Fine Homebuilding Simon and Schuster Resilience discourse has recently become a global phenomenon, infiltrating the natural and social sciences, but has rarely been undertaken as an important object of study within the field of the humanities. Understanding narrative in its broad sense as the representation in art of an event or story, *Glocal Narratives of Resilience* investigates the contemporary approaches to resilience through the analyses of cultural narratives that engage aesthetically and ideologically in (re)shaping the notion of resilience, going beyond the scales of the personal and the local to consider the entanglement of the regional, national and global aspects embedded in the production of crises and the resulting call for resilience. After an

introductory survey of the state of the art in resilience thinking, the book grounds its analyses of a wide range of narratives from the American continent, Europe, and India in various theoretical strands, spanning Psycho-social Resilience, Socio-Ecological Resilience, Subaltern Resilience, Indigenous survivance and resurgence, Neoliberal Resilience, and Compromised Resilience thinking, among others, thus opening the path toward the articulation of a cultural narratology of resilience.

Good Girls, Good Food, Good Fun Springer Science & Business Media Thousands have been wounded in the wars in Iraq and Afghanistan. Five have survived quadruple amputee injuries. This is one soldier's story. Thousands of soldiers die every year to defend their country. United States Army Staff Sergeant Travis Mills was sure that he would become another statistic when, during his third tour of duty in Afghanistan, he was caught in an IED blast four days before his twenty-fifth birthday. Against the odds, he lived, but at a severe cost—Travis became one of only five soldiers from the wars in Afghanistan and Iraq to survive a quadruple

amputation. Suddenly forced to reconcile with the fact that he no longer had arms or legs, Travis was faced with a future drastically different from the one he had imagined for himself. He would never again be able to lead his squad, stroke his fingers against his wife's cheek, or pick up his infant daughter. Travis struggled through the painful and anxious days of rehabilitation so that he could regain the strength to live his life to the fullest. With enormous willpower and endurance, the unconditional love of his family, and a generous amount of faith, Travis shocked everyone with his remarkable recovery. Even without limbs, he still swims, dances with his wife, rides mountain bikes, and drives his daughter to school. Travis inspires thousands every day with his remarkable journey. He doesn't want to be thought of as wounded. "I'm just a man with scars," he says, "living life to the fullest and best I know how." Insurance Restoration Contracting Kensington Books Sometimes small changes can have a big impact. But many homeowners looking for more living space still

insist on building expensive additions or completely rebuilding their home. In the latest groundbreaking step in the 'Not So Big' revolution, previously in hardback, Sarah Susanka and Marc Vassallo demonstrate how carefully chosen tweaks and simple additions can make a home seem much larger and more inviting. They avoid high-end architectural solutions, focusing instead on how 'Not So Big' ideas can dramatically improve even the most modest home. The authors show readers how to think like an architect, so they can accurately assess their home's shortcomings, apply 'Not So Big' principles to their remodelling plan and phase in their project incrementally over time. With the brilliant new book her fans have been clamouring for, Sarah Susanka once again proves that a little remodelling can go a long way.

Throughout World War II, when Saturday nights came around, servicemen and hostesses happily forgot the war for a little while as they danced together in USO clubs, which served as havens of stability in a time of social, moral, and geographic upheaval. Meghan Winchell demonstrates that in addition to boosting soldier morale, the USO acted as an architect of the gender roles and sexual codes that shaped the "greatest generation." Combining archival research with extensive firsthand accounts from among the hundreds of thousands of female USO volunteers, Winchell shows how the organization both reflected and

shaped 1940s American society at large. The USO had hoped that respectable feminine companionship would limit venereal disease rates in the military. To that end, Winchell explains, USO recruitment practices characterized white middle-class women as sexually respectable, thus implying that the sexual behavior of working-class women and women of color was suspicious. In response, women of color sought to redefine the USO's definition of beauty and respectability, challenging the USO's vision of a home front that was free of racial, gender, and sexual conflict. Despite clashes over class and racial ideologies of sex and respectability, Winchell finds that most hostesses benefited from the USO's chaste image. In exploring the USO's treatment of female volunteers, Winchell not only brings the hostesses' stories to light but also supplies a crucial missing piece for understanding the complex ways in which the war

both destabilized and restored certain versions of social order. The New Lawn Expert Peter Lang Incorporated, International Academic Publishers

This book deals with several aspects of what is now called "explicit number theory." The central theme is the solution of Diophantine equations, i.e.,

equations or systems of polynomial equations which must be solved in integers, rational numbers or more generally in algebraic numbers. This theme, in particular, is the central motivation for the modern theory of arithmetic algebraic geometry. In this text, this is considered through three of its most basic aspects. The local aspect, global aspect, and the third aspect is the theory of zeta and L-functions. This last aspect can be considered as a unifying theme for the whole subject. A slain lawyer and a stolen diamond compose quite a puzzle for an eighteenth-century anatomist in this historical mystery for fans of Caleb Carr. Newly released from the notorious asylum known as Bedlam, Lady Lydia Farrell finds herself in an equally terrifying position—as a murder suspect—when she stumbles upon the mutilated body of Sir Montagu Malthus in his study at Boughton Hall.

Meanwhile American Dr. Thomas Silkstone has been injured in a duel with a man who may or may not have committed the grisly deed of which Lydia is accused. Despite his injury, Thomas hopes to clear his beloved's good name by conducting a postmortem on the victim. With a bit of detective work, he learns that Montagu's throat was slit by no ordinary blade, but a ceremonial Sikh dagger from India—a clue that may be

connected to the fabled lost mines of Golconda. From the mysterious disappearance of a cursed diamond buried with Lydia's dead husband, to the undying legend of a hidden treasure map, Thomas must follow a trail of foreign dignitaries, royal agents—and even more victims—to unveil the sinister and shocking secrets in the stones . . .
