In SKYLINE: TALES OF MANHATTAN, award-winning playwright and author William Ivor Fowkes presents 19 stories of New Yorkers (gay, straight, and confused) making startling connections and discoveries-proving once again that Manhattan's residents are just as striking as the city's celebrated skyline."Park Avenue." A Park Avenue Republican gets a taste of life on the "down low" in Central Park. "Twin Towers." A transplanted New Orleans cabaret singer deals with life and love in the aftermath of 9/11. "Dummy Copy." A SoHo graphic designer takes drastic steps to get the attention of her editor. "Chrysler." A man becomes obsessed with the Chrysler Building. "A Proper Bed." A suburban family man is distracted by the men he sees on the streets of Manhattan. "Not Here Yet." Two women fight over a very small piece of real estate. "A Modest Proposal." Two copywriters working at the same ad agency in the 1980s discover they both have a secret life. "The Church." A proud agnostic is drawn into a church where he is mesmerized by what he finds. The Museum. At MOMA, a woman physically attacks a man examining a sculpture she doesn't like. "Snap." A 42-year-old woman takes refuge on a park bench to contemplate her latest romantic disaster. "The Dakota." Two worlds collide when a reclusive resident of New York's most fabled apartment building cruises for sex on the Internet. "The Century." A man finally tells his therapist what's really on his mind. "Headlines." A man's furtive sex life lands him on the front page of The New York Post. "Lincoln Towers." An aging resident of the Upper West Side's "city within a city" finds life increasingly mystifying. "Ashes." A man stumbles into the wrong funeral, but makes an unexpected connection with the deceased. "The Haircut." A man approaching his 60th birthday tries a new haircut, with disastrous consequences. "Chamber Music." A man's mind wanders during a private concert in honor of Mozart's 250th birthday. "Wallpaper." A struggling writer in the East Village papers his kitchen wall with rejection letters. "Metastory." A writer argues with himself as he tries to compose a short story about writing a short story.

Business Automation and Its Effect on the Labor Force informs business managers on new technologies that can make their industries more efficient. This book provides a primer on quantum computing, artificial intelligence, robotics, and sensors. As a business management book, managers can start planning for the future. The author predicts when the advanced systems would be ready to use. Getting a clearer picture of what is on the horizon, business managers can determine how many workers and machines will be needed. Managers will learn how to calculate the optimal mix of workers and machines. Key Book Highlights Covering labor and technology in agriculture, manufacturing, construction, transportation, hospitality, health

care, office administration, and education. A review of the evolution of systems, machines, and devices from the past to the present, and where the latest advancement is headed. A visual timeline showing when new systems and machines would be available for eight industries in the next 25 years. Succinct descriptions of eliminated jobs, retained jobs, and new roles for workers. A simplified method to calculate the costs of operations, allowing business managers to compare human productivity against machine productivity. Labor market information in context of technological innovation for state workforce agencies and local workforce development boards. Lists of occupations with Standard Occupational Classification (SOC) codes for labor economists, workforce development specialists, and job seekers.

Reviewing the Living Environment

[Brief Review for New York](#) Remedica

This book contains several critical essays, book reviews, and poems that address the current pandemic to mark a sad but hopeful first anniversary of COVID. Similar to many academic journals, the Journal of Medical Humanities, in which these contributions were first published, has received a number of submissions during the first year of the pandemic relating directly to it. In the early months, the journal saw an unprecedented number of poetry submissions from physicians who seemed to be turning to verse as a way to memorialize what was happening, to find ways of healing from the devastating number of dying patients, and to capture the exhaustion and anxiety of caring for others day after day without respite. By publishing this selection, the volume editors honor and thank all those who have been caring for patients, teaching and mentoring students, and as such have been contributing to our understanding and awareness of this crisis. Previously published in Journal of Medical Humanities, Volume 42, issue 1, March 2021 Chapters “COVID-19, Contagion, and Vaccine Optimism”, “Virile Infertile Men, and Other Representations of In/Fertile Hegemonic Masculinity in Fiction Television Series”, “Movement as Method: Some Existential and Epistemological Reflections on Dance in the Health Humanities” and “The Ethic of Responsibility: Max Weber’s Verstehen and Shared Decision-Making in Patient-Centred Care” are available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

The Routledge Research Companion to Electronic Music: Reaching out with Technology Barrons Educational Series

Presents the theory of NMR enhanced with Mathematica© notebooks Provides short, focused chapters with brief explanations of well-defined topics with an emphasis on a mathematical description Presents essential results from quantum mechanics concisely and for easy use in predicting and simulating the results of NMR experiments Includes Mathematica notebooks that implement the theory in the form of text, graphics, sound, and calculations Based on class tested methods developed by the author over his 25 year teaching career. These notebooks show exactly how the theory works and provide useful calculation templates for NMR researchers

