Um videogame é meio real: jogamos com regras reais enquanto imaginamos um mundo ficcional. Ganhamos ou perdemos o jogo no mundo real, mas matamos um dragão (por exemplo) somente no mundo do jogo. Neste instigante estudo, Jesper Juul examina a tensão constante entre regras e ficção nos videogames. Discutindo jogos desde Pong até The Legend of Zelda, desde xadrez até Grand Theft Auto, ele mostra como os videogames são tanto um ponto de partida para os jogos tradicionais não eletrônicos quanto um desenvolvimento a partir deles. O livro combina perspectivas de campos como literatura, teoria do cinema, ciência da computação, psicologia, teoria dos jogos da economia e estudos em videogame para traçar uma teoria sobre o que os videogames são, como atuam sobre o jogador, como se desenvolveram historicamente e por que são tão divertidos. Juul apresenta o modelo clássico de jogo, que descreve a construção tradicional dos jogos, e aponta para futuros desenvolvimentos. Ele examina como as regras oferecem desafios, aprendizado e prazer para os jogadores e como um jogo leva o jogador a imaginar seu mundo ficcional. O estilo vívido e eclético de Juul e os desdobramentos de suas fontes fazem de Half-Real uma obra de interesse para a mídia, a literatura e os estudiosos tanto quanto para os profissionais de videogame e os próprios gamers.

Se desarrolla un modelo de previsión específico para productos de alta implicación. El modelo utiliza las variables relacionadas con el comportamiento de los usuarios de consolas de videojuegos de sobremesa, siendo éste el producto seleccionado para realizar la investigación aplicada. En la tesis doctoral se analizan con profundidad todos los antecedentes relacionados con el tema de análisis: comportamiento del consumidor, y de forma específica de los jóvenes que utilizan el producto analizado; estudio exhaustivo de las características de dichos jóvenes; las consolas de videojuegos, su historia, modalidades, ventajas e inconvenientes; fundamentos de investigación, tanto desde el punto de vista de la investigación cualitativa como cuantitativa. La investigación aplicada consiste en una fase cualitativa con entrevistas en profundidad y una fase cuantitativa con encuestas, realizándose el análisis final con redes neuronales artificiales. El tema a estudiar en la tesis doctoral tiene un elevado grado de originalidad, ya que por una parte, se plantea un sistema predictivo para productos de alta implicación, cuando habitualmente este tipo de productos no son analizados de forma específica en los sistemas predictivos. Por otra parte, la aplicación se ha realizado sobre el mercado de las consolas de videojuegos, siendo éste un mercado poco analizado desde el punto de vista del marketing, y menos desde el área de la previsión. *PlayStation 2* CRC Press

"Game Feel" exposes "feel" as a hidden language in game design that no one has fully articulated yet. The language could be compared to the building blocks of music

(time signatures, chord progressions, verse) - no matter the instruments, style or time period - these building blocks come into play. Feel and sensation are similar building blocks where game design is concerned. They create the meta-sensation of involvement with a game. The understanding of how game designers create feel, and affect feel are only partially understood by most in the field and tends to be overlooked as a method or course of study, yet a game's feel is central to a game's success. This book brings the subject of feel to light by consolidating existing theories into a cohesive book. The book covers topics like the role of sound, ancillary indicators, the importance of metaphor, how people perceive things, and a brief history of feel in games. The associated web site contains a playset with ready-made tools to design feel in games, six key components to creating virtual sensation. There's a play palette too, so the designer can first experience the importance of that component by altering variables and feeling the results. The playset allows the reader to experience each of the sensations described in the book, and then allows them to apply them to their own projects. Creating game feel without having to program, essentially. The final version of the playset will have enough flexibility that the reader will be able to use it as a companion to the exercises in the book, working through each one to create the feel described.

All-New PlayStation 5 User Guide, Newbie to Expert in 2 Hours Editora Blucher

The tenth-anniversary edition of a foundational text in digital media and learning, examining new media practices that range from podcasting to online romantic breakups. Hanging Out, Messing Around, and Geeking Out, first published in 2009, has become a foundational text in the field of digital media and learning. Reporting on an ambitious three-year ethnographic investigation into how young people live and learn with new media in varied settings—at home, in after-school programs, and in online spaces—it presents a flexible and useful framework for understanding the ways that young people engage with and through online platforms: hanging out, messing around, and geeking out, otherwise known as HOMAGO. Integrating twenty-three case studies—which include Harry Potter podcasting, video-game playing, music sharing, and online romantic breakups—in a unique collaborative authorship style, Hanging Out, Messing Around, and Geeking Out combines in-depth descriptions of specific group dynamics with conceptual analysis. Since its original publication, digital learning labs in libraries and museums around the country have been designed around the HOMAGO mode and educators have created HOMAGO guidebooks and toolkits. This tenth-anniversary edition features a new introduction by Mizuko Ito and Heather Horst that discusses how digital youth culture evolved in the intervening decade, and looks at how HOMAGO has been put into practice. This book was written as a collaborative effort by members of the Digital Youth Project, a three-year research effort funded by the John D. and Catherine T. MacArthur Foundation and conducted at the University of California, Berkeley, and the University of Southern California.
