The Life of the Vows BoD – Books on Demand
Nothing less than a rethinking of what we mean when we talk about "men" and "women" of the medieval period, this volume demonstrates how the idea of gender -- in the Middle Ages no less than now -- intersected in subtle and complex ways with other

categories of difference. Responding to the insights of postcolonial and feminist theory, the authors show that medieval identities emerged through shifting paradigms -- that fluidity, conflict, and contingency characterized not only gender, but also sexuality, social status, and religion. This view emerges through essays that delve into a wide variety of cultures and draw on a broad range of disciplinary and theoretical approaches. Scholars in the fields of history as well as literary and religious studies consider gendered hierarchies in western Christian,

Jewish, Byzantine, and Islamic areas of the medieval world.

This book contains case studies that show how streaming audio is used on various sites. It begins by giving a comprehensive overview of the most up-to-date streaming technologies available and the process of preparing audio for streaming. Then, it walks readers through encoding for the various players and types of streaming (on-demand vs. live).

Catholic faith and practice BRILL

These very profound and learned Commentaries on the early history of the Church were composed not long before the author's death, and, of course, contain his most matured thoughts and opinions on the important and interesting topics discussed. In this work he aims not only to give a good general History of the period over which the work extends, but also to embrace a thorough and candid Discussion, conducted on sound historical principles, of all the obscure and difficult points in this portion of ecclesiastical history. The general History he includes in his text, which is broke into short sections or paragraphs: the Discussion follows, in the form of notes or commentaries,

constituting much the larger part of the work, and that in which he cites or refers to all the material testimonies of the ancients, and fully discusses their import and value, according to his maturest judgment. --from the Preface

Forming the Mind U of Minnesota Press

Fresh translations of key texts, exhaustive coverage from Plato to Kant, and detailed commentary by expert scholars of philosophy add up to make this sourcebook the first and most comprehensive account of the history of the philosophy of mind. Published at a time when the philosophy of mind and philosophical psychology are

high-profile domains in current research, the volume will inform our understanding of philosophical questions by shedding light on the origins of core conceptual assumptions often arrived at before the instauration of psychology as a recognized subject in its own right. The chapters closely follow historical developments in our understanding of the mind, with sections dedicated to ancient, medieval Latin and Arabic, and early modern periods of development. The volume's structural clarity enables readers to trace the entire progression of philosophical understanding on specific topics related to the mind, such as the nature of perception. Doing so reveals the fascinating contrasts between current and historical approaches. In addition to its all-inclusive source material, the volume provides subtle expert commentary that includes critical introductions to each thematic section as well as detailed engagement with the central texts. A voluminous bibliography includes hundreds of primary and secondary sources. The sheer scale of this new publication sheds light on the progression, and discontinuities, in our study of the

philosophy of mind, and represents a major new sourcebook in a field of extreme importance to our understanding of humanity as a whole.?

Historical Commentaries on the State of Christianity During the First Three Hundred and Twenty-five Years from the Christian Era
Routledge

As novice master of the Cistercian Abbey of Our Lady of Gethsemani in Kentucky, Thomas Merton presented weekly conferences to familiarize his charges with the meaning and purpose of the vows they aspired to undertake. In this setting, he offered a thorough exposition of the theological, canonical, and above all spiritual dimensions of the vows. Merton set the vows firmly in the context of the anthropological, moral, soteriological, and ecclesial dimensions of human, Christian, and monastic life. He addressed such classical themes of Christian morality as the nature of the human person and his acts; the importance of justice in relation to the Passion of Christ, to friendship and to love; and self-surrender as the key to grace, prayer and the vowed life. Merton's words on these topics clearly spring from a committed heart and often flow with the soaring intensity of style that we have come to expect in his more enthusiastic prose. The texts of these conferences represent the

longest and most systematically organized of any of numerous series of conferences that Merton presented during the decade of his mastership. They may be the most directly pastoral work Merton ever wrote.

Gender and difference in the Middle Ages
Ashgate Publishing, Ltd.

