This magisterial study proposes a revised and innovative view of the political history of Renaissance Italy. Drawing on comparative examples from across the peninsula and the kingdoms of Sicily, Sardinia and Corsica, an international team of leading scholars highlights the complexity and variety of the Italian world from the fourteenth to early sixteenth centuries, surveying the mosaic of kingdoms, principalities, signorie and republics against a backdrop of wider political themes common to all types of state in the period. The authors address the contentious problem of the apparent weakness of the Italian Renaissance political system. By repositioning the Renaissance as a political, rather than simply an artistic and cultural phenomenon, they identify the period as a pivotal moment in the history of the state, in which political languages, practices and tools, together with political and governmental institutions, became vital to the evolution of a modern European political identity.

How the King of Beers collapsed without a fight and what it means for America's place in the post-Recession world How did InBev, a Belgian company controlled by Brazilians, takeover one of America's most beloved brands with scarcely a whimper of opposition? Chalk it up to perfect timing—and some unexpected help from powerful members of the Busch dynasty, the very family that had run the company for more than a century. In Dethroning the King, Julie MacIntosh, the award-winning financial journalist who led coverage of the takeover for the Financial Times, details how the drama that unfolded at Anheuser-Busch in 2008 went largely unreported as the world tumbled into a global economic crisis second only to the Great Depression. Today, as the dust settles, questions are being asked about how the "King of Beers" was so easily captured by a foreign corporation, and whether the company's fall mirrors America's dwindling financial and political dominance as a nation. Discusses how the takeover of Anheuser-Busch will be seen as a defining moment in U.S. business history Reveals the critical missteps taken by the Busch family and the Anheuser-Busch board Argues that Anheuser-Busch had a chance to save itself from InBev's clutches, but infighting and dysfunctionality behind the scenes forced it to capitulate From America's heartland to the European continent to Brazil, Dethroning the King is the ultimate corporate caper and a fascinating case study that's both wide reaching and profound.

Around the world, asbestos-related diseases are on the increase. Meanwhile, in many newly-industrialising and developing countries, asbestos use continues unabated. This book, based on anthropological fieldwork in the UK, India and South Africa, explores people's understandings of their illness, risk, compensation and regulation, contrasting these personal and community narratives with formal medical and legal understandings. Linda Waldman shows how the domination of medical and legal framings of risk and disease over those of workers, sufferers and activists can narrow the responses chosen by government. This provides important lessons for researchers, policy makers and regulators, demonstrating that opening up to alternative understandings can create more effective policy responses to move towards sustainability and social justice. Published in association with the Economic and Social Research Council (ESRC).
