The wines of Bordeaux are universally recognized as being among the finest in the world and in this fully revised and updated edition of his classic text, renowned wine expert Stephen Brook provides an unrivalled survey of the region and its wines. The Complete Bordeaux offers detailed information on the many communes and appellations of Bordeaux along with descriptions and assessments of all its major properties. As well as incisive portraits of the leading properties and their produce, Stephen Brook provides a detailed look at Bordeaux's lesser-known areas and chateaux. There is also an invaluable vintage guide to the last four decades. Bordeaux encapsulates an incredible 13,000 wineries throughout 54 appellations and this book includes a thorough explanation of Bordeaux's history, terroir and winemaking styles. Praise for the third edition: "A fresh and authoritative addition to the Bordeaux library." Eric Asimov, The New York Times "This new edition is the ultimate guide to perhaps the greatest wine area in the world. Whether you use the book in your local wine store or tote it on a journey to Bordeaux itself, this book is definitive. And magnificent." Huffington Post

New Ways of Organizing Work offers a broader understanding of changes to the way work is organized and the implications for relevant stakeholders. It brings together contributions from a well established group of international scholars to examine the nature and consequences of new ways of working. The book draws on studies of a variety of new forms of work, involving a diverse range of employees and drawing on experiences in a variety of countries. It includes three main empirical sections. The first focuses on different forms of work and working arrangements, stimulated by the use of technology, increased competitive pressure and media portrayal of work and working. In contrast to much other work in the field, a strong theme of this book is individuals' experiences of new ways of working. The second empirical section examines this theme with a specific focus on remote workers and their responses to new ways of working. Exploring contemporary trends towards increasing use of global teams, the third section examines the implications of distributed teams and the challenges for managing performance and knowledge transfer.

This book deals with the current crises from a somewhat different the usual perspectives. It claims that causes and policy implications of these crises cannot be properly assessed by focusing on allocative efficiency or income growth alone; it requires a more general approach, based on social costs. It does not deal with social costs according to the Pigouvian or the Coasian traditions. It draws on the work of Original Institutional Economics (OIE) such as Thorstein Veblen, Karl William Kapp, and Karl Polanyi, on Post-Keynesians such as Hyman Minsky and, in general, on authors who have provided insights beyond the conventional wisdom of economic thought.
