"This collection of essays once again shows that Greg Johnson is a major figure in the movement promoting explicit White identities and interests. These essays are consistently insightful, beautifully and clearly written, and rigorously argued. Reading them, I am continually impressed by how Greg is able to make difficult issues simple and understandable, to the point that a lot of readers will be asking themselves why they have taken so long to realize the dire straits that Whites and their civilization are in. Greg's intellectual confidence is infectious to the point that I suspect quite a few readers will come away thinking that the points he is making are not

only true, but are obviously true. This book should be distributed far and wide to the converted and unconverted alike. College students, inundated as they are by cultural Marxism, would particularly benefit. The unconverted will sputter with hostility as they begin reading, but I suspect that many will come away with a completely altered worldview." -Kevin MacDonald, author of *The Culture of Critique*

The second edition of a unique introductory text, offering an account of the logical tradition in philosophy and its influence on contemporary scientific disciplines. *Thinking Things Through* offers a broad, historical, and rigorous introduction to the logical tradition in philosophy and its contemporary significance. It is unique among introductory philosophy texts in that it considers both the historical development and modern fruition of a few central questions. It traces the influence of philosophical ideas and arguments on modern logic, statistics, decision theory, computer science, cognitive science, and public policy. The text offers an account of the history of speculation and argument, and the development of theories of deductive and probabilistic reasoning. It considers whether and how new knowledge of the world is possible at all, investigates rational decision making and causality, explores the nature of mind, and considers ethical theories. Suggestions for reading, both historical and contemporary, accompany most chapters. This second edition includes four new chapters, on decision theory and causal relations, moral and political theories, “moral tools”

such as game theory and voting theory, and ethical theories and their relation to real-world issues. Examples have been updated throughout, and some new material has been added. It is suitable for use in advanced undergraduate and beginning graduate classes in philosophy, and as an ancillary text for students in computer science and the natural sciences.

Australia's military consistently punches above its weight, and its approach to leadership is the key to its success. Developed over a century ago by fusing national values with battlefield imperatives, its approach has been fine-tuned over generations. It is now an adaptable and egalitarian leadership culture that ticks all the boxes for best practice. The military assumes no-one is born a natural leader, and that good training makes good leaders. Drawing on his own long military career and defence training programs, and on research, Nick Jans has identified the core principles of this consistently successful approach to leadership. These '3Rs' are the leadership skills which generate loyalty and commitment at an operational level, and they are just as successful in everyday team management as they are in the field. *Leadership Secrets of the Australian Army* includes real stories from the field and from

workplaces, from everyday employees and from well-known leaders. It shows how you too can become a leader your team can believe in, and equally importantly-how you can help them believe in themselves. 'Read it and be wise.' Lieutenant General David Morrison, AO

New Jersey Mob: Memories of a Top Cop By Bob Buccino  
Bob Buccino worked in law enforcement for fifty-one years; twenty-four of which were spent investigating organized crime. He is a superior court recognized expert on the Cosa Nostra. He tells his story in three parts: The first is about growing up in Orange, New Jersey, where he was a wannabe admiring the local mob guys. He was a street tough, extorting money from his classmates, running his own bookmaking operation, and

wanting to be a mob guy. In 1957, drugs hit the streets of Orange and several friends of Buccino died from Heroin overdoses. Buccino married his childhood sweetheart and they had a baby boy. He came to his senses about the mob and broke away from it. He became a working stiff, not getting anywhere with his life. One day, he saw an article in the newspaper announcing testing for state troopers. He took the test, passed, and became a trooper, changing his life forever. The second part of his book is about his often very humorous uniform days as a state trooper. During this time, Anthony "Tumac" Acceturo, a young tough that Buccino grew up with, was beginning his career in the Cosa Nostra. He and Buccino were running parallel lives. When Buccino got transferred off of the uniform division and began his career investigating the Cosa Nostra, Anthony was working for the mob. In the third part of his book, Buccino writes about his success in dismantling the mob in New Jersey, telling about the many arrests and convictions of its mob bosses, including the prosecutions of the high ranking bosses of the

Gambino, Lucchese, Bruno, DeCavalcante, and Genovese crime families. He also writes of the arrest and conviction of his childhood friend Anthony "Tumac" Acceturo while he was the deputy chief in the Division of Criminal Justice in charge of the New Jersey Statewide Organized Crime Task Force.