Farmer extends and deepens the understanding of urban poverty in the high middle ages. She explores the ways in which cultural elites thought about the poor and shows that their conceptions of poor men and women were derived from the roles assigned to men and women in the opening chapters of the Book of Genesis - men are associated with productive labour; of labour within the public realm, and women with reproductive labour; or labour within the private realm.

The predominant “stewardship model” of creation is the result of an intentional effort to correct approaches that reinforce human sovereignty and the resulting environmental degradation. However, as All God’s Creatures argues, the stewardship model actually does not offer a correction but rather reinscribes many of the very same pitfalls. After close analysis of the stewardship model, this book identifies scriptural, theological, and philosophical sources to support the adoption of a “community of creation” paradigm.

Drawing on postcolonial theory, this book

proposes the concept of “planetary” as a framework for conceiving the relationship between human and nonhuman creation, and the Creator, in a new way. This theoretical framework is grounded by a retrieval of the medieval Franciscan theological and philosophical tradition. The result is what can be called a postcolonial Franciscan theology of creation imagined in terms of planetary, providing a constructive and nonanthropocentric response to the need for a new conceptualization of the doctrine of creation.

George McClure offers here a far-reaching analysis of the role of consolation in Italian Renaissance culture, showing how the humanists' interest in despair, and their effort to open up this realm in both social and personal terms, signaled a shift toward a heightened secularization in European thought. Analyzing works by fourteenth- and fifteenth-century writers, from Petrarch to Marsilio Ficino, McClure examines the treatment of such problems as bereavement, fear of death, illness, despair, and misfortune. These writers, who evinced a belief in the legitimacy of secular sadness, tried to forge a wisdom that in their view dealt more realistically with the art

of living and dying than did the disputations of scholastic philosophy and theology. Arguing that consolatory concerns helped spur the revival of classical schools of psychological thought, McClure reveals that the humanists sought comfort from once-neglected troves of Stoic, Peripatetic, Epicurean, Platonic, and Christian thought. He contends that the humanists' pursuit of solace and their duty as consolers provided not only a forum but perhaps also an incentive for the articulation of prominent Renaissance themes concerning immortality, the dignity of man, and the sanctity of worldly endeavor. A new generation of historians today is borrowing from cultural anthropology, post-modern critical theory, and gender studies to understand the social meanings of medieval religious movements, practices, figures, and cults. In this volume Sharon Farmer and Barbara H. Rosenwein bring together essays—all hitherto unpublished—that combine some of the best of these new approaches with rigorous research and traditional scholarship. Some of these essays re-envision the professionals of religion: the monks and nuns who carried out crucial social functions as mediators between living and dead, repositories for social memory, and loci of vicarious piety. In their religious life these people embodied an image of the society that produced them. Other contributions focus on social categories, usually expressed as dichotomies: male/female, insider/outsider, saint/outcast. *Monks and Nuns, Saints and Outcasts* is the first book to show the interaction of seemingly antithetical groups of medieval people and the ways in which they were defined by, as well as against, each other.

All of the essays, taken together, form a tribute to Lester K. Little, pioneer in the study of religion in medieval society.

Bernard Lonergan's theological writings have influenced religious scholars ever since the first publication in the 1940s of the series of five articles which make up *Verbum: Word and Idea in Aquinas*. These articles first appeared in *Theological Studies* and were subsequently republished in book form in 1967 under the present title. This volume contains a new preface by the editors and full translations of all Latin texts. *Verbum: Word and Idea in Aquinas* is a product of Lonergan's eleven years of study of the thought of Thomas Aquinas. The work is considered by many to

be a breakthrough in the history of Lonergan's theology and a foundation upon which his later contributions were constructed. Here he interprets aspects in the writing of Aquinas relevant to trinitarian theory and, as in most of Lonergan's work, one of the principal aims is to assist the reader in the search to understand the workings of the human mind. *Verbum: Word and Idea in Aquinas* is a vital component of Lonergan's oeuvre, and of continuing relevance to trinitarian theology, Aquinas studies, and inquiries into human cognition. Bernard Lonergan (1904-1984), a professor of theology, taught at Regis College, Harvard University, and Boston College. An established author known for his *Insight and Method in Theology*, Lonergan received numerous honorary doctorates, was a Companion of the Order of Canada in 1971 and was named as an original member of the International Theological Commission by Pope Paul VI.

