As novice master of the Cistercian Abbey of Our Lady of Gethsemani in Kentucky, Thomas Merton presented weekly conferences to familiarize his charges with the meaning and purpose of the vows they aspired to undertake. In this setting, he offered a thorough exposition of the theological, canonical, and above all spiritual dimensions of the vows. Merton set the vows firmly in the context of the anthropological, moral, soteriological, and ecclesial dimensions of human, Christian, and monastic life. He addressed such classical themes of Christian morality as the nature of the human person and his acts; the importance of justice in relation to the Passion of Christ, to friendship and to love; and self-surrender as the key to grace, prayer and the vowed life.

Merton's words on these topics clearly spring from a committed heart and often flow with the soaring intensity of style that we have come to expect in his more enthusiastic prose. The texts of these conferences represent the longest and most systematically organized of any of numerous series of conferences that Merton presented during the decade of his mastership. They may be the most directly pastoral work Merton ever wrote.

The Garden of the Soul; Or a Manual of Spiritual Exercises and Instructions for Christians, Who, Living in the World, Aspire to Devotion. [By R. Challoner, Bishop of Debra.] Wentworth Press
The young man who makes his first entrance into the world of society, should know how to choose his friends, and next how to conduct himself towards them. Experience is, of course, the best guide, but at first starting this must come second hand, from an older friend, or from books. You may set it down as a rule, that as you treat the world, so the world will treat you. Remember, "once a gentleman always a gentleman," and be sure that you can so carry out the rule, that in your most careless, joyous moments, when freest from the restraints of etiquette, you can still be recognizable as a gentleman by every act, word, or look. To make your politeness part of yourself, inseparable from every action, is the height of gentlemanly elegance and finish of manner.

The great value of contemporary History—that is, history written by actual witnesses of the events which they narrate,—is now beginning to be appreciated by general readers. The improved character of the journalism of the present day is the best evidence of this advancement, which has been a work of no ordinary labour. Truth is not of such easy acquisition as is generally supposed; and the chances of obtaining unprejudiced accounts of events are rarely improved by distance from the time at which they happen. In proportion as freedom of thought is enlarged, and liberty of conscience, and liberty of will, are increased, will be the amount of trustworthiness in the written records of contemporaries. It is the rarity of these high privileges in chroniclers of past events which has led to so many obscurities in the world's history, and warpings in the judgment of its writers; to trust some of whom has been compared to reading with "coloured spectacles." And, one of the features of our times is to be ever taking stock of the amount of truth in past history; to set readers on the tenters of doubt, and to make them suspicious of perversions; and to encourage a whitewashing of black reputations which sometimes strays into an extreme equally as unserviceable to truth as that from which the writer started. It is, however, with the view of correcting the Past by the light of the Present, and directing attention to many salient points of Knowledge for the Time, that the present volume is offered to the public. Its aim may be considered great in proportion to the limited means employed; but, to extend what is, in homely phrase, termed a right understanding, the contents of the volume are of a mixed character, the Author having due respect for the[v] emphatic words of Dr.

Colonial Brazil was a multiracial society, profoundly influenced by slavery and the plantation system. This study examines the history of the sugar economy and the peculiar development of plantation society over a three hundred year period in Bahia, a major sugar-plantation zone and an important terminus of the Atlantic slave trade.

During and after the English civil wars, between 1640 and 1690, an unprecedented number of manuals teaching cryptography were published, almost all for the general public. While there are many surveys of cryptography, none pay any attention to the volume of manuals that appeared during the seventeenth century, or provide any cultural context for the appearance, design, or significance of the genre during the period. On the contrary, when the period's cryptography writings are mentioned, they are dismissed as esoteric, impractical, and useless. Yet, as this book demonstrates, seventeenth-century cryptography manuals show us one clear beginning of the capitalization of information. In their pages, intelligence—as private message and as mental ability—becomes a central commodity in the emergence of England's capitalist media state. Publications boasting the disclosure of secrets had long been popular, particularly for English readers with interests in the occult, but it was during these particular decades of the seventeenth century that cryptography emerged as a permanent bureaucratic function for the English government, a fashionable activity for the stylish English reader, and a respected discipline worthy of its own genre. These manuals established cryptography as a primer for intelligence, a craft able to identify and test particular mental abilities deemed "smart" and useful for England's financial future. Through close readings of five specific primary texts that have been ignored not only in cryptography scholarship but also in early modern literary, scientific, and historical studies, this book allows us to see one origin of disciplinary division in the popular imagination and in the university, when particular broad fields—the sciences, the mechanical arts, and the liberal arts—came to be viewed as more or less profitable.

The Protestants did not get their name by protesting against the Church of Rome, but by protestmg (and that when nothing else would

serve) against her errors and superstitions. Do you Temove them from the Church of Rome, and our Protestation is ended, and the separation too.--Thus far Abp. But do not the Thirty-nine Articles of Seliqion contain an exposition of the doctrines of the Church of England, and were they not first drawn up, as they now stand, in the year 1562? and if so, where was the Faith of the English Church before that time? and if she had no Articles of Faith, how could she be a Church? and how therefore could she be united in doctrine with the Catholic Church? 9. Where, we might ask in reply, was the Part II. faith of the Universal Church of Christ before the year 325, when the Nicene Creed was promulgated?, --And the answer would be--It was in the Holy Scriptures as interpreted by the Church from the beginning.
