The International Conference on Intelligent Computing (ICIC) was formed to provide an annual forum dedicated to the emerging and challenging topics in artificial intelligence, machine learning, bioinformatics, and computational biology, etc. It aims to bring together researchers and practitioners from both academia and industry to share ideas, problems, and solutions related to the multifaceted aspects of intelligent computing. ICIC 2009, held in Ulsan, Korea, September 16-19, 2009, constituted the 5th International Conference on Intelligent Computing. It built upon the success of ICIC 2008, ICIC 2007, ICIC 2006, and ICIC 2005 held in Shanghai, Qingdao, Kunming, and Hefei, China, 2008, 2007, 2006, and 2005, respectively. This year, the conference concentrated mainly on the theories and methodologies as well as the emerging applications of intelligent computing. Its aim was to unify the picture of contemporary intelligent computing techniques as an integral concept that highlights the trends in advanced computational intelligence and bridges theoretical research with applications. Therefore, the theme for this conference was "Emerging Intelligent Computing Technology and Applications." Papers focusing on this theme were solicited, addressing theories, methodologies, and applications in science and technology.

Nel volume 31.2 sono pubblicati gli Atti di due Convegni internazionali. Il primo, "Milano internazionale: la fragilità territoriale dei contesti archeologici" (Milano, 13 marzo 2019), promosso dal Dipartimento di Beni Culturali e Ambientali dell'Università degli Studi di Milano e dal Dipartimento di Architettura e Studi Urbani del Politecnico di Milano, è a cura di G. Bagnasco Gianni, S. Bortolotto, A. Garzulino e M. Marzullo. Il secondo, "Logic and computing. The underlying basis of digital archaeology", è una sessione speciale dell'IMEKO TC-4 International Conference on Metrology for Archaeology and Cultural Heritage (MetroArcheo, Firenze, 4-6 dicembre 2019), a cura di A. Caravale e P. Moscati. Gli

Atti raccolgono rispettivamente 9 e 15 contributi, introdotti dai curatori che illustrano scopi e risultati delle ricerche presentate, in cui l'uso delle tecnologie informatiche è determinante per l'analisi, l'interpretazione e la diffusione e valorizzazione dei dati. La prospettiva diacronica della sessione dedicata al calcolo e alla logica nella storia dell'informatica archeologica consente di collegare, attraverso un ponte teorico-metodologico, le prime esperienze di informatizzazione dei dati archeologici con le tendenze più recenti dell'archeologia digitale.

The Screen Design Manual provides designers of interactive media with a practical working guide for preparing and presenting information that is suitable for both their target groups and the media they are using. It highlights background information and relationships, clarifying them with examples, and encourages the further development of the language of digital media. In addition to the basics of perception and learning psychology, ergonomics, communication theory, imagery research, and aesthetics, the book also considers design navigation and orientation elements. Guidelines and checklists, along with the comprehensive design of the book, support the transfer of information into practice. Frank Thissen teaches multimedia didactics and information design at the University of Applied Sciences in Stuttgart. For over 10 years he has been developing computer based training. He has worked for international companies such as Siemens AG and SAP AG. Affect and emotion play an important role in our everyday lives: They are present whatever we do, wherever we are, and wherever we go, without us being aware of them for much of the time. When it comes to interaction, be it with humans, technology, or humans via technology, we suddenly become more aware of emotion, either by seeing the other's emotional expression, or by not getting an emotional response while anticipating one. Given this, it seems only sensible to explore affect and emotion in human-computer interaction, to investigate the underlying principles, to study the role they play, to develop methods to quantify them, and to finally build applications that make use of them. This is the research field for which, over ten years ago,

Rosalind Picard coined the phrase "affective computing". The present book provides an account of the latest work on a variety of aspects related to affect and emotion in human-technology interaction. It covers theoretical issues, user experience and design aspects as well as sensing issues, and reports on a number of affective applications that have been developed in recent years.
