The process of health care reforms must be based on demographic, epidemiological and economic evidence if it is to achieve the fundamental target of affordable, sustainable and efficient health care services for the entire population. Consequently, costing of health care services has become a frequently used element of health care reforms. This book presents the essentials of costing in a health economic framework and gives examples from successful costing studies done by the author in Tanzania, Vietnam and Burkina Faso. Based on these examples it demonstrates the

importance of costing information for the planning and decision-making process in the field of budgeting, resource allocation, setting an insurance premium and strategic planning.

The main message of this book is that costing of health care services is a valuable instrument in the fight for better 'health for all'.

Management Accounting is written for students in international Business Management study programs. It covers the widely applied syllabus of Cost Accounting and Management Accounting at universities on bachelor's and master's level. The book is based on more than 20 years' academic teaching experience in Germany and at international universities in South Africa, Malaysia, China, the Netherlands and South Korea. In this text book, the application of

---

methods and instruments comes first.

Management Accounting follows a case study based approach. All cases are taken from previous exam papers and explained in detail. The text book starts with a case study of a manufacturing company and compares Financial Accounting to Management Accounting. It covers two point of views: (1) a General Management view, with aspects of business planning, cost-volume-profit analysis, degree of operating leverage, mergers and cross-border acquisitions and risk valuation. (2) a Cost Accounting view with Management Accounting systems, flexible budgeting, cost allocations, performance measurement and monitoring, reporting, calculation, manufacturing accounting (job order and process costing), activity based costing and multi-level contribution margin Accounting. On the UVK website, numerous exam tasks and complete solutions thereto are available in English.

Heuristics are short-cuts and deliberately ignore information, for instance through examining fewer cues or integrating less information. However, this collides with a view on management accountants and controllers as rational agents which seems to suggest

that all available information should be considered. As their role as information supplier is often accompanied with the task to assist managers in their judgment and decision making, they have huge influence on these processes. Therefore, it is of high relevance to know if, how, and which heuristics management accountants and controllers use. Furthermore, we need to know which individual and situational factors influence their usage of heuristics. With a series of five empirical studies, applying a mixed-methods research design, the author sheds light to these research questions and addresses some central claims of the potential biases but also the stunning benefits of relying on heuristic reasoning. Central to his discussion are dual-process-approaches which are debated in cognitive psychology. Scholars of these approaches claim that we should distinguish between two distinct processes (or systems) of the human mind. Following this interpretation, heuristics are processes which are described as intuitive, automatic, fast, and unconscious. They are routinized cognitive processes which are based on experience in certain social environments and thus often exhibit ecological rationality. Overall, this book picks up an up-to-date topic in behavioural accounting research, which not only is of relevance for researchers but as well for practitioners.

This book is the first in the management accounting framework literature to provide readers with insights on how to manage revenue and profit models by developing relationships with customers. The Principal Editor, Professor Kenichi Suzuki, is the founding father of Fixed Revenue Accounting (FRA) and his inputs offer invaluable insights on how businesses can increase revenue and adopt preventative measures to deal with the fluctuations in the economy. FRA is a new management accounting tool that evaluates and manages the impacts of fixed customers on a company's financial health. 'Fixed customers' refer to frequent or regular customers who are expected to repeat their purchases. Their repeated purchases produce stability of revenue which in turn creates a stable profit environment and certainty. The profitability and stability generated by fixed customers can be utilized for strategic management, planning, and decision making to encourage investment for future growth. This book provides a deep understanding of the usefulness of the new management accounting tool, and covers both the introduction of the concept of FRA and accompanying case studies in the contexts of Japanese manufacturing and

service companies adopting the FRA model by examining profitability, stability, and growth analysis.

Accounting: A Smart Approach Cengage Learning  
Many scholars have claimed that management accounting research has lost its pragmatic relevancy and interventionist research has been proposed as one way to produce theories with increased practical implications. In interventionist research, active participation in the field is regarded as an asset rather than a liability. Despite the methodological debate on interventionist research, there is lack of empirical studies on how interventionist research actually helps to produce theories with such pragmatic relevance. The lack of empirical studies has, perhaps, resulted in a too narrow connotation to the research approach. This book attempts to shed light on the various nuances of interventionist research and the positions a researcher can occupy when trying to produce

---

contributions associated with both theoretical and pragmatic relevance. This book is based on various research projects focusing on different aspects of management accounting during the past ten years. To spice up the academic debate, the book also provides managerial perspectives on interventionist management accounting research with interesting new insights. In addition to management accounting, the ideas of interventionist research can also be applied in other management fields.

Purpose: In contrast to the reporting, stakeholder and regulatory focus, company-internal issues of carbon accounting have so far rarely been investigated in depth. This case study focuses on carbon accounting, as one aspect of accounting for impacts on the environmental capital and details the “ convergence ” process between two emergent corporate carbon management accounting approaches within a multinational company. Based on a qualitative analysis of this in-depth case study, we raise questions about what could be considered an effective carbon management accounting system.  
Design/methodology/approach: The research has been conducted with an in-depth case study, using participant observation (Spradley, 1980). We follow a pragmatic research approach and the proposal of Malmi and Granlund (2009) “ to create theories useful for practice is to solve practical problems with practitioners and

synthesize the novel solutions to a more general form ” .Findings: This case study demonstrates that it is possible to connect two corporate carbon management accounting approaches focusing on products and the organization into a combined carbon management accounting system. This has potential impact in making carbon management accounting in organizations leaner, and more efficient in terms of performance measurement and external communication. Research limitations/implications: This research is based on a single case study and more case studies in different industries could highlight further practical implementation difficulties and approaches to overcome. Practical implications: This paper unveils that different carbon management accounting approaches can emerge in parallel in the same corporation. The paper discusses possibilities and challenges to converge them in terms of methodology (emission factors for example) and/or in terms of information systems, on which the calculations are based. Originality/value: This is, to our knowledge, the first case study of an organization explicitly acknowledging the existence of multiple emerged carbon management accounting approaches and trying to make sense of them in a convergence process to create an overarching carbon accounting system.

specialists book whose fully integrated case study emphasises the relevance of accounting to the world of business. Sam Smart is the budding entrepreneur who forms the basis of the case study at the heart of this book. We follow Sam as he goes from starting a small business, printing sports kits for local teams, to managing a global sports business. Throughout the course of the book he assesses the success of his business, finances day to day activities, makes pricing decisions, opens new branches, looks at cash flow, and facilitates planning, control, and investment. Featured at the start of every chapter to highlight to students the implications and applications of the topic they are about to study, Sam and his business provide consistency and connection. As we follow the case study, all the topics central to accounting are covered with clarity, imagination, and relevance, giving students the support they need to complete their course and exams with confidence. The wealth of additional examples and self-test exercises available alongside the case study enable students not only to develop an appreciation of how accounting information allows a manager to make key business decisions, but also to

acquire the skills necessary to enable them to converse with accountants, and challenge their assumptions and methodologies. An Online Resource Centre accompanies the text book and includes: For Students: Flashcard glossary Multiple choice questions Additional practice questions with answers Tables from the text For Lecturers: Solutions to end-of-part case studies Additional end-of-part case studies (with solutions) Assessment guide PowerPoint presentations Test bank
