is profitable. It's a
lost virtue in our
culture today. There
is so much craze for
wealth because
people are no more

patient. Armed
robbery, prostitution
or corruption, etc, for
example, are the
consequences of
impatience. The year
2017 is still young!
Prayers are being

going on. There is
excitement in the
spirit world because
the word
"EVIDENCE" is
being announced
worldwide over divine
megaphones. But you

must realize that there is always a time lag between the day you plant pineapple or apple seed and when you actually harvest the fruit from the full-grown tree. Every divine purpose delivers in stages and there is a time for every purpose on this earth including your own. Don't cage or hinder your destiny by seeking for shortcuts. If you dodge the process - patience, you will miss the product. Habakkuk 2:3 declares: "for the vision is yet for an appointed time; but at the end, it shall speak and not lie. Though it tarry (as the year progresses), wait for it; because it will surely come, it will not tarry." God is bigger than our biggest plans. He is working on your

behalf. You need patience to obtain this year. Don't compare yourself with others or look around negatively. God's calendar for you is not the same with your next-door neighbour. Patience mixed with praise and worship will shield you from avoidable mistakes. Meditate also, on Micah 7:7! Your year will end in peace and glory and there shall be EVIDENCE that you serve a living God. The fullness of any vision speaks only at the end. Wait! You will never end up in shame! Amen!

journey began at the age of 22 when she moved to Los Angeles from her hometown of St. Louis. With a theater degree in hand, she was determined, she was confident, she was ready to work hard. So, what could go wrong? Uh, basically everything. The path to being a professional actor was so much more vast and competitive than she'd imagined. It

would be either in those long years before she landed her iconic role on *The Office*, nearly a decade of frustration, struggle, rejection and doubt. If only she'd had a handbook for the aspiring actor. Or, better yet, someone to show her the way—an established actor who could educate her about the business, manage her expectations, and reassure

moments of despair. Jenna wants to be that person for you. With amusing candor and wit, Fischer spells out the nuts and bolts of getting established in the profession, based on her own memorable and hilarious experiences. She tells you how to get the right headshot, what to look for in representation, the importance of

joining forces with other like-minded artists and creating your own work—invaluable advice personally acquired from her many years of struggle. She provides helpful hints on how to be gutsy and take risks, the tricks to good auditioning and callbacks, and how not to fall for certain scams (auditions in a guy's apartment are probably not legit—or at

least not for the kind of part you're looking for!). Her inspiring, helpful guidance feels like a trusted friend who's made the journey, and has now returned to walk beside you, pointing out the pitfalls as you blaze your own path towards the life of a professional actor.

The car made "for the great multitude" (as Ford put it) first debuted in 1908 and proved so affordable and so popular that fifteen

million were sold through 1927. The "Tin Lizzie" was the first automobile to be mass-produced on moving assembly lines, and built using interchangeable parts. It proved tough and reliable in everyday use, and cheap enough to spawn the automobile revolution: the car cost \$850 in 1909 but amazingly by the 1920s, the price had dropped to a mere \$260 due to the

Autoworkers find themselves in a rapidly changing world as transnational corporations seek new forms of work organization and new boundaries for a North American auto industry. Inside the factory, management pursues new models of "lean production" that require

workers to produce more with less—less time, less support, less material—in an atmosphere of accelerated and intensified labor. Outside the factory, "freetrade" policies and regional investment strategies widen the reach of transnational corporations , creating

new opportunities in Mexico, Canada, and the U.S. for pitting worker against worker in a mutually destructive competition for jobs. In *Confronting Change*, researchers from a diverse range of universities and unions explore the impact of these changes on work and workers. The case studies

and analyses show the wide range of potential outcomes as workers struggle to become actors, rather than victims, in the emerging North American auto industry. **War Against Hama - 13** México Digital Comunicación S.A. de C.V.
