As novice master of the Cistercian Abbey of Our Lady of Gethsemani in Kentucky, Thomas Merton presented weekly conferences to familiarize his charges with the meaning and purpose of the vows they aspired to undertake. In this setting, he offered a thorough exposition of the theological, canonical, and above all spiritual

dimensions of the vows. Merton set the vows firmly in the context of the anthropological, moral, soteriological, and ecclesial dimensions of human, Christian, and monastic life. He addressed such classical themes of Christian morality as the nature of the human person and his acts; the importance of justice in relation to the Passion of Christ, to friendship and to love; and self-surrender as the key to grace, prayer and the vowed life. Merton's words on these topics clearly spring from a committed heart and often flow with the soaring intensity of style that we have come to expect in his more enthusiastic prose. The texts of these conferences represent the longest and most systematically organized of any of numerous series of conferences that Merton presented during the decade of his mastership. They may be the most directly pastoral work Merton ever wrote.

This book studies the *Sylloge Tacticorum*, an important tenth-century Byzantine military manual. The text is used as a case study to connect military manuals with the challenges that Byzantium faced in its wars with the Arabs, but also with other aspects of Byzantine society such as education, politics, and conventions in the productions of literary texts and historical narratives. The book explores when the *Sylloge* was written and by whom. It identifies

which passages from classical or earlier works were incorporated in the *Sylloge* and explains the reason why Byzantines imitated works of the past. The book then studies the extent to which the *Sylloge* was original and how innovation and originality were received in Byzantine society. Despite the imitation, the author of the *Sylloge* adapted and updated his material to reflect the current operational needs as well as the ideological, cultural and religious context of his time. Finally, the book attempts to estimate the extent to which Byzantine generals followed the

advice of military manuals, and to explore whether historical narratives can be safely used to draw information as to how the Byzantines and the Arabs fought. Therefore, along with a detailed study of the *Sylloge Tacticorum*, this monograph also addresses broader issues of the pen and the sword such as military manuals in connection with Byzantine warfare, politics, literature, historiography and education.

simple but accurate idea of a Latin expression, this dictionary compiles, translates, and briefly explains the phrases found in theological writings and canon law that may puzzle readers unfamiliar with Latin or the theological meaning and nuances of these terms. Consecrated phrases refer to expressions which are used, often in shorthand manner, to express a certain theological position or thought, which express a significant position of Roman Catholic sacramental theology as defined at the Council of Trent. Often these terms appear in a given theological text with little or no translation or explanation. "Consecrated Phrases" provides that explanation in concise and understandable language. Entries are listed according to the form most likely to be used in the expressions themselves as found in theological writings. Each entry begins with a literal" translation of the Latin term or phrase and then provides a brief explanation on the theological meaning or significance of the term. While most of the entries contain theological, liturgical, canonical, or philosophical terms primarily from the Roman Catholic tradition, important expressions in the various Protestant traditions are also included, as well as a number of common classical aphorisms, Latin titles of many Church documents, and some common scholarly abbreviations. "Consecrated Phrases" is a valuable reference for anyone interested in theology at al

levels. "James T. Bretzke, SJ, is an assistant professor of fundamental Christian ethics at the Jesuit School of Theology at Berkeley." National Library of Medicine Current Catalog Routledge This book reveals the other side of the age of cathedrals in the very place where gothic architecture and scholastic theology were born. Farmer extends and deepens the understanding of urban poverty in the High Middle Ages. Consecrated Phrases New Riders This book contains case studies that show how

streaming audio is used on various sites. It begins by giving a comprehensive overview of the most up-to-date streaming technologies available and the process of preparing audio for streaming. Then, it walks readers through encoding for the various players and types of streaming (on-demand vs. live). Titles in Series Routledge A new generation of historians today is borrowing from cultural anthropology, post-modern critical theory, and gender studies to understand the social meanings of medieval religious movements, practices, figures, and cults. In this

volume Sharon Farmer and Barbara H. Rosenwein bring together essays—all hitherto unpublished—that combine some of the best of these new approaches with rigorous research and traditional scholarship. Some of these essays re-envision the professionals of religion: the monks and nuns who carried out crucial social functions as mediators between living and dead, repositories for social memory, and loci of vicarious piety. In their religious life these people embodied an image of the society that produced them. Other contributions focus on social categories, usually expressed as dichotomies: male/female, insider/outsider, saint/outcast.

Monks and Nuns, Saints and Outcasts is the first book to show the interaction of seemingly antithetical groups of medieval people and the ways in which they were defined by, as well as against, each other. All of the essays, taken together, form a tribute to Lester K. Little, pioneer in the study of religion in medieval society. In this wonderful collection of essays the reader travels with Columbanus through the Christian West, from Ireland to Brittany, from Northern Gaul to the Rhine, Bavaria, Alamannia, and Italy. Through the great Irishman's

encounters with secular and ecclesiastical elites, with various religious cultures, Roman traditions, post-Roman states and peoples, this volume illuminates the profound changes that characterize the transition from the ancient to the medieval world.

