Don Newman's first volume of Savannah centric poetry reflects the close personal relationship between poet and subject often found in work dedicated to a particular place. Such intimate subjectivity may seem lofty at times. But this Savannah native has a way of bringing grandiose notions of his hometown down to earth. Here, the author's regional sensibilities-together with his stretch toward the universal-offer the reader a unique perspective and a tour of Savannah unattainable during a typical day of sightseeing. While by no means a comprehensive poetic look at the city, Newman's Little Poetry Book of Savannah will surely augment the traveler's backpack, give visitors a distinctive literary keepsake, and make the perfect gift for those back home who would like an authentic little piece of Savannah. Meditative, descriptive, fun, quirky,

and enjoyably honest, Newman bares parts of his soul in this down-to-earth, head-in-the-clouds "poetry for everyone." For a slightly smaller, less expensive Black & White Edition go here:

What is Information Governance? Information governance is using the business strategy to apply objectivity, economies, and efficiencies of scale to the processes necessary for the management of information in the achievement of business success. The point of Information or Data Governance is to create TRUSTED data for the business. But how is that actually done? This book is for the individual who is looking for a starting place for establishing a path to better information for their business through a data governance program. The book focuses on describing deliverables and techniques necessary to quantify and measure the Trust of information, including creating dashboards to monitor the success of the Information Management and Governance (IMG) Program as well as an overall Trust

Dashboard for the enterprise. If you are trying to answer any of the following questions, then this book can help you out: How do we decrease the number of data silos? How much management and governance is needed for the data? Who owns the data? How do we get the business to trust the data? What measurements can I use to prove the data is good? What do I show executives to illustrate the progress of a data governance program? How can trust of business data be quantified? How is the relevance of data to the business determined? What is the appropriate level of management and governance necessary for the data? This book will help you answer these questions and start improving (and measuring the improvement) of data for your business. The book includes chapters that give a high level overview of data governance but focuses most of the attention on

---

the deliverables and methods necessary to quantify and measure the Trust of data, thereby establishing clear measurements for success.

Whether it's your daily dealings at work or a pervasive concern for your physical safety, the stress you regularly experience may actually be more harmful than the threat that triggered it. Not only can it lead to isolation and an erosion of happiness, stress can be biologically harmful, bringing about health issues, such as heart disease, high blood pressure, ulcers, and strokes. In short, successfully managing stress could be nothing less than a life-or-death situation. Now, professional biofeedback practitioner Harry L. Campbell presents "What Stress Can Do," his unprecedented guide to the importance of minimizing everyday stress in

order to short-circuit its many serious side effects. What's more, his easy-to-implement recommendations enable you to do so without use of any drugs. Recent data on the prevalence of stress documents that as much as 90 percent of all doctors' office visits are related to stress. However, with the right skills and perspective, you can preempt the physical fallout from the tolls of daily life, and gain new mastery over your mind. The time is right to take a step back, breathe easy, and once and for all address all that ails you.

Today about 85 per cent of the world population of Muslims live in areas outside the Arab world, and due to population growth, missionary endeavours and migration, the number of Muslims in these areas is rising rapidly. This volume presents the spread and character of Islam in many non-Arab countries, focusing particularly on the contemporary situation. The book deals with the great variety

---

and complexity that characterize Islam outside the Arab world, with Sufism (the predominant form of Islam in most non-Arab Muslim countries), and with the growing significance of Islamism which challenges secularism and Sufi forms of Islam.

"Managerial styles are influenced by habit, familiarity, and workplace culture. It's no wonder that well-intentioned professionals doing their best to be good organizational leaders often repeat unhelpful supervisory practices experienced in their early careers, even if they disliked them at the time. In the DUH! Book of Management and

Supervision, the author disagrees with many accepted leadership principles (unabashedly referring to them as myths) and makes new and different approaches easier to imagine. Her challenging and controversial concepts illustrated with poignant stories suggest common-sense and immediately applicable alternatives more suitable in today's workplace"--Back cover.

Instant Nationalism How To Books

Disruption following the Gulf War, and the need to satisfy both rising economic aspirations and the Islamic values of the region's peoples, demands fresh examination of development issues in the Arab world. This introductory text assesses how agricultural, industrial and urban development has evolved in the Arab region. Contrasting Arab and Western interpretations of 'development', it draws on case studies covering states as diverse as Saudi Arabia, Yemen, Morocco and Jordan. The author suggests that until the Arabs define their own identity, there will continue to be 'change' but not necessarily 'progress' in the region.

The Translation Movement of the Abbasid Period, which lasted for almost three hundred years, was a unique event in world history. During this period, much of the intellectual tradition of the Greeks, Persians, and Indians was translated into Arabic—a language with no prior history of translation or of science, medicine, or philosophy. This book investigates the cultural and political conflicts that translation brought into the new Abbasid state from a sociological perspective, treating translation as a process and a product. The opening chapters outline the factors involved in the initiation and cessation of translational activity in the Abbasid period before dealing in individual chapters with important events in the

Translation Movement, such as the translation of Aristotle's *Poetics* into Arabic, Abdullah ibn al-Muqaffa's seminal translation of the Indian/Persian *Kalilah wa Dimna* into Arabic and the translation of scientific texts. Other chapters address the question of whether the Abbasids had a theory of translation and why, despite three hundred years of translation, not a single poem was translated into Arabic. The final chapter deals with the influence of translation during this period on the Arabic language. Offering new readings of many issues that are associated with that period, informed by modern theories of translation, this is key reading for scholars and researchers in Translation Studies, Oriental and Arab Studies, Book History and
