Not So Silent Pantheon

New York Times Bestseller A Summer Reading Pick for President Barack Obama, Bill Gates, and Mark Zuckerberg From a renowned historian comes a groundbreaking narrative of humanity ' s creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “ human. ” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with

---

this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

2013 HMH Books For Young Readers

This book is an accessible introduction to the study of detecting fake news on social media. The concepts, algorithms, and methods described in this book can help harness the power of social media to build effective and intelligent fake news detection systems. In the past decade, social media is becoming increasingly popular for news consumption due to its easy access, fast dissemination, and low cost. However, social media also enables the wide propagation of "fake news," i.e., news with intentionally

false information. Fake news on social media can have significant negative societal effects. Therefore, fake news detection on social media has recently become an emerging research that is attracting tremendous attention. From a data mining perspective, this book introduces the basic concepts and characteristics of fake news across disciplines, reviews representative fake news detection methods in a principled way, and illustrates advanced settings of fake news detection on social media. In particular, the authors discuss the value of news content and social context, as well as important extensions to handle early detection, weakly-supervised detection, and explainable detection. This is essential reading for students, researchers, and practitioners to understand, manage, and excel in this area. This book is supported by additional materials, including lecture slides, the complete set of figures, key references, datasets, tools used in this book, and the source code of representative algorithms. Principles of Corporate Finance Haynes Service and Repair Manuals London in the middle of the 1800s was a subject endlessly sketched by artists, studied by social reformers, and discussed by writers. This comprehensive

---

collection of drawings by Gustave Dor, France's most celebrated graphic artist of the period, presents a panoramic portrait of that engrossing city - from fashionable ladies riding in a sunlit park to ragged wretches in a shadowy side street. Here are amazingly perceptive sketches of workaday London, busy market places, the Christy Minstrels, a waterman's family, thieves gambling, the Devils' Acre in Westminster, flower girls, waifs and strays, a wedding at the Abbey, provincials in search of lodgings, a garden party, prisoners in the Newgate exercise yard, stalls at Covent Garden Opera House, and many other scenes that capture the London of a bygone era.

Sudoku Puzzle Books For Adults

Like to flex your mental muscles on the go with a challenging sudoku puzzle, but don't want to carry around a big book? Then our range of large print sudoku puzzle books are ideal for you! Packed with 158 hard 9x9 large print sudoku puzzles and their solutions, this easy-to-read and small 5 x 8" suduko puzzle book features a cute owl cover and provides hours of entertainment.

The pocket sudoku puzzles inside are both challenging and addictive and you won't be able to put this book down! Visit our Author Page for even more of our sudoku puzzle books and large print sudoku puzzle books for seniors. 158 INDIVIDUAL SUDOKU PUZZLES: Hours of fun and entertainment to enjoy! LARGE PRINT: Large print is easy-to-read and giant grids making it simple to complete these 9x9 sudoku puzzles.

**EXERCISE YOUR BRAIN:** Keep your brain active when you travel by completing dozens of sudoku puzzles. **MAKES A GREAT GIFT:** From the complete beginner to the celebrated expert, this sudoku large print book makes a great gift for mom, dad and seniors. Sudoku Puzzle Books For Adults Large Print Features 158 challenging and addictive sudoku puzzles and their solutions inside 5 x 8" dimensions - small and easy to carry around in your handbag or backpack when travelling Luxuriously soft, durable, matte cover Cream paper, which is easier on the eyes than white

The Dream Thieves Simon and Schuster Reporting on the national investigations of undeclared labor in 10 European countries, this study analyzes the variety of forms of black labor in the construction industry. From the evidence of the reports, the highest incidence of undeclared labor relates to work carried out by workers in addition to their regular job. The status of self-employment is abused, with unethical practices by national citizens as well as foreign "independent" workers entering the market through labor-only subcontracting. This publication includes desktop research, a summary of the findings with conclusions, and the experts' 10 country reports.

