manage an organization. Each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. There is significant coverage of contemporary topics such as activity-based costing, target costing, the value chain, customer profitability analysis, and throughput costing while also	including traditional topics such as job-order costing, budgeting, and performance evaluation. Many of the real-world examples in the Management Accounting Practice boxes have been revised and updated to make them more current and several new examples have been added. This Global Edition has been adapted to meet the needs of	courses outside the United States and does not align with the instructor and student resources available with the U.S. edition. <i>Intermediate Accounting</i> McGraw-Hill Education "As our eyes are drawn upward to the skyline of great cities, it's important to remember that these impressive constructions are able to reach such

heights only because their foundations are strong. In much the same way, being successful in the business world begins with fundamental courses like financial and managerial accounting. It is only when students have a firm grasp of concepts like the accounting cycle and	managerial decision making that they have a base on which to stand, a strong foundation on which to grow. In this edition, as before, the Williams team has revised the text with a keen eye toward the principle of helping students establish the foundation they will need for	future success in business. However, through new coverage of International Financial Reporting Standards and a revised globalization chapter, the Williams book also introduces students to larger themes and evolving concerns. This dual emphasis allows students to keep their eyes trained

franchise (the Brewer solution, the Garrison solution, and the Noreen solution), the Noreen solution is the most pure management accounting content. The other two programs contain greater coverage of financial accounting topics. Managerial Accounting for Managers 4e is geared towards	professors who love Garrison's m arket- leading managerial accounting content but prefer to approach their course by eliminating the debits and credits coverage. The Noreen solution includes the managerial accounting topics such as Relevant Costs for Decision Making, Capital Budgeting	Decisions, and Segment Reporting and Decentra lization, however, the job-order costing chapter has been extensively rewritten to remove all journal entries. Furthermore, the chapters dealing with process costing, the statement of cash flows, and financial statement analysis have been dropped to