Let's Review Biology-The Living Environment Routledge

****LIMITED TIME BOX SET**** of the first TWO books from the Fallen Angels Series. TAJAEL I am an angeling of the light, Protector class, assigned to Guardian Duty... and I am Tempted. A war brews in the immortal realms, between the Angels of Light—created to love and protect humanity—and their ancient enemy, the Fae. The Fae have created a demon plague to stop the humans and their technology from invading the immortal realms. I’m tasked with protecting a beautiful scientist who may do exactly that... but this duty is fraught with danger. Not due to the demons who hunt her but because a Fall from Lust will plunge me into shadow. I’ve already been marked by the darkness of that realm—and I’ve vowed never to return.

CHARLOTTE I’m a scientist, a physicist, a woman of reason... and I don’t believe in angels. My Ex broke me in ways I didn’t even know I could break. But I’ve moved on and put the nightmares behind me. Now I have work to do, a theory to test, and a billionaire lined up to fund my experiments. If I’m successful, it will change the world. Everything’s finally coming together—then my co-worker attacks me, my hot neighbor saves me, and suddenly, I’m wondering if there’s more to my theories about an extra-dimensional world than I ever suspected... In a war that threatens mortals and immortals alike, the Angels of Light vow to protect humanity... but they will be tempted by the sweet promise of Love. Get two books in this box set—A Deadly Sin, which is Tajael’s story, and Guardian of the Light, Oriel’s story—for a LIMITED TIME! Each book is a complete story with HEA. Fallen Angels is a follow-on series from the bestselling Fallen Immortals series. It contains sexy hot angels of light—and shadow. KEYWORDS: shapeshifter romance with sex, angel romance, shifter romance, paranormal romance, new adult romance, romance ebook, top romance reads, fantasy romance, paranormal elements

[Learning Strategies for Allied Health Students](#) Simon and Schuster

A revision of the leading text on experimental physics. The feature of this book that has made it one of the most loved texts on the subject is that it goes far beyond a mere description of key experiments in physics.

The author successfully provides the reader with an understanding and appreciation of the 'physics' behind the experiments. The second edition will be an extensive revision introducing many new devices, including the use of computers and software programs, that have come into use since the publication of the first edition. In addition the important areas of condensed matter physics and optical physics will be added, including two entirely new chapters on lasers and optics. Modern analysis and acquisition techniques Integration with matlab for data analysis and display New experiments include fundamentals of lasers *Guardian Angels Box Set (Books 1-2: Fallen Angels Series)—Paranormal Romance* Reviewing the Living EnvironmentThis review book provides a complete review of a one-year biology course that meets the NYS Living Environment Core Curriculum.Includes four recent Regents exams.Brief Review for New YorkLet's Review Regents: Living Environment Revised Edition Learning Strategies for Allied Health Students equips you for success with separate sections filled with strategies for making reading, writing, mathematics, and studying easier; a vocabulary chapter that introduces the medical and non-medical terms you need to know...with a glossary that summarizes these terms for you, at a glance; 15 reading selections - one for each chapter - that let you practice using the skills you've learned; exercises from current allied health textbooks to give you hands-on practice with the kinds of assignments you'll encounter at school. An answer key allows you to check your work; and much, much more! Learning Strategies for Allied Health Students is the only book that's written specifically with your needs in mind. Clear and easy to read, it's your best way to prepare for the challenges you'll face in school...and in the workplace!

Logical Design for Digital Instrumentation Systems CRC Press

One of the most time-consuming tasks in clinical medicine is seeking the opinions of specialist colleagues. There is a pressure not only to make referrals appropriate but also to summarize the case in the language of the specialist. This book explains basic physiologic and pathophysiologic mechanisms of cardiovascular disease in a straightforward manner, gives guidelines as to when referral is appropriate, and, uniquely, explains what the specialist is likely to do. It is ideal for any hospital doctor, generalist, or even senior medical student who may need a cardiology opinion, or for that ma.

