The 30th edition of the World Investment Report looks at the prospects for foreign direct investment and international production during and beyond the global crisis triggered by the COVID-19 (coronavirus) pandemic. The Report not only projects the immediate impact of the crisis on investment flows, but also assesses how it could affect a long-term structural transformation of international production. The theme chapter of the Report reviews the evolution of international production networks over the past three decades and examines the configuration of these networks today. It then projects likely course changes for the next decade due to the combined effects of the pandemic and pre-existing megatrends, including the new industrial revolution, the sustainability imperative and the retreat of laissez faire policies. The system of international production underpins the economic growth and development prospects of most countries around the world. Governments worldwide will need to adapt their investment and development strategies to a changing international production landscape. At the request of the UN General Assembly, the Report has added a dedicated section on investment in the Sustainable Development Goals, to review global progress and propose possible courses of action.

We tend to view prolonged economic downturns, such as the Great Depression of the 1930s and the Long Depression of the late nineteenth century, in terms of the crisis and pain they cause. But history teaches us that these great crises also represent opportunities to remake our economy and society and to generate whole new eras of economic growth and prosperity. In terms of innovation, invention, and energetic risk taking, these periods of "creative destruction" have been some of the most fertile in history, and the changes they put into motion can set the stage for full-scale recovery. In *The Great Reset*, bestselling author and economic development expert Richard Florida provides an engaging and sweeping examination of these previous economic epochs, or "resets." He distills the deep forces that have altered physical and social landscapes and eventually reshaped economies and societies. Looking toward the future, Florida identifies the patterns that will drive the next Great Reset and transform virtually every aspect of our lives — from how and where we live, to how we work, to how we invest in individuals and infrastructure, to how we shape our cities and regions. Florida shows how these forces, when combined, will spur a fresh era of growth and prosperity, define a new geography of progress, and create surprising opportunities for all of us. Among these forces will be * new patterns of consumption, and new attitudes toward ownership that are less centered on houses and cars * the transformation of millions of service jobs into middle class careers that engage workers as a source of innovation * new forms of infrastructure that speed the movement of people, goods, and ideas * a radically altered and much denser economic landscape organized around "megaregions" that will drive the development of new industries, new jobs, and a whole new way of life We've weathered tough times before. They are a necessary part of economic cycles, giving us a chance to clearly see what's working and what's not. Societies can be reborn in such crises, emerging fresh, strong, and refocused. Now is our opportunity to anticipate what that brighter future will look like and to take the steps that will get us there faster. With his trademark blend of wit, irreverence, and rigorous research and analysis, Florida presents an optimistic and counterintuitive vision of our future, calling into question long-held beliefs about the nature of economic progress and forcing us to reassess our very way of life. He argues convincingly that it's time to turn our efforts — as individuals, as governments, and as a society — to putting the necessary pieces in place for a vibrant, prosperous future.

Does an abandoned asylum hold the key to a frightful haunting? Everyone's heard the stories about Graylock Hall. It was meant to be a place of healing - a hospital where children and teenagers with mental disorders would be cared for and perhaps even cured. But something went wrong. Several young patients died under mysterious circumstances. Eventually, the hospital was shut down, the building abandoned and left to rot deep in the woods. As the new kid in town, Neil Cady wants to see Graylock for himself. Especially since rumor has it that the building is haunted. He's got fresh batteries in his flashlight, a camera to document the adventure, and a new best friend watching his back. Neil might think he's prepared for what he'll find in the dark and decrepit asylum. But he's certainly not prepared for what follows him home. . . . Scary, suspenseful, and surprising, Dan Poblocki's latest ghost story will keep you turning pages deep into the dead of night.
