The design and implementation of the Maple system is an on-going project of the Symbolic Computation Group at the University of Waterloo in

Ontario, Canada. This manual corresponds with version V (roman numeral five) of the Maple system. The on-line help subsystem can be invoked from within a Maple session to view documentation on specific topics. In particular, the command ?updates points the user to documentation updates for each new version of Maple. The Maple project was first conceived in the autumn of 1980 growing out of discussions on the state of symbolic computation at the University of Waterloo. The authors wish to acknowledge many fruitful discussions with colleagues at the University of Waterloo, particularly Morven Gen tleman, Michael Malcolm, and Frank Tompa. It was recognized in these discussions that none of the locally-available systems for symbolic computation provided the facilities that should be expected for symbolic computation in modern computing environments. We concluded that since the basic design decisions for the then-current symbolic systems such as ALTRAN, CAMAL, REDUCE, and to design a

new system MACSYMA were based on 1960's computing technology, it would be wise from scratch taking advantage of the software engineering technology which had become available since then, as well as drawing from the lessons of experience. Maple's basic features (e. g. elementary data structures, input/output, arithmetic with numbers, and elementary simplification) are coded in a systems programming language for efficiency.

Medical War Manual ... John Wiley & Sons Incorporated

A manual for the modern hunter-gatherer that will teach you everything you need to know about foraging, hunting, and cooking in the wild. From finding wild edible plants to subsistence hunting, you'll learn how to live off the land while hunting like a caveman—and

eating like a king. With high-quality design, intricate detail, and a durable flexicover, this manual is the perfect addition to any outdoor enthusiast's library. Whether you're using modern tools, old-fashioned snares, or your own two hands, this book will show you the amazing range of hands-on (literally!) methods for catching and cooking your prey. Use the detailed field guides to gather edible plants, nuts, and mushrooms, then turn them into gourmet meals with field-tested camp cooking tips. And prepare for any emergency, whether you're lost in the woods or surviving a natural disaster. This book demystifies it all, with simple hints and step-by-step illustrations to

make you a self-sufficient survivor—in your backyard or in the wild.