Monks and Nuns, Saints and Outcasts Oxford University Press

These very profound and learned Commentaries on the early history of the Church were composed not long before the author's death, and, of course, contain his most matured thoughts and opinions on the important and interesting topics discussed. In this work he aims not only to give a good general History of the period over which the work extends, but also to

embrace a thorough and candid Discussion, conducted on sound historical principles, of all the obscure and difficult points in this portion of ecclesiastical history. The general History he includes in his text, which is broke into short sections or paragraphs: the Discussion follows, in the form of notes or commentaries, constituting much the larger part of the work, and that in which he cites or refers to all the material testimonies of the ancients, and fully discusses their import and value, according to his maturest judgment. --from the Preface

Religious Authority in the Spanish Renaissance Liturgical Press

BRILL

This book presents an edition of the *Questiones super libro De Animalibus Aristotelis*, a work by one of the greatest philosophers and physicians of

the 13th century, Peter of Spain (later Pope John XXI, 1205-1277). He took as the basis for his work the translation from the Arabic made in Toledo around 1220 by Michael Scotus which included three important Aristotelian treatises. Preceding the critical edition, Dr Navarro offers an introduction to the person and works of Peter of Spain, the intellectual context of the 13th century characterized by Scholasticism and an Aristotelian Renaissance, and a short analysis of the linguistics and form of the *Questiones*. She also analyses the sources on which Peter drew, Greco-Latin, Arabo-Jewish and,

---

of course, late antique and medieval treatises, showing that the text was not exclusively zoological in nature, but discusses important medical and philosophical topics, illustrating his extensive knowledge of both the Aristotelian corpus and 13th-century medicine. The text (divided into XIX books) is not a mere commentary about animals, but rather, as the title shows, a collection of questions in the Salernitan manner, the use of which was considered most appropriate for analysis and communication in the medieval scientific community to which Peter of Spain belonged.

Alongside methodological and zoological problems, Peter of Spain discusses important questions disputed among the scholars of the period, including the location, hierarchy, motion, function and parts of the principal organs, the five senses, and many other medical issues such as reproduction, illnesses, or growth. Finally Dr Navarro includes a glossary that contains proper names (mainly those of the authorities and sources quoted by Petrus Hispanus), animal names (and their parts and substances), and the names of plants, metals, and the like. Medieval Studies Cambridge University Press

The traditional view of the Spanish Renaissance is of a battle of opposites - humanists against scholastics, and followers of Erasmus in discord with conservative Catholics. In this work, Lu Ann Homza aims to offer a more subtle paradigm, recovering profound nuances in Spanish intellectual and religious history. Through analyses of Inquisition trials, biblical translations, treatises on witchcraft and tracts on the episcopate and penance,

Homza illuminates the intellectual autonomy and energy of Spain's ecclesiastics. *Surviving Poverty in Medieval Paris* Syracuse University Press Reprint of the original, first published in 1883.

*Franciscan Mysticism* BRILL During and after the English civil wars, between 1640 and 1690, an unprecedented number of manuals teaching cryptography were published, almost all for the general public. While there are many surveys of cryptography, none pay any attention to the volume of manuals that appeared during the seventeenth century, or

provide any cultural context for the appearance, design, or significance of the genre during the period. On the contrary, when the period 's cryptography writings are mentioned, they are dismissed as esoteric, impractical, and useless. Yet, as this book demonstrates, seventeenth-century cryptography manuals show us one clear beginning of the capitalization of information. In their pages, intelligence—as private message and as mental ability—becomes a central commodity in the emergence of England 's capitalist media state. Publications boasting the

---

disclosure of secrets had long been popular, particularly for English readers with interests in the occult, but it was during these particular decades of the seventeenth century that cryptography emerged as a permanent bureaucratic function for the English government, a fashionable activity for the stylish English reader, and a respected discipline worthy of its own genre. These manuals established cryptography as a primer for intelligence, a craft able to identify and test particular mental abilities deemed "smart" and useful for England's financial future. Through close

readings of five specific primary texts that have been ignored not only in cryptography scholarship but also in early modern literary, scientific, and historical studies, this book allows us to see one origin of disciplinary division in the popular imagination and in the university, when particular broad fields—the sciences, the mechanical arts, and the liberal arts—came to be viewed as more or less profitable.

Volume 45  
The Life of the Vows

Routledge

This is the first book-length work by Heribert Boeder to appear in English. The essays brought together here, several of which are to be found only in this volume, bear witness to a new perspective on metaphysics, modernity, and so-called postmodernity. The "seditiousness" of Boeder's undertaking lies in his twofold intention: to explicate what has been thought in metaphysics, modernity, and postmodernity as self-contained, rational totalities--as history, world,

---

and speech, respectively--and by means of those explications to recover dwelling as it has been made visible in the "configurations of wisdom" (for example, in Homer, Paul, and Holderlin). He approaches each of these totalities by way of Heidegger's thought, which marks the limit of modernity and as such is pivotal to Boeder's enterprise. The Chartulary of the Cistercian Abbey of St Mary of Sallay in Craven University of Toronto Press Knowledge of the pragmatics sheds new light on pragmatic

normative literature (mainly from the religious sphere), a genre crucial for the formation of normative orders in early modern Ibero-America. Long underrated by legal historical scholarship, these media – manuals for confessors, catechisms, and moral theological literature – selected and localised normative knowledge for the colonial worlds and thus shaped the language of normativity. The eleven chapters of this book explore the circulation and the uses of pragmatic normative texts in

the Iberian peninsula, in New Spain, Peru, New Granada and Brazil. The book reveals the functions and intellectual achievements of pragmatic literature, which condensed normative knowledge, drawing on medieval scholarly practices of 'epitomisation', and links the genre with early modern legal culture. Contributors are: Manuela Bragagnolo, Agustín Casagrande, Otto Danwerth, Thomas Duve, José Luis Egí o, Renzo Honores, Gustavo César Machado Cabral, Pilar
