A. Goldthwaite, a leading
economic historian of the
Italian Renaissance, has spent
his career studying the
Florentine economy. In this
magisterial work, Goldthwaite
brings together a lifetime of
research and insight on the
subject, clarifying and
explaining the complex
workings of Florence ' s
commercial, banking, and
artisan sectors. Florence was
one of the most industrialized
cities in medieval Europe,
thanks to its thriving textile

industries. The importation of raw materials and the exportation of finished cloth necessitated the creation of commercial and banking practices that extended far beyond Florence's boundaries. Part I situates Florence within this wider international context and describes the commercial and banking networks through which the city's merchant-bankers operated. Part II focuses on the urban economy of Florence itself, including various industries, merchants, artisans, and investors. It also evaluates the role of government in the economy, the relationship of the urban economy to the region, and the distribution of wealth throughout the society. While political, social, and cultural histories of Florence abound, none focuses solely on the economic history of the city. The Economy of Renaissance Florence offers both a systematic description of the city's major economic activities and a comprehensive overview of its economic development from the late Middle Ages through the Renaissance to 1600. Manual of Patent Examining Procedure Walter de Gruyter GmbH & Co KG This book provides in-

depth knowledge of clinical pathology in a question and answer format and discusses procedures and methods of laboratory investigations along with interpretation and analysis of diagnostic data. Also includes new chapter on Quality Control procedures and principles, Investigations of Anaemia, Investigations of Urinary tract infection and Investigations of Reproductive tract infection.
