presents a summary of interrelated constructs  
that define and guide occupational therapy  
practice. The Framework was developed to  
articulate occupational therapy's contribution  
to promoting the health and participation of  
people, organizations, and populations  
through engagement in occupation. The  
revisions included in this second edition are  
intended to refine the document and include  
language and concepts relevant to current  
and emerging occupational therapy practice.  
Implicit within this summary are the  
profession's core beliefs in the positive  
relationship between occupation and health  
and its view of people as occupational beings.