First person accounts by pioneers in the field, classic essays, and new scholarship document the collaborative and creative practices of early social media. Focusing on early social media in the arts and humanities and on the core role of creative

computer scientists, artists, and scholars in shaping the pre-Web social media landscape, *Social Media Archeology and Poetics* documents social media lineage, beginning in the 1970s with collaborative ARPANET research, Community Memory, PLATO, Minitel, and ARTEX and continuing into the 1980s and beyond with the Electronic Café, Art Com Electronic Network, Arts Wire, The THING, and many more. With first person accounts from pioneers in the field, as well as papers by artists, scholars, and curators, *Social Media Archeology and Poetics* documents how these platforms were vital components of early social networking and important in the development of new media and electronic literature. It describes platforms that allowed artists and musicians to share and publish their work, community networking diversity, and the creation of footholds for the arts and humanities online. And it invites comparisons of social media in the past and present, asking: What can we learn from early social media that will inspire us to envision a greater cultural presence on contemporary social media? The canon of Hispanic mysticism is expanding. No longer is our picture of this special brand of early modern devotional practice limited to a handful of venerable saints. Instead, we recognize a wide range of marginal figures as practitioners of mysticism, broadly defined. Neither do we limit the study of mysticism necessarily to the Christian religion, nor even to the realm of literature. Representations of mysticism are also found in the visual, plastic and musical arts. The terminology and theoretical framework of mysticism permeate early modern Hispanic cultures. Paradoxically, by taking a more

inclusive approach to studying mysticism in its marginal manifestations, we draw mysticism---in all its complex iterations---back toward its rightful place at the center of early modern spiritual experience. A History of Intelligence and 'Intellectual Disability' Princeton University Press

The belief in the reality of demons and the restless dead formed a central facet of the medieval worldview. Whether a pestilent-spreading corpse mobilised by the devil, a purgatorial spirit returning to earth to ask for suffrage, or a shape-shifting demon intent on crushing its victims as they slept, encounters with supernatural entities were often met with consternation and fear. Chroniclers, hagiographers, sermon writers, satirists, poets, and even medical practitioners utilised the cultural 'text' of the supernatural encounter in many different ways, showcasing the multiplicity of contemporary attitudes to death, disease, and the afterlife. In this volume,

Stephen Gordon explores the ways in which conflicting ideas about the intention and agency of supernatural entities were understood and articulated in different social and literary contexts. Focusing primarily on material from medieval England, c.1050–1450, Gordon discusses how writers such as William of Malmesbury, William of Newburgh, Walter Map, John Mirk, and Geoffrey Chaucer utilised the belief in demons, nightmares, and walking corpses for pointed critical effect. Ultimately, this monograph provides new insights into the ways in which the broad ontological category of the 'revenant' was conceptualised in the medieval world.

Starting with the hypothesis that not only human intelligence but also its antithesis 'intellectual disability' are nothing more than historical contingencies, C.F. Goodey's paradigm-shifting study traces the rich interplay between labelled human types and the radically changing characteristics attributed to them. From the twelfth-century beginnings of European

social administration to the onset of formal human science disciplines in the modern era, *A History of Intelligence and 'Intellectual Disability'* reconstructs the socio-political and religious contexts of intellectual ability and disability, and demonstrates how these concepts became part of psychology, medicine and biology. Goodey examines a wide array of classical, late medieval and Renaissance texts, from popular guides on conduct and behavior to medical treatises and from religious and philosophical works to poetry and drama. Focusing especially on the period between the Protestant Reformation and 1700, Goodey challenges the accepted wisdom that would have us believe that 'intelligence' and 'disability' describe natural, trans-historical realities. Instead, Goodey argues for a model that views intellectual disability and indeed the intellectually disabled person as recent cultural creations. His book is destined to become a standard resource for scholars interested in the history of psychology and medicine, the social origins of human self-representation, and current ethical debates about the genetics of intelligence.
