more had offered their industrial, agricultural, and military labor. It was clear that India would never be same—the only question was: would the war effort push the country toward or away from independence? In *India's War*, historian Srinath Raghavan paints a compelling picture of battles abroad and of life on the home front, arguing that the war is crucial to explaining how and why colonial rule ended in South Asia.

World War II forever altered the country's social landscape, overturning many Indians' settled assumptions and opening up new opportunities for the nation's most disadvantaged people. When the dust of war settled, India had emerged as a major Asian power with her feet set firmly on the path toward Independence. From Gandhi's early urging in support of Britain's war efforts, to the crucial Burma Campaign, where Indian forces broke the siege of Imphal and stemmed the western advance of Imperial Japan, Raghavan brings this underexplored theater of WWII to vivid life. The first major account of India during World War II, *India's War* chronicles how the war forever transformed India, its economy, its politics, and its people, laying the groundwork for the emergence of modern South Asia and the rise of India as a major power.

[The Robot Will See You Now](#) Random House India

The last decade has seen dramatic advances in artificial intelligence and robotics technology, raising tough questions

that need to be addressed. The Robot Will See You Now considers how Christians can respond to these issues - and flourish - in the years ahead. Contributions from a number of international experts, including editors John Wyatt and Stephen Williams, explore a range of social and ethical issues raised by recent advances in AI and robotics. Considering the role of artificial intelligence in areas such as medicine, employment and security, the book looks at how AI is perceived as well as its actual impact on human interactions and relationships. Alongside are theological responses from an orthodox Christian perspective. Looking at how artificial intelligence and robotics may be considered in the light of Christian doctrine, The Robot Will See You Now offers a measured, thoughtful view on how Christians can understand and prepare for the challenges posted by the development of AI. This is a book for anyone who is interested in learning more about how AI and robots have advanced in recent years, and anyone who has wondered how Christian teaching relates to artificial intelligence. Whatever your level of technical knowledge, The Robot Will See You Now will give you a thorough understanding of AI and equip you to respond to the challenges it poses with confidence and faith. The Idea of India Wipf and Stock Publishers The twenty-first century has been dubbed the Asian Century. Highlighting diverse thinker-politicians rather than billionaire businessmen, Makers of Modern Asia presents eleven leaders who theorized and organized anticolonial movements, strategized and directed military campaigns, and designed and implemented political systems. Gods That Fail, Revised Edition Pan Macmillan Hardly more than a decade old, the twenty-first century has already been dubbed the Asian Century in recognition of China and India's increasing importance in world affairs. Yet discussions of Asia seem fixated on economic indicators—gross national product, per capita income, share of global trade. Makers of Modern Asia reorients our understanding of contemporary Asia by highlighting the political leaders, not billionaire businessmen, who helped launch the Asian Century. The nationalists who crafted modern Asia were as much thinkers as activists, men and women who theorized and organized anticolonial movements, strategized and directed military campaigns, and designed and implemented political systems. The eleven thinker-politicians whose portraits are presented here were a mix of communists, capitalists, liberals, authoritarians, and proto-theocrats—a group as diverse as the countries they represent. From China, the world's most populous country, come four: Mao Zedong, leader of the Communist Revolution; Zhou Enlai, his close confidant; Deng Xiaoping, purged by Mao but rehabilitated to play a critical role in Chinese politics in later years; and Chiang Kai-shek, whose Kuomintang party formed the basis of modern Taiwan. From India, the world's largest democracy, come three: Mohandas Gandhi, Jawaharlal Nehru, and Indira Gandhi, all of whom played crucial roles in guiding India toward

independence and prosperity. Other exemplary nationalists include Vietnam's Ho Chi Minh, Indonesia's Sukarno, Singapore's Lee Kuan Yew, and Pakistan's Zulfikar Ali Bhutto. With contributions from leading scholars, *Makers of Modern Asia* illuminates the intellectual and ideological foundations of Asia's spectacular rise to global prominence. *Makers of Modern India* Simon and Schuster The globalizing world of late modernity is heavily awash with pseudo-gods. *Gods That Fail* provocatively deploys the theological concept of idolatry to explore the ways in which these gods blind their devotees and wreak suffering and dehumanization. Many of these pseudo-gods have infiltrated the life of the Church and compromised its witness. Combining lively social critique with fresh expositions of familiar biblical stories, this book engages with a variety of secular discourses as well as the sub-Christian practices that accompany and undermine Christian involvement in the public square. *India Becoming* Univ of California Press