Journal of Electronic Engineering Springer Nature

This book focuses on the interplay of gender, race, and their representation in American science fiction, from the nineteenth-century through to the twenty-first, and across a number of forms including literature and film. Haslam explores the reasons why SF provides such a rich medium for both the preservation of and challenges to dominant mythologies of gender and race. Defining SF linguistically and culturally, the study argues that this mode is not only able to illuminate the cultural and social histories of gender and race, but so too can it intervene in those histories, and highlight the ruptures present within them. The volume moves between material history and the linguistic nature of SF fantasies, from the specifics of race and gender at different points in American history to larger analyses of the socio-cultural functions of such identity categories. SF has already become central to discussions of humanity in the global capitalist age, and is increasingly the focus of feminist and critical race studies; in combining these earlier approaches, this book goes further, to demonstrate why SF must become central to our discussions of identity writ large, of the possibilities and failings of the human —past, present, and future. Focusing on the interplay of whiteness and its various 'others' in relation to competing gender constructs, chapters analyze works by Nathaniel Hawthorne, Mary E. Bradley Lane, Edgar Rice Burroughs, Philip Francis Nowlan, George S. Schuyler and the Wachowskis, Frank Herbert, William Gibson, and Octavia Butler. Academics and students interested in the study of Science Fiction, American literature and culture, and Whiteness Studies, as well as those engaged in critical gender and race studies, will find this volume invaluable.

[Scientific and Technical Aerospace Reports](#) Saunders

The theme of this Research Companion is 'connectivity and the global reach of electroacoustic music and sonic arts made with technology'. The possible scope of such a companion in the field of electronic music has changed radically over the last 30 years. The definitions of the field itself are now broader - there is no clear boundary between 'electronic music' and 'sound art'. Also, what was previously an apparently simple divide between 'art' and 'popular' practices is now not easy or helpful to make, and there is a rich cluster of streams of practice with many histories, including world music traditions. This leads in turn to a steady undermining of a primarily Euro-American enterprise in the second half of the twentieth century. Telecommunications technology, most importantly the development of the internet in the final years of the century, has made materials, practices and experiences ubiquitous and apparently universally available - though some

contributions to this volume reassert the influence and importance of local cultural practice. Research in this field is now increasingly multi-disciplinary. Technological developments are embedded in practices which may be musical, social, individual and collective. The contributors to this companion embrace technological, scientific, aesthetic, historical and social approaches and a host of hybrids – but, most importantly, they try to show how these join up. Thus the intention has been to allow a wide variety of new practices to have voice – unified through ideas of 'reaching out' and 'connecting together' – and in effect showing that there is emerging a different kind of 'global music'.

A Primer of NMR Theory with Calculations in Mathematica Public Affairs

This high school classroom supplement to the main biology text prepares students in New York State to succeed on the Regents Exam. It presents a subject review, practice ques-tions with answers, and two complete Regents Biology Exam with answer keys. When combined with Barron's Regents Exams and Answers, Biology, it provides students with the most comprehensive test preparation available anywhere. Topics reviewed include ecology, biological organization, formation and structure of the ecosystem, and the interaction between human beings and the biosphere.

Science John Wiley & Sons

Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database.

Barron's Let's Review Regents: Living Environment gives students the step-by-step review and practice they need to prepare for the Regents exam. This updated edition is an ideal companion to high school textbooks and covers all Biology topics prescribed by the New York State Board of Regents. All Regents test dates for 2020 have been canceled. Currently the State Education Department of New York has released tentative test dates for the 2021 Regents. The dates are set for January 26-29, 2021, June 15-25, 2021, and August 12-13th. You'll get one recent Regents exam and question set with explanations of answers and wrong choices. The edition also features teachers' guidelines for developing New York State standards-based learning units. Two comprehensive study units cover the following material: Unit One explains the process of scientific inquiry, including the understanding of natural phenomena and laboratory testing in biology Unit Two focuses on specific biological concepts, including cell function and structure, the chemistry of living organisms, genetic continuity, the interdependence of living things, the human impact on ecosystems, and several other pertinent topics Looking for additional review? Check out Barron's Regents Living Environment Power Pack two-volume set, which includes Regents Exams and Answers: Living Environment in addition to Let's Review Regents: Living Environment.

Let's Review Regents: Living Environment Revised Edition

In the tradition of Go Ask Alice and Lucy in the Sky, this heart-wrenching story chronicles a girl’s fatal experience with testing her moral limits and the dangers of addiction. Bailey welcomes a fresh start at the prestigious boarding school, Prescott Academy, far away from the painful memories of her mother’s death and the unendurable happiness of her father and his new wife. She expects rigorous coursework and long hours of studying—what she doesn’t expect is to be inducted into the Science Club, a group of wealthy and intelligent students who run a business cooking up drugs in their spare time. Suddenly, Bailey has everything she’s ever wanted, including a sweet and handsome boyfriend named Warren, the brainy lead chemist in the Club. But as she wades deeper into the murky waters of their business, Bailey finds herself struggling to reconcile her new lifestyle with moral dilemmas she just can’t ignore. Can she have it all without breaking?
