Three speeches on corporate globalism and imperialism by one of the most widely known guerilla fighters, political theorists, and organizers, Che Guevara. In this collection of three speeches, Ernesto Che Guevara offers a revolutionary view of a world in which human solidarity and understanding replace imperialist aggression and exploitation. First, in a sharp speech given in Algeria on February 24, 1965 at the Afro-Asia Economic Seminar, Che speaks about the nature of capitalism and the revolutionary struggle that would open the way for a new, socialist society. Guevara's 1965 essay, "Socialism and Man in

Cuba," is a milestone in twentieth-century emancipatory social thought. Finally, "Message to the Tricontinental" is one of Che's more well-known works, which outlines the tactics and strategies that should be followed in revolutionary struggle. This collection of writings merges Che's philosophy, politics, and economics in his all encompassing, coherent revolutionary vision. His ideas and his struggle strike a chord in the current search for global justice.

Reorienting understandings of Adrienne Rich's later work through her interest in Marx and Marxist politics, this book engages with this overlooked part of her oeuvre through considerations of issues such as race, nationhood, and gender. From 1983 onward, after she visited revolutionary Nicaragua until the end of her life, Rich's political vision can

best be described as Marxist-Humanist. Until recently, very little attention has been paid to Rich's interest in Marx; there is no in-depth treatment of the effect of Marx's humanistic philosophy on Rich's later work, or even on her unwavering, but altered dedication to Women's Liberation. This book fills this gap, showing how Rich's discovery of Marx's humanism affected her poetry. In doing so, it makes a significant intervention into debates about the direction of American poetics and argues powerfully for a greater consciousness of political engagement through poetry.

Our doctrine does not pretend to be the intellectual vision of a great

plan or of a design, but it is merely a method of research and of conception. It is not by accident that Marx spoke of his discovery as a guiding thread, and it is precisely for this reason that it is analogous to Darwinism, which also is a method...-from "Historical Materialism" One of the great European Marxists-in this volume, published in Italy in 1896 and in America in 1908-commemorates the then-upcoming 50th anniversary of Marx's Communist Manifesto, "our first unquestioned entrance into history." Students of European and American socialism will find this an invaluable document, evidence of a fulcrum moment in global history, when socialism's prospects were far brighter than they are today. Philosopher and revolutionary ANTONIO LABRIOLA (1843-1904) is considered the father of Italian Marxism. Born in Cassino, Italy, he was educated at the University of Naples and wrote for numerous liberal political journals. Among his books are Problems of the Philosophy of History and Socialism (1889) and Correspondence on Philosophy and Socialism (1898).

Part of the Knickerbocker Classics series, a modern design makes this timeless book a perfect travel companion. Considered to be one of the most influential political writings, The Communist Manifesto is as relevant today as when it was originally published. This pamphlet by the German philosophers Karl Marx and Friedrich Engels, published in 1848 as revolutions were erupting across Europe, discusses class struggles and the problems of a capitalist society. After being exiled to London, Marx published the first part of Das Kapital, a theoretical text that argues that capitalism will create greater and greater division in wealth and

welfare and ultimately be replaced by a system of common ownership of the means of production. After Marx's death, Engels completed and published the second and third parts from his colleague's notes. In this important book, Antonio Negri develops the key ideas that were to form the basis for the highly influential analyses of new forms of power and social struggle presented in Empire and Multitude. He shows how new technology and the break-up of the traditional factory have created new social subjects whose value is no longer tied to their skill. The spread of communication networks and the globalization of production mean that capitalism has become totalized - but not, Negri stresses, monolithic. On the contrary, the possibilities for subversion have correspondingly increased. Going beyond classical Marxism, he shows how old solidarities must be

reformulated and new alliances created. The struggles which marked the political end of the twentieth century are now being repeated in a new historical conjuncture, giving rise to new forms of transnational solidarity that can challenge dominant global powers. This new paperback edition, which includes a new Preface by the author, is an excellent introduction to the work of one of the most influential political thinkers writing today and will be essential reading for anyone who wishes to understand the new forms of conflict and struggle that will shape the world in the twenty-first century.

A panoramic social history of hurricanes in the Caribbean The diverse cultures of the Caribbean have been shaped as much by hurricanes as they have by diplomacy, commerce, or the legacy of colonial rule. In this panoramic work of social history, Stuart Schwartz examines how Caribbean societies have responded to the dangers of hurricanes, and how these destructive storms have influenced the region's history, from the rise of plantations, to slavery and its abolition, to migrations, racial conflict, and war. Taking readers from the voyages of Columbus to the devastation of Hurricane Katrina, Schwartz looks at the ethical, political, and economic challenges that hurricanes posed to the Caribbean 's indigenous populations and the different European peoples who ventured to the New World to exploit its riches. He describes how the United States provided the model for responding to environmental threats when it emerged as a major power and began to exert its influence over the Caribbean in the nineteenth century, and how the region 's governments came to assume greater responsibilities for prevention and relief, efforts that by the end of the twentieth century were being questioned by free-market neoliberals. Schwartz sheds light on catastrophes like Katrina by

framing them within a long and contentious history of human interaction with the natural world. Spanning more than five centuries and drawing on extensive archival research in Europe and the Americas, *Sea of Storms* emphasizes the continuing role of race, social inequality, and economic ideology in the shaping of our responses to natural disaster.
