Living Between the Cracks is D'Angelo's first new series. Book 1, *Between the Cracks*, follows the first thirty years of the unusual life of Grace MacGregor who decides at age five she wants to be a saint so she can float up and check out what's beyond the blue sky. Grace attends Catholic School and is enamoured with the romance of being the Bride of Christ as well as studying to become a missionary doctor in Africa. She is also obsessed with wanting to know about sex. Under spiritual duress, Grace leaves the nunnery and marries the first man she sleeps with. Ten years later she finds herself divorced with sole custody of five children and no financial support. Grace temporarily moves everyone to an island in the Caribbean to clear her head with the intent of emigrating to New Zealand. When she returns to Canada to apply for their passports, her life takes an unusual turn. To most who meet her, Grace is a warm, intelligent, and generous woman, albeit somewhat unconventional. Very few know that Grace has certain gifts; she often finds herself living between the cracks-the cracks between time and space. She lives centuries forward and backward, travels through unknown universes and often disappears and lives full lives - some in parallel universes, some not always human - and then she is back, right here, right now. The wrinkles in time that Grace falls into at the oddest moments fuel her, fill her, and emboldened her to persevere. Nothing in her outward life changes; however, in her mind, everything changes. Hold on to your hats as this endearing and often funny protagonist takes you beyond what we consider normal. D'Angelo's series, *Living Between the Cracks*, takes us on an adventure where we begin to question what is real and what is an illusion, and does it really matter as you get totally involved in Grace's life as she makes a heroic effort to embrace being full of grace. In this coming-of-age novel, a young woman grapples with faith and unusual powers. Bradley's bildungsroman tells the story of Grace MacGregor. A brief prologue informs readers of Grace's gifts, which include sensing someone's past and future and even traveling through time. Grace's first-person narration is a detailed and largely realistic depiction of growing up after the Depression. This series opener is a treasure trove of details and vivid characters. Grace certainly has intriguing abilities. Bradley has a keen eye for detail. The novel's main achievement is Grace, whose unusual powers mirror her strange temperament. The author skillfully captures the earnestness and innocence of Grace's divine aspirations. "Please God, I didn't mean to laugh at them," she prays, when a pool hall proprietress falls on top of a priest. "Hope this doesn't ruin things as I study to be a saint?" Moving through the years, Bradley's chronicle reveals the youthful impatience to mature and be important but pauses here and there to sketch indelible portraits of human triumph and tragedy. A rich, evocative tale of growing up in Canada. Kirkus Review

En este libro analizaremos los usos fotograficos y sus funciones sociales como elementos comunicativos, veremos los principales proyectos fotograficos y estudiaremos la realizacion de imagenes para la transmision de conocimiento y sensaciones hipervisuales. Veremos como se interpretan las imagenes fijas en el mundo contemporaneo para saber llevar a cabo un trabajo fotografico propio, original y guiado. Decia Henri Cartier-Bresson que fotografiar es colocar la cabeza, el ojo y el corazon en un mismo eje. "Rondaba por las calles todo el dia y me sentia afilado y listo para dar el salto, estaba

decidido a 'coger la vida con el lazo' - a preservarla en el propio acto de vivirla. Sobre todo, ansiaba captar toda la esencia, en el cuadro de una única fotografía, de alguna situación que estuviera en el proceso de desarrollarse delante de mis ojos" Henri Cartier-Bresson (1908-2004).

"This is not the typical "question-answer-question-answer" text-only format. This book is often referred to as the 'Cliffs Notes' for the private pilot checkride. This is the prep and study guide that will help you ace your checkride! Most material is presented in easy-to-flashcard and memorize charts, diagrams and mnemonics. The book begins by outlining the steps to take prior to your checkride under the latest ACS including hours, training, required logbook endorsements, and then explains the rest of the exam procedure which concludes with the debriefing. The study guide then goes into greater detail for each anticipated area of the checkride including: 1. checklists to memorize (and those not to memorize); 2. airspace and VFR minimums; 3. weather (reports, clouds, winds aloft, pressure systems, thunderstorms, the GFA weather chart website, types of fog, etc.), 4. navigation, including: types of navigation, lost procedures, VOR navigation, useful websites, NOTAMs, step-by-step instructions for completing a full navigation log, etc.); 5. safety & wellness (common in-flight sicknesses, rules for scuba divers, in-depth explanation of sensory illusions, etc.); 6. airport signs (including marshaling signals and a complete color runway diagram, etc.); 7. documents & inspections (learn an easier way to remember "TOMATOFLAMES"); 8. performance (including an explanation of leaning, and detonation vs. pre-ignition); 9. communications (towered airports, airspace transitions, calling FSS from an RCO, Class C procedure, activating flight plans, requesting flight following, etc.); 10. passenger briefing (including a sample briefing for your knee board); 11. maneuvers, takeoffs & landings (including a one-page maneuver reference card, plus a one-page list of all ACS maneuvers, takeoffs, landings, etc. which should be used during your final 3 hours of exam training with your CFI); 12. special emphasis areas (although they are now incorporated into the ACS, you should still be familiar with these areas because they are inherently tested throughout the exam) There is also a quick-reference flow chart for the risk management expectations; 13. the "other things to study" chapter is chock-full of the miscellaneous areas that you will be expected to know such as airspeeds, altitudes, stall/spin awareness & recovery,

carb icing, slips, lapse rates, V-speeds, unusual attitude recovery, SVFR, pitotstatic system, left-turn tendencies, a detailed engine diagram with fourteen questions you should be able to answer, and much more; 14. select FAR/AIM summaries (the select rules you should be most familiar with); 15. three full-color sectional chart quizzes (with answer keys); 16. a chapter on "going the extra mile" and finally a detailed list of what should (probably) be in your flight bag. You will notice that this book is not hundreds of pages, nor is it priced as high as other books on this topic. The length is purposefully limited because you cannot effectively study and memorize hundreds of pages prior to your practical test. In addition, the size is such that you can easily take it with you wherever you go and study when time permits." -- Amazon.com.

Snatched From My Mother . Animals and birds are not an accident .They are creatures of God who were put on earth just like human beings .God had them in mind when he planned the creation of the universe . They have a right to exist in this world just like any human being .The problem is that sometimes men forget this . Instead of believing that cats , dogs and other animals are in the wrong place , these people should start thinking seriously about God ; their creator ; His wishes and His reasons for creating such animals . Man and Animal were created by God and for God . Unless Man realizes this ,life is worthless . Stories such as Titi's should be unheard of . This story should be a lesson to mankind and should teach Man compassion and love for animals . Pets are members of the family and have a right to be treated with love , care and respect . On August 25, 1974, along the Rio Grande River near the Texas border town of Presidio, a thunderous explosion in the sky shattered the stillness of the warm summer night. An unidentified flying disc traveling at 2,000 miles per hour collided with a small airplane heading south from El Paso, Texas. The flaming wreckage of both aircraft fell to the Mexican desert below, igniting a desperate race by two governments to recover technology from beyond the stars. This book was the basis for an episode of the History Channel's "UFO Hunters" television series. REVIEWS: "Amazing! This story is wilder than the U.S. Roswell. This book is an amazing piece of work." - George Noory, Coast to Coast AM. "A very nice and thorough job." Jim Marrs, Bestselling Author. "Noe and Ruben are to be commended." - Stanton T.
