"Siblings Bob and Tom get a dog with spots. This A-level story uses decodable text to raise confidence in early readers. The

book uses a combination of sight words and short-vowel words in repetition to build recognition.

Original illustrations help guide readers through the text."--

Proceedings of the SEAC 98 Meeting, Dublin, Ireland, September 1998

ESCO Press

This text describes the functions that the BIOS controls and how these relate to the hardware in a PC. It covers the CMOS and chipset set-up options found in most common modern BIOSs.

It also

features tables listing error codes needed to troubleshoot problems caused by the BIOS.

In order to perform these tasks properly, and in a safe manner, technicians need to understand the theory behind them,</p>	<p>having a working knowledge of the equipment and tools used, and employ accepted industry best practices. This e-book walks through each step of both tasks, while covering safety, theory, and application. Also covered are leak detection methods and filter drier use. System Recovery and Evacuation was written by HVACR instructors</p>
---	---	--

for HVACR instructors to provide sound, relevant information in a single source. This e-book provides students and practicing technicians with the information and knowledge necessary to understand refrigerant recovery, system evacuation, leak detection, and filter driers. It is full of color illustrations and includes worksheets

that provide students and practicing technicians with the information and knowledge necessary to accurately and safely install or service air conditioning and refrigeration systems. The end of the e-book contains fill-in-the-blank questions that review the content of the entire manual.

scientists,
and others
interested
in
visualizing
data, this
book
presents a

unique foundation for producing almost every quantitative graphic found in scientific journals, newspapers, statistical packages, and data visualizatio n systems. It was designed for a distributed computing environment, with special attention given to conserving computer code and	system resources. While the tangible result of this work is a Java production graphics library, the text focuses on the deep structures involved in producing quantitative graphics from data. It investigates the rules that underlie pie charts, bar charts, scatterplots , function plots, maps,	mosaics, and radar charts. These rules are abstracted from the work of Bertin, Cleveland, Kosslyn, MacEachren, Pinker, Tufte, Tukey, Tobler, and other theorists of quantitative graphics.
