Management Accounting is written for students in international Business Management study programs. It covers the widely applied syllabus of Cost Accounting and Management Accounting at universities on bachelor's and master's level. The book is based on more than 20 years' academic teaching experience in Germany and at international universities in South Africa, Malaysia, China,

the Netherlands and South Korea. In this text book, the application of methods and instruments comes first. Management Accounting follows a case study based approach. All cases are taken from previous exam papers and explained in detail. The text book starts with a case study of a manufacturing company and compares Financial Accounting to Management Accounting. It covers two point of views: (1) a General Management view, with aspects of business planning, cost-volume-profit analysis, degree of operating leverage, mergers and cross-border acquisitions and risk valuation. (2) a Cost Accounting view with Management Accounting systems, flexible budgeting, cost allocations, performance measurement and monitoring, reporting, calculation, manufacturing accounting (job order and process costing), activity based costing and multi-level contribution margin Accounting. On the UVK website, numerous exam tasks and complete solutions thereto are available in English.

Ordin on Contesting Confirmation, 6th Edition McGraw-Hill Europe Process Management, with its key concepts of internal customer and process ownership, is becoming one of the most important competitive weapons for firms and can determine a strategic change in the way business is carried out (Business Process Reengineering - B.P.R.). In this context, the flow of information increases, passes through the internal departments, to then extend beyond the traditional boundaries of the enterprise and form operational and knowledge networks with other business units, selected suppliers and clients, etc. These (internal and external) networks harness the great power offered by Web technologies (Internet, Intranet, Extranet) and create the Extended Enterprise. This book explores innovative themes that will trace the business paths for many firms in the near future. It is based on research and experience in several major companies, in particular the Snaidero Group (Europe's leading company in the kitchen sector), with contributions by leading Information & Communication Technologies (ICT) companies.
