'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' -

Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling.

Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work.

Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the

streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

The perfect match of content and format: Craft supplies, a full-color how-to book and nobody-else-but-Klutz creativity, all packed in a sturdy, re-usable plastic jar with a screw-top lid and a rope handle. The whole package is incredibly bright, cheerful, easy to stack and display, and completely shop wear-proof. Start with an empty Klutz Bucket. Fill with wooden animal shapes. Add eight acrylic craft paints, one brush, a fine point black marker and a

40-page Klutz book of full-color, paint-this-critter inspiration. And then, right at the end, toss in a good supply of wiggle eyes. End result? A zoo in a bucket. With it you can paint 24 wooden die-cut blanks into things like Technicolor tigers or polka-dotted pandas, paying absolutely no attention whatsoever to the way they're actually supposed to look.

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to

light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The

remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. presents the latest requirements and challenges for personal transport applications gives an insight into the technical advances and research going on in the IC Engines field provides the latest developments in compression and spark ignition engines for light and heavy-duty applications, automotive and other markets

The Middle Ages
were a period of

tremendous cultural and scientific advancement in the Islamic Empire—ideas and inventions that shaped our world. Did you know that:

- The numbers you use every day (Arabic numerals!) are a Muslim invention?
- The marching band you hear at football games has its roots in the Middle East?
- You are drinking orange juice at breakfast today thanks to Islamic farming innovations?
- The modern city's skyline was made possible by Islamic architecture?

The Muslim world has often been a bridge between East and West, but many of Islam's crucial innovations are hidden within the folds of history. In this important book, Bryn Barnard uses short, engaging text and gorgeous full-color artwork to bring Islam's

contributions gloriously to life. Chockful of information and pictures, and eminently browsable, *The Genius of Islam* is the definitive guide to a fascinating topic. *The Compact Edition of the Oxford English Dictionary: Complete Text Reproduced Micrographically: P-Z, Supplement and bibliography* Hachette UK

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume

anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.
