"A sweet, sexy read, featuring a couple that feels both true-

to-life and aspirational. " Kirkus Review, Starred Review American Angie Donovan has never wanted much. When you grow up getting bounced from foster home to foster home, you learn not to become attached to

anything, anyone, or any place. But it only took her two days to fall in love with Australia. With her visa clock ticking, surely she can fall in love with an Australian—and get hitched—in two months. Especially if he ' s as hot and funny as her next-

door neighbor... Jace Walters has never wanted much—except a bathroom he didn't have to share. The last cookie all to himself. And solitude. But when you grow up in a family of seven, you can kiss those things goodbye. He's finally living alone and working on his syndicated comic strip in privacy. Sure, his American neighbor is distractingly sexy and annoyingly nosy, but she'll be gone in a few months... Except now she's determined to find her perfect match by checking out every eligible male in the town, and her

choices are even more distracting. So why does it suddenly feel like he—and his obnoxious tight-knit family, and even these two wayward dogs—could be exactly what she needs? Each book in the Patterson's Bluff series is

Second Edition, recounts the sometimes sad, sometimes humorous, and nearly always unfortunate experiences of manufacturers, distributors, retailers, and individuals who have lost valuable merchandise, money, jewelry, or securities to criminal attacks. In most cases the losses occurred because there was a weak link: a vulnerability in the total security defense. The book presents in practical terms those weaknesses in physical security, alarm systems, or related security

procedures that, when blended together, result in vulnerability. In addition to analyzing these cases and identifying the key elements of vulnerability, remedies for curing the weakness are also offered. Other sections of this book deal with the application, strengths, and limitations of security equipment. For the most part, equipment is presented from the practical viewpoint—what a security device or system will do (or not do) and how it should be applied and operated, rather than the detail of

mechanical design, electrical circuitry, or laboratory theories. This book is written in layman's language and is intended to be read by people who supply, use, or need security services and equipment.

Although the book concerns electronics, there are no circuit diagrams. The whole emphasis is on how to apply electronics as an aid to security. In addition to how it works, guidance, case histories, anecdotes and examples of security problems are given from the viewpoints of

trainees, designers, surveyors, installers and users. The interests of the Police and methods of reducing false alarms are treated as paramount throughout.

This short work is written with clarity and vigour. It carefully distinguished some kinds of charismatic ally-inclined Christians from others. It poses questions with which every Church member is faced. Chantry's answers tally with those of the greatest leaders of the Church during the Christian centuries. From Psalm 85 he outlines the true character of revival, and closes the book

with material drawn from the Great Awakening of the 18th century.