In this wide-ranging volume, leading scholars across several disciplines--history, literature, sociology, and cultural studies--investigate the nature of liberalism and modernity in imperial Britain since the eighteenth century. They show how Britain's liberal version of modernity (of capitalism, democracy, and imperialism) was the product of a peculiar set of historical circumstances that continues to haunt our neoliberal present. *Makers of Modern Asia* Macmillan "In the erudite essay that opens this forum, Prasenjit Duara turns to both indigenous thinkers and the premodern past for tools with which to think about Asia in a global age. Contemporary modalities of regional exchange – 'weakly bounded, network-oriented, pluralistic, multitemporal' – chime with earlier patterns of cultural circulation without state domination, giving rise to a prophetic vision of 'Asia Redux'. This attempt to capture the contours of a (re)-emergent region was calculated to provide. And what a debate it kicks off. Wang Hui resolutely reframe imagining Asia as a political project on a world-historical canvas. Tansen Sen greatly complicates the map of intra-Asian commercial exchange in earlier times; Amitav Acharya outlines five

competing conceptions of Asia in the domain of international relations alone.; Barbara Watson Andaya teases out the paradoxical way in which regional religions make clashing claims about Asian unity; and Rudolf Mrazek asks, what of the Asia that bleeds? what of exploitation and its spawn, the inglorious 'built-ends' of the global economy? The reward for those who read this collection straight through is a thrillingly cacophonous conversation about how to grasp Asia in our time. " —Karen E. Wigen, Stanford University "Will a re-emergent Asia extend the violent rivalries and inequalities of Western-dominated empires, nations and capital? Or can Asia somehow draw on a relatively more peaceful past of maritime trade, interlinked religions and circulations beyond states to think and make a very different sort of region and world? Prasenjit Duara and his interlocutors define this vital debate on Asia's future through illuminating reflections on its recent and deep past. A touchstone for anyone concerned with a future shape of an inter-connected Asia newly possessed of wealth and power " —Engseng Ho, Duke University *Peculiarities of Liberal Modernity in Imperial Britain* Vintage In these original essays,

distinguished scholars of modern East Asia distill from long years of research interpretive accounts of late nineteenth- and twentieth-century China, Japan, and Korea. All of the contributors describe particular features of the modern experience of East Asian countries, while also addressing common themes.

Gandhi Before India
Harvard University Press
A Corner of a Foreign Field seamlessly interweaves biography with history, the lives of famous or forgotten cricketers with wider processes of social change. C. K. Nayudu and Sachin Tendulkar naturally figure in this book but so, too, in unexpected ways, do B. R. Ambedkar, Mahatma Gandhi, and M. A. Jinnah. The Indian careers of those great British cricketers, Lord Harris and D. R. Jardine, provide a window into the operations of Empire. The remarkable life of India's first great slow bowler, Palwankar Baloo, provides an arresting new perspective on the struggle against caste discrimination. Later

chapters explore the competition between Hindu and Muslim cricketers in colonial India and the destructive passions now provoked when India plays Pakistan. For this new edition, Ramachandra Guha has added a fresh introduction as well as a long new chapter, bringing the story up to date to cover, among other things, the advent of the Indian Premier League and the Indian team's victory in the World Cup of 2011, these linked to social and economic transformations in contemporary India. A pioneering work, essential for anyone interested in either of those vast themes, cricket and India, A Corner of a Foreign Field is also a beautifully written meditation on the ramifications of sport in society at large.

Reimagining India Univ of California Press

At the core of this book is a seemingly simple question: What is Asia? In search of common historical roots, traditions and visions of political-cultural integration, first Japanese, then Chinese, Korean and Indian intellectuals, politicians and writers understood Asianisms as an umbrella for all conceptions,

imaginings and processes which emphasized commonalities or common interests among different Asian regions and nations. This book investigates the multifarious discursive and material constructions of Asia within the region and in the West. It reconstructs regional constellations, intersections and relations in their national, transnational and global contexts. Moving far beyond the more well-known Japanese Pan-Asianism of the first half of the twentieth century, the chapters investigate visions of Asia that have sought to provide common meanings and political projects in efforts to trace, and construct, Asia as a united and common space of interaction. By tracing the imagination of civil society actors throughout Asia, the volume leaves behind state-centered approaches to regional integration and uncovers the richness and depth of complex

identities within a large
and culturally
heterogeneous space.
