A Case Study Analysis on Manufacturing Companies Emerald Group Publishing
The deployment of digital technologies by companies affects their functioning in economic terms, and also causes social, institutional and organizational effects. This book examines the way in which management accounting systems structures, thinking and practices are being altered as a result.

Management Accounting in the Digital Economy Springer Nature
This richly illustrated book is a detailed history of a uniquely Australasian institution, the stock and station agency. The stock and station agent was a respected and influential figure, coordinating farmers and connecting them to the outside world of banks, wool buyers and government agencies in Australasia and overseas, whose impact on export-led growth cannot be underestimated. Simon Ville examines the ways in which stock and station agents grew from their beginnings in the 1840s as pastoral finance companies to offer a wide range of support services to remote and inexperienced farming communities. In the twentieth century, the leading agents expanded their range of activities and became some of Australasia's earliest nationwide firms and biggest businesses. The Rural Entrepreneurs provides essential insights into understanding Australasia's rural history and economic development up until the end of the twentieth century.

Japan has achieved the world's highest life-expectancy under a universal health coverage system. The purpose of this book is to discuss effective management accounting methods for solving various issues now faced by the healthcare system in Japan (low birth-rate and aging society, issues in medical public finance, issues attendant to advancements of healthcare services, etc.). This book is written by Japanese researchers who are active and at the forefront of management accounting research for healthcare, such as Takami Matsuo, Kazunori Ito, Yutaka Kato, and so on. This book shows the actual use of cost information, cost-management, and management-control methods for healthcare organizations in Japan, and examines how to adopt management accounting methods used by companies in healthcare management, which would be a useful reference for future healthcare management in countries that might face similar issues as Japan in the future.

Management Accounting Emerald Group Publishing
Current modern companies, which are also the key factors of a global economy, are subject to increasing pressures to conduct their business in an environmentally responsible manner, due to social and environmental problems. Improving long-term environmental performance can bring economic benefits to those companies that are innovative and environmentally sensitive, especially by integrating environmental information into their business strategies. Considering all the changes, sustainability reporting, management, and financial accounting becomes a powerful information tool for executives, managers, and employee teams to gain insights and make better decisions. Along with concepts such as ethical, controlling, auditing, management, and financial accounting, reporting provides value with the decision-making process. All these debates underline the major responsibility of users when configuring accounting and finance models and thereby in modelling business information. Sustainability Reporting, Ethics, and Strategic Management Strategies for Modern Organizations proposes

an interdisciplinary perspective and explores various theoretical and practical approaches of ethical standards, management accounting, and their impact in the 21st century on different areas of activity. It contrasts external financial accounting for government regulators and the investment community with internal management accounting for managers to leverage for decision making. In addition, the book examines the role of management accounting and sustainability reporting from other points of view such as ethical standards, corporate social responsibility, creative accounting, green accounting, environmental indicators, e-accounting, KPI, lean accounting, controlling, auditing, reporting, etc., offering a number of new insights into management accounting. It is intended for chief financial officers, financial controllers, business analysts, financial planners, financial analysts, budgeting managers, executives, managers, academicians, researchers, and students. *Subsidiary Controlling with Strategically Aligned Performance Measurement Systems* Springer

This book focuses on research in management accounting that uses Malaysia 's business environment as the scope of study. The motivation to embark on this publication was due to the recognition that although management accounting has received increasing interest from various organizations including government, businesses and educators, published documents that report findings from research in management accounting undertaken in Malaysia are still limited. The objective of this book is to address the gap by providing readers with five research oriented articles on management accounting issues, namely Performance Measurement Design in Service Organizations; Management Accounting and Control Systems in the Service Sector; Activity Based Costing; Intellectual Capital and Management Accounting Practices; and Customer Focused Manufacturing Strategy and Performance Measurement Systems. The articles are written by a pool of active researchers in the area of management accounting, and are expected to have high academic value. Each is complete with a literature review, methodology, data analysis and references. Even though this is the case, the articles have also been carefully chosen and edited for the general reader. This book is suitable as a reference for researchers, academics, managers, accountants, and policy makers.

Performance Measurement and Management Control Routledge

Thomas S. Konrad analyzes the management control design and reveals critical success factors of strategically oriented public-private partnerships for development between international governmental actors and the private sector. He builds a sound basis for the identification of a research gap and the derivation of research questions. The results generate sufficient evidence to answer these questions and therefore to close the identified research gap. Finally, he excelled in the discussion of the results by making a contribution of theory and by providing substantive recommendations to practitioners equally well.

Accounting Change in the Public Sector IGI Global

Given the significant changes in the banking environment and the resultant pressures on banks to change their systems and procedures, this book is a timely reference that provides a comprehensive analytical overview of changes in the performance measurement system (PMS) of banks in the post-financial crisis era. It explores the factors that influence such changes and examines banks ’ consequential responses to institutional pressures. It is an invaluable resource for researchers and practitioners to gain insights into the concept of PMS change in both developed and developing economies.

Accounting Essentials for Hospitality Managers Routledge

This book analyzes the impact of digitization on management accounting in five manufacturing companies. It is one of the first in-depth empirical studies on the intersection of management accounting and digitization. The study suggests that there are two archetypes of digitization of the management accounting function. The first archetype emphasizes top-down-driven changes that aim to enhance efficiency, such as conducting tasks with a higher degree of automation in a leaner structure with fewer resources. The second archetype is strongly driven and initiated by employees in the management accounting function (bottom-up). The focus is on improving the use of data by applying innovative analytics methods, integrating additional sources of data, and benefiting from new technologies like artificial intelligence. The results of the study also indicate that digitization of the management accounting function is mostly in line with the overall company strategy.
