Social exclusion attempts to make sense out of multiple deprivations and inequities experienced by people and areas, and the reinforcing effects of reduced participation, consumption, mobility, access, integration, influence and recognition. This book works from a multidisciplinary approach across health, welfare, and education, linking practice and research in order to improve our understanding of the processes that foster exclusion and how to prevent it. Theorising Social Exclusion first reviews and reflects upon existing thinking, literature and research into social exclusion and social connectedness, outlining an integrated theory of social exclusion across dimensions of social action and along pathways of social processes. A series of commissioned chapters then develop and illustrate the theory by addressing the machinery of social exclusion and connectedness, the pathways towards exclusion and, finally, experiences of exclusion and connection. This innovative book takes a truly multidisciplinary approach and focuses on the often-neglected cultural and social aspects of exclusion. It will be of interest to academics in fields of public health, health promotion, social work, community development, disability studies, occupational therapy, policy, sociology, politics, and environment.

What would you do if you discovered your whole life to be a lie? Daniel Henstock thinks he's an ordinary schoolboy but on his sixteenth birthday his world is turned upside down. He is the world's first one-hundred percent genetically-engineered human - assigned the codename Tiberius - and Gregory Dryden, the man responsible, wants him back so that he can continue his deadly experiments. Running for his life, Daniel flees to New York and is forced to go 'off-grid'. In this near-future America, where the security-obsessed authorities require citizens to carry DNA cards, Daniel meets the feisty and beautiful Eleanor. But by falling for her, Daniel also puts her in terrible danger. Daniel pursues the facts about his origins but is hunted by an agent sent by Dryden to bring him to heel. Can Daniel find out the truth whilst trying to evade those who think they own him? As his enemies close in Daniel must draw on resources he never knew he had to win his freedom - but in doing so he may be walking into a deadly trap ... TIBERIUS FOUND is the first instalment in a thrilling series - The Emperor Initiative - that introduces an engaging new hero that will appeal to fans of Alex Rider and Jason Bourne.

First shown as the TT coupe concept at the 1995 Frankfurt Motor Show and then soon afterward as the TT convertible at the Tokyo Motor Show, the cars heralded a new design language from Audi - the Bauhaus style from the 1930s that looked a little brutal at first, but has proven to have a long and successful production life. It finally arrived on the European market for the 1999 model year, with America following a little later. Senior Audi models, the A4, A6, and A8, have their engine and transmission sited longitudinally in the car, but the TT was based on the smaller A3 platform, which meant that the mechanical components were sited transversely. After a slow start, sales picked up and have remained strong ever since. The media loved the Audi TT and continued to write glowing reports about it even though it was six years old in the marketplace, outlasting the Mercedes-Benz SLK, BMW Z3, and Porsche Boxster by quite some time.
