'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

Volkswagen Workshop Manual Hodder Education
This book is dedicated to addressing the major challenges in fighting COVID-19 using artificial intelligence (AI) and machine learning (ML) - from cost and complexity to availability and accuracy. The aim of this book is to focus on both the design and implementation of AI-based approaches in proposed COVID-19 solutions that are enabled and supported by sensor

networks, cloud computing, and 5G and beyond. This book presents research that contributes to the application of ML techniques to the problem of computer communication-assisted diagnosis of COVID-19 and similar diseases. The authors present the latest theoretical developments, real-world applications, and future perspectives on this topic. This book brings together a broad multidisciplinary community, aiming to integrate ideas, theories, models, and techniques from across different disciplines on intelligent solutions/systems, and to inform how cognitive systems in Next Generation Networks (NGN) should be designed, developed, and evaluated while exchanging and processing critical health information. Targeted readers are from varying disciplines who are interested in implementing the smart planet/environments vision via wireless/wired enabling technologies.

Ready Player One meets The Truman Show with a dash of The 100 in this science fiction story about the power of human connection, from USA Today bestselling and Nebula Award-nominated author Rhett C. Bruno. It's perfect for fans of Hugh Howey, Kim Stanley Robinson, and Kass Morgan. The real world is only where you breathe ... In High Earth, entertainment is everything. Virtual worlds, hyper-realistic simulations, endless streamable content--there's something for everybody. You don't ever have to leave your home.For Asher Reinhart, nothing compares to Ignis: Live, a reality show that pushes human beings to their very extremes. As a volunteer director, he closely monitors the lives of those living on an Interstellar Ark who falsely believe they're the last of humanity out searching for a new Earth.Mission is the show's brightest young star. Born in hiding, her intelligence and near-perfect genetics have allowed her to rise up the ranks faster than any before her. But now that it's her turn to provide for the Ark, everything changes ...With Mission's life placed in danger in order to boost ratings, Asher must choose between protecting the show he's dedicated his life to, or the woman who has been the focus of his attention since the day he was born.Vicarious (adjective): Experienced in the imagination through the feelings or actions of another person.

In March 1968, thousands of Chicano students walked out of their East Los Angeles high schools and middle schools to protest decades of inferior and discriminatory education in the so-called "Mexican Schools." During these historic walkouts, or "blowouts," the students were led by Sal Castro, a courageous and charismatic Mexican American teacher who encouraged the students to make their grievances public after school administrators and school board members failed to listen to them. The resulting blowouts sparked the beginning of the urban Chicano Movement of the late 1960s and early 1970s, the largest and most widespread civil rights protests by Mexican Americans in U.S. history. This fascinating testimonio, or oral history, transcribed and presented in Castro's voice by historian Mario T. Garcia, is a compelling, highly readable narrative of a young boy growing up in Los Angeles who made history by his leadership in the blowouts and in his career as a dedicated and committed teacher. Blowout! fills a major void in the history of the civil rights and Chicano movements of the 1960s, particularly the struggle for educational justice.

Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristics and the best performance. Porting demands the right tools, skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power.
