Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. Australia's military consistently punches above its weight, and its approach to leadership is the key to its success. Developed over a century ago by fusing national values with battlefield imperatives, its approach has been fine-tuned over generations. It is now an adaptable and egalitarian leadership culture that ticks all the boxes for best practice. The military assumes no-one is born a natural leader, and that good training makes good leaders. Drawing on his own long military career and defence training programs, and on research, Nick Jans has identified the core principles of this consistently successful approach to leadership. These '3Rs' are the leadership skills which generate loyalty and commitment at an operational level, and they are just as successful in everyday team management as they are in the field.

Leadership Secrets of the Australian Army includes real stories from the field and from workplaces, from everyday employees and from well-known leaders. It shows how you too can become a leader your team can believe in, and-equally importantly-how you can help them believe in themselves. 'Read it and be wise.' Lieutenant General David Morrison, AO
