The basic structure of the EOS Rebel T8i/850D camera is similar to that of its predecessor model EOS Rebel T6i. This camera has a 24 Megapixel APS-C sensor. The new generation sensor with a dual-chip can capture very good images in high-contrast conditions. Due to the presence of the Dual-Chip CMOS AF sensor, it is much faster and has a much larger coverage area. It is possible to make some good photos by using the Dual-Chip CMOS AF sensor. In the photos captured in low light, it is possible to see a very bright bokeh effect. Also, it has better autofocus ability than the EOS Rebel T6i. The maximum ISO can be set up to 16000 and the range of ISO 100-32000. Its electronic shutter is faster than the EOS Rebel T6i. It has a new AF algorithm that makes it possible to track the subject with very little user effort. The camera can also shoot videos in 4K resolution at 30 frames per second. The previous model EOS Rebel T6i can shoot videos only in HD resolution. This camera features a Live View Finder, which can display what is in the viewfinder on the screen. The screen can be tilted up and down from the right side of the camera. The built-in pop-up flash can be attached to the camera to allow users to click portraits with no flash.
