IPhone: The Missing Manual Springer
With some 280 colour illustrations, Introduction to Modern Design takes us on a visual survey of design from the Industrial Revolution of the eighteenth century to the Maker Movement of today. It offers a new understanding of the birth of modern design in the early twentieth century and chronicles the way its meaning has changed over the decades. The narrative is supported by twenty-six readings from significant texts by designers and critics, offering readers an opportunity to learn about design from those who created it and those who commented on it as it was done. The focus of this book is on the objects themselves-from industrial design, furniture, ceramics, textiles, graphics, electronics, to automobiles-and explores the development of these designs in relation to industrialization, technology, environmental responsibility, consumerism, individual needs, and the expression of the social values of their day. Clearly written and accessible, Introduction to Modern Design provides a succinct history of, and fascinating insights into, the world of design.

Euro-Par – the European Conference on Parallel Computing – is an international conference series dedicated to the promotion and advancement of all aspects of parallel computing. The major themes can be divided into the broad categories of hardware, software, algorithms, and applications for parallel computing. The objective of Euro-Par is to provide a forum within which to promote the dev- opment of parallel computing both as an industrial technique and an academic discipline, extending the frontiers of both the state of the art and the state of the practice. This is particularly important at a time when parallel computing is undergoing strong and sustained development and experiencing real ind- trial take up. The main audience for and participants in Euro-Par are seen as researchers in academic departments, government laboratories, and industrial organisations. Euro-Par aims to become the primary choice of such professionals for the presentation of new results in their speci?c areas. Euro-Par is also int- ested in applications that demonstrate the e?ectiveness of the main Euro-Par themes. Euro-Par has its own Internet domain with a permanent web site where the history of the conference series is described: http://www. euro-par. org. The Euro-Par conference series is sponsored by the Association of Computer Machinery and the International Federation of Information Processing. Euro-Par 2001 Euro-Par 2001 was organised by the University of Manchester and UMIST.

Achieve any cost goals in half the time and achieve stable production with quality designed in right-the-first-time. Design for Manufacturability: How to Use Concurrent Engineering to Rapidly Develop Low-Cost, High-Quality Products for Lean Production is still the definitive work on DFM. This second edition extends the proven methodology to the most advanced product development process with the addition of the following new, unique, and original topics, which have never been addressed previously. These topics show you how to: Cut cost from 1/2 to 1/10 in 9 categories—with ways to remove that much cost from product charges and pricing Commercialize innovation—starting with Manufacturable Research and learning from the new section on scalability, you will learn how to design products and processing equipment to quickly scale up to any needed demand or desired growth. Design product families that can be built "on-demand" in platform cells that also "mass customize" products to-order Make Lean production easier to implement with much more effective results while making build-to-order practical with spontaneous supply chains and eliminating forecasted inventory by including an updated chapter on "Designing Products for Lean Production" The author's 30 years of experience teaching companies DFM based on pre-class surveys and plant tours is the foundation of this most advanced design process. It includes incorporating dozens of proven DFM guidelines through

up-front concurrent-engineering teamwork that cuts the time to stable production in half and curtails change orders for ramps, rework, redesign, substituting cheaper parts, change orders to fix the changes, unstable design specs, part obsolescence, and late discovery of manufacturability issues at periodic design reviews. This second edition is for the whole product development community, including: Engineers who want to learn the most advanced DFM techniques Managers who want to lead the most advanced product development Project team leaders who want to immediately apply all the principles taught in this book in their own micro-climate Improvement leaders and champions who want to implement the above and ensure that the company can design products and versatile processing equipment for low-volume/high-mix product varieties Designing half to a tenth of cost categories can avoid substituting cheap parts, which degrades quality, and encourages standardization and spontaneous supply chains, which will encourage Lean initiatives. Using cellular manufacturing to shift production between lines for mixed production of platforms and build-to-order to offer the fastest order fulfillment can beat any competitors' delivery time.

Moody's Bank and Finance Manual "O'Reilly Media, Inc." Change management is a challenging and continuous process that requires a particular skill set for both leaders and managers. It is essential for leaders and change agents to understand and address the five most important questions: Why? What? Who? How? When? Inside, you'll learn the concept of change management, its impact on the company's business performance and sustainability, and the relevant issues associated with it. The author highlights the importance of sustainable development, including economic, environmental, and social elements and introduces different types of changes including planned, unplanned, incremental/marginal, transitional, and transformational ones. Various models of planned and unplanned changes are featured, including leaders as change agents; the concept of resistance, reasons, sources, and forms of resistance to change; definitions of values, attitudes, personalities, and perceptions of individuals; and how these determinants affect individuals' behaviors, attitudes, and responses toward organizational change. Several organizational examples are provided throughout the book to illustrate how high-performance organizations grow their business.

Design for Manufacturability "O'Reilly Media, Inc." This book is a sound and comprehensive introduction to advertising planning and branding. Intended for students of and beginners in advertising and marketing, it discusses key issues and market realities, many of which are ignored and neglected in developing markets. The structure of this book follows a stepwise process, which starts from the beginning of the advertising planning process to the end product, which is the creative brief. Each chapter discusses a conceptual principle, which is illustrated by relevant examples. Some key issues discussed in this book are: - planning for communication in a context; - Segmentation: studying and understanding the dimensions, demographics, and psychographics of the target group; - Differentiators and Motivators: discovering what can change the consumers' mind; " managing a brand over time, looking at the entire life-cycle of a brand. Each chapter ends with an 'Action Point', which helps the reader to apply the principles discussed through an exercise.

Where the fate of a company is on the line in a negotiation, legal and business teams must work seamlessly to reach a successful conclusion. Unfortunately, there's often a gap between lawyers, who are typically untrained in business strategy, and business executives, who lack basic knowledge of contract law and regulations. In Betting the Company: Complex Negotiation Strategies for Law and Business, Andrew Trask and Andrew DeGuire offer a thorough introduction to enable lawyers and business people to understand the theoretical concepts and to apply practical tools to conduct a successful, multi-faceted negotiation. The authors, both of whom have extensive experience conducting high-stakes negotiation, explain the different strategic considerations negotiators face, from the pressures on individuals representing a larger group to the difficulties that arise from clashes of corporate culture. They also discuss the specific challenges raised by negotiations that involve multiple parties, multiple issues, and take place over longer periods of time. Throughout this illuminating book, Trask and DeGuire provide concrete, practical advice on how best to guide companies through the most difficult negotiations.
