Corporate Social Responsibility: Failures in the Oil Industry directly challenges the oil industry's claims of corporate good citizenship, now widely advanced as part of a global public relations initiative. The volume spans the industry's reach, from the troubled waters of the UK offshore Continental Shelf, with its horrendous legacy of the Piper Alpha oil rig disaster, to the inhospitable shores of Newfoundland with its own tragic legacy of lost lives; to the new frontier of oil corporate colonialism in the former Soviet Union and the icy plains of Alaska. The central theme of violations of basic labour rights and of health and environmental protection standards will make uncomfortable reading in the boardroom. It is equally essential reading for those who seek to improve the position of workers and industries within the oil industry's global reach.

For courses in engineering and economics Comprehensively blends engineering concepts with economic theory Contemporary Engineering Economics teaches engineers how to make smart financial decisions in an effort to create economical products. As design and manufacturing become an integral part of engineers' work, they are required to make more and more decisions regarding money. The 6th Edition helps students think like the 21st century engineer who is able to incorporate elements of science, engineering, design, and economics into his or her products. This text comprehensively integrates economic theory with principles of engineering, helping students build sound skills in financial project analysis. This compilation of poems is rolled out as one long poem which spans the journey

of the spiritual growth of an adulterous woman in a nation spinning, while facing unspeakable adversity with grace and love. It also deals with individual spiritual growth and transferring love from a man to God, and also with National Politics in the USA and the threat of ISIS. It is not only poetry, but also draws influence from "Spoken Word" traditions. In the Afterword you will find a treasure of a Christian Testimony in the form of another Poem by Jamie Wyatt. "Dearest friends, for a long time I was in a place where my exterior circumstances controlled me internally, and I was miserable, not only because it wasn't I who had control, but also because those external circumstances were being imposed against my will, and like everyone else, I blamed it on our President (reminds me of Pink's song, "Mr. President," which was for a different Administration). Eventually, I started opening my mind to the possibility that if the good Lord had permitted so and so to happen, despite intercessory prayer, there was a reason for it and it was His Will. I still didn't like it; so, He opened up the heavens and showed me a little piece of His masterpiece here on earth- He let me see the grid and aliens and bad stuff too: I see ISIS for who they are. Then I realized, I'm just a little spec of sand on the map of time, in one universe, and if I could do some good to at least one other little spec of sand or two - that would probably be enough, and if there was some way the good Lord could use even my suffering and frustration, He would use it for at least my own benefit and someone else's. God is great and nothing is wasted! So no matter what you're going through, know that God will somehow turn it to good in due time. Relish the fight! But love will get you peace. Blessings, hugs and warm thoughts to you and yours! God bless us and God bless the USA!" -Audrey Andujar WrightSample

Winning Ways through Corporate Governance

Sections: First steps and basic terms -- Basic building -- Painting -- Painting techniques.

The Delta Wing

The motivation for writing this book is the authors' deeply held conviction that good governance is an essential element for any organisation that wishes to maximise its effectiveness. They are not alone in observing that in many cases companies or other organisations that perform badly are often poorly governed. Indeed, the key explanation for poor performance is often poor governance. This observation is not limited geographically and there are many examples from around the world. Concern with good governance is not just limited to the free enterprise system. It is universal.
