"As our eyes are drawn upward to the skyline of great cities,  
it's important to remember that these impressive constructions  
are able to reach such heights only because their foundations are  
strong. In much the same way, being successful in the business  
world begins with fundamental courses like financial and  
managerial accounting. It is only when students have a firm grasp  
of concepts like the accounting cycle and managerial decision  
making that they have a base on which to stand, a strong  
foundation on which to grow. In this edition, as before, the  
Williams team has revised the text with a keen eye toward the  
principle of helping students establish the foundation they will  
need for future success in business. However, through new  
coverage of International Financial Reporting Standards and a  
revised globalization chapter, the Williams book also introduces  
students to larger themes and evolving concerns. This dual  
emphasis allows students to keep their eyes trained upward even  
as they become solidly grounded in accounting fundamentals"--
