He has captured the imagination of people around the world, including those who thought they were "done with" Christianity. In ways no one could have expected and no one predicted, Pope Francis has become a living example of what it might mean to be a Christian in our time and place. The modern world was not ready for Pope Francis, but as has been demonstrated--in his travels to the United States and around the world, in his calls for mercy and defense of the vulnerable--Pope Francis was ready for the modern world. New World Pope: Pope Francis and the Future of the Church explores how Jorge Mario Bergoglio became Pope Francis--the ideas, experiences,

influences, and passions that have formed this pastor who has inspired, challenged, encouraged, and angered people worldwide. Ten experts from around the world--scholars, journalists, church leaders, and others--provide insights into the origins and trajectories of Pope Francis' vision and hopes for the Christian community in our day. Persons intrigued by Pope Francis will find deeper insights into his witness via this exploration of the roots and trajectories of his sense of Christian mission and discipleship.

While paratexts – among them headnotes, footnotes, or endnotes – have never been absent from American literature, the last two decades have seen an explosion of the phenomenon, including (mock) scholarly footnotes, to an extent that they seem to take over the text itself. In this Special Focus we shall attempt to find the reasons for this astonishing development. In our first (diachronic) section we shall explore such texts as might have fostered the present boom, from fictions by Edgar Allan Poe to Vladimir Nabokov to Mark Z. Danielewski. The second (synchronic) section, will concentrate on paratexts by David Foster Wallace, perhaps the “father” of the post-postmodern footnote, as well as those to be found in novels by Bennett Sims, Jennifer Egan and Junot Diaz, among others. It appears that, while paratexts definitely point to a high degree of self-reflexivity in the author, they equally draw attention to the textual and authorial functions of the works in which they exist. They can thus cause a reflection on the boundaries between genres like fiction, faction, and autobiography, as well as serving to highlight a host of pedagogical and social concerns that exist in the interstices between fiction and reality.

I suppressed what came naturally to me in my early years, but a pivotal moment in my mid-twenties opened a door to what lay dormant. The depth of knowledge that ensued began to snowball, leading me to predict global events and high-profile murder investigations. Each piece of information imparted in fractals, like pieces to a puzzle. And it was up to me to put the pieces together.

Education as Power

Over the past two decades, Austria has become one of the most R&D intensive economies among OECD countries and in the world, dedicating 3.1% of its GDP on R&D in 2016, the second highest

figure in the European Union. To fully harness this R&D capacity, Austrian innovation policy needs to put a stronger emphasis on efficiency in transforming R&D inputs into impacts. To achieve higher impacts, Austria also needs to steer its research and innovation system towards leadership excellence in global markets. This requires enhanced international attractiveness for top-level researchers and talent, and a conducive environment for highly innovative enterprises. Austria could also benefit from strengthening R&D and innovation to support key transitions, such as digitalisation and Industry 4.0, and to tackle key societal challenges. The STI policy mix and governance arrangements should be adapted accordingly.
