"Developments in Computer-Integrated Manufacturing" arose from the joint work of members of the IFIP-Working Group 5.3 - Discrete Manufacturing, and other IFIP members. Within the Technical Committee 5 of the International Federation of Information Processing (IFIP) the aim of this Working Group is the advancement of computers and their application to the field of discrete part manufacturing. Capabilities will be expanded in the general areas of planning, selection, and con trol of manufacturing equipment and systems. Tools for problem solution include: mathematics, geometry, algorithms, computer techniques, and manufacturing technology. This technology will influence many industries - machine tool, auto mation, aircraft, appliance, and electronics, to name but a few. The Working Group undertook the following specific tasks: 1. To maintain liaison with other national and international organizations work ing in the same field, cooperating with them whenever desirable to further the common goal 2. To be responsible for the IFIP's work in organizing and presenting the PRO LAMA T Conferences 3. To conduct other working conferences and symposia as deemed appropriate in furthering its mission 4. To develop and sponsor research and industrial and social studies into the various aspects of its mission. The book can be regarded as an attempt to underline the main aspects of techno logy from the point of view of its software and hardware realization. Because of limitations in size and the availability of literature, the problems of robotics and quality control are not described in detail.

The British National Bibliography Springer Science & Business Media

This book provides a synthesis of recent developments in Axiomatic Design theory and its application in large complex systems. Introductory chapters provide concise tutorial materials for graduate students and new practitioners, presenting the fundamentals of Axiomatic Design and relating its key concepts to those of model-based systems engineering. A mathematical exposition of design axioms is also provided. The main body of the book, which represents a concentrated treatment of several applications, is divided into three parts covering work on: complex products;

buildings; and manufacturing systems. The book shows how design work in these areas can benefit from the scientific and systematic underpinning provided by Axiomatic Design, and in so doing effectively combines the state of the art in design research with practice. All contributions were written by an international group of leading proponents of Axiomatic Design. The book concludes with a call to action motivating further research into the engineering design of large complex systems.

With a blue and white striped roof for the cabrio and a panoramic roof for the hatchback the Dolcevita stands out from the crowd. Its hybrid technology is emphasised on the exterior with a hybrid badge on the rear and some unique detailing including chrome finishing on the bonnet and mirror caps. The Fiat 500 Dolcevita exudes elegance with the Bossa Nova White paint and an alternating red and white stripe which enhances the distinctive 500 silhouette. Finished off with 16" white painted alloy wheels with a diamond finish; the 500 Dolcevita Hybrid is ready to take to the roads. Inspired by the beach, the interior is stylish and comfortable showcasing exclusive seats in Ivory Frau leather with a wicker like centre in techno fabric which is enhanced by red piping and the '500' red logo. Style meets technology in the Fiat 500 Dolcevita Hybrid, with its innovative 7" HD touchscreen display with Uconnect™. Compatible with the latest Apple CarPlay and Android Auto, you can manage your own music, maps and apps keeping your focus on the road. The Mild Hybrid engine is available in a 1.0L, 70hp with a 6-speed manual transmission; reaching a top speed of 104mph, achieving up to 53.5mpg (l/100km), and releasing 119 CO2 emissions. The mild hybrid system assists the acceleration to improve responsiveness and allows for a smoother and quicker engine restart during the Start&Stop phase. The E-assist function supports the acceleration; the E-Coasting and E-Breaking functions mean you do not need to recharge the lithium battery as it will recharge itself during deceleration and braking. The Fiat 500 Dolcevita Hybrid is not just about the looks!
