Field Guide for the Identification of Invasive Plants in Southern

Forests

Invasions of non-native plants into forests of the Southern United States continue to go unchecked and only partially un-monitored. These infestations increasingly erode forest productivity, hindering forest use and management activities, and degrading diversity and wildlife habitat. Often called non-native, exotic, non-indigenous, alien, or noxious weeds, they occur as trees, shrubs, vines, grasses, ferns, and forbs. This guide provides information on accurate identification of the 56 non-native plants and groups that are currently invading the forests of the 13 Southern States. In addition, it lists other non-native plants of growing concern. Illustrations. This is a print on demand edition of an important, hard-to-find publication.

Operation & Maintenance Manual

While a quick response can save you in a time of crisis, avoiding a crisis remains the best defense.

When dealing with complex industrial systems, it has become increasingly obvious that

preparedness requires a sophisticated understanding of human factors as they relate to the functional characteristics of socio-technology systems. Edited by indust
