Code of Federal Regulations Frontiers of Science and Technology Winner, 2010 Phyllis Goodhart Gordan Book Prize, the Renaissance Society of America 2009 Outstanding Academic Title, Choice Honorable Mention, Economics, 2009 PROSE Awards, Professional and Scholarly Publishing division of the Association of American Publishers Richard A. Goldthwaite, a leading economic historian of the Italian Renaissance, has spent his career studying the Florentine economy. In this magisterial work, Goldthwaite brings together a lifetime of research and insight on the subject, clarifying and explaining the complex workings of Florence's commercial, banking, and artisan sectors. Florence was one of the most industrialized cities in medieval Europe, thanks to its thriving textile industries. The importation of raw materials and the exportation of finished cloth necessitated the creation of commercial and banking practices that extended far beyond Florence's boundaries. Part I situates Florence within this wider international context and describes the commercial and banking networks through which the city's merchant-bankers operated. Part II focuses on the urban economy of Florence itself, including various industries, merchants, artisans, and investors. It also evaluates the role of government in the economy, the relationship of the urban economy to the region, and the distribution of wealth throughout the society. While political, social, and cultural histories of Florence abound, none focuses solely on the economic history of the city. The Economy of Renaissance Florence offers both a systematic description of the city's major economic activities and a comprehensive overview of its economic development from the late Middle Ages through the Renaissance to 1600.

Manual of Classification Sovereignty Education and Defense Ministry (SEDM)

This authoritative clinical reference and text--now revised and updated with 50% new content--presents the assessment tools and strategies that every evidence-based psychotherapy practitioner needs. Unlike most assessment texts, the volume is organized around specific clinical problems. It explains how to select and use the best measures to assess clients' symptoms, generate diagnoses, plan appropriate treatments, and monitor progress. Clinician- and student-friendly features include tables comparing and contrasting

relevant measures, sample forms, and case examples. Every chapter addresses considerations for primary and managed care settings. New to This Edition \*Chapters on new topics: assessment of well-being and transdiagnostic assessment. \*New chapters on core topics: eating disorders, personality disorders, and insomnia. \*Updated throughout with DSM-5 diagnostic changes, new and updated instruments, current research, and increased attention to transdiagnostic concerns. \*Expanded coverage of obsessive-compulsive and related disorders. See also Clinical Handbook of Psychological Disorders, Sixth Edition, edited by David H. Barlow, which presents evidence-based treatments step by step.

A General Catalog of Books Offered to the Public at the Affixed Prices David Van Leeuwen