The Cybercities Reader M-Y Books Distribution

In The Nature of Space, pioneering Afro-Brazilian geographer Milton Santos attends to globalization writ large and how local and global orders intersect in the construction of space. Santos offers a theory of human space based on relationships between time and ontology. He argues that when

---

geographers consider the inseparability of time and space, they can then transcend fragmented realities and partial truths without trying to theorize their way around them. Based on these premises, Santos examines the role of space, which he defines as indissoluble systems of objects and systems of actions in social processes, while providing a geographic contribution to the production of a critical social theory.

Enhanced Methods in Computer Security, Biometric and Artificial Intelligence Systems contains over 30 contributions from leading European researchers showing the present state and future directions of computer science research. "Methods of Artificial Intelligence and Intelligent Agents" contains 13 contributions analyzing such areas of AI as fuzzy set theory, predicate logic, neural networks, clustering, data mining and others. It also presents applications of AI as possible solutions for problems like firm bankruptcy, soil erosion, flight control and others. "Information Technology Security" covers three important areas of security engineering in information systems: software security, public key infrastructure and the design of new cryptographic protocols and algorithms. "Biometric Systems" comprises 11 contributions dealing with face picture analysis and recognition systems. This chapter focuses on known methods of biometric problem solution as well as the design of new models.

This is one in a series of manuals for car or motorcycle owners. Each book provides information on routine maintenance and servicing, with tasks described and photographed in a step-by-step sequence so that even a novice can

do the work.

Plydesign Design

A dynamic and hip collective biography that presents forty-four of America's greatest movers and shakers, from Frederick Douglass to Aretha Franklin to Barack Obama, written by ESPN's TheUndeatead.com and illustrated with dazzling portraits by Rob Ball. Meet forty-four of America's most impressive heroes in this collective biography of African American figures authored by the team at ESPN's TheUndeatead.com. From visionaries to entrepreneurs, athletes to activists, the Fierce 44 are beacons of brilliance, perseverance, and excellence. Each short biography is accompanied by a compelling portrait by Robert Ball, whose bright, graphic art pops off the page. Bringing household names like Serena Williams and Harriet Tubman together with lesser-known but highly deserving figures such as Robert Abbott and Dr. Charles Drew, this collection is a celebration of all that African Americans have achieved, despite everything they have had to overcome.

An Introduction to Risk and Return from Common Stocks Birkh ä user Reports from an ambitious MIT research project that makes the case for encouraging the colocation of manufacturing and innovation. Production in the Innovation Economy emerges from several years of interdisciplinary research at MIT on the links between manufacturing and innovation in the United States and the world economy. Authors from political science, economics, business, employment and operations research, aeronautics and astronautics, and nuclear engineering come together to explore the extent to which

---

manufacturing is key to an innovative and vibrant economy. Chapters include survey research on gaps in worker skill development and training; discussions of coproduction with Chinese firms and participation in complex manufacturing projects in China; analyses of constraints facing American start-up firms involved in manufacturing; proposals for a future of distributed manufacturing and a focus on product variety as a marker of innovation; and forecasts of powerful advanced manufacturing technologies on the horizon. The chapters show that although the global distribution of manufacturing is not an automatic loss for the United States, gains from the colocation of manufacturing and innovation have not disappeared. The book emphasizes public policy that encourages colocation through, for example, training programs, supplements to private capital, and interfirm cooperation in industry consortia. Such approaches can help the United States not only to maintain manufacturing capacity but also, crucially, to maximize its innovative potential. Contributors Joyce Lawrence, Richard K. Lester, Richard M. Locke, Florian Metzler, Jonas Nahm, Paul Osterman, Elisabeth B. Reynolds, Donald B. Rosenfeld, Hiram M. Samel, Sanjay E. Sarma, Edward S. Steinfeld, Andrew Weaver, Rachel L. Wellhausen, Olivier de Weck

The Movie Business Book Scholastic UK  
The Concise Oxford Dictionary of Zoology is the first dictionary of zoology to be published for many years and is the only one of its kind in English. Containing nearly 6,000 entries, this up-to-date and authoritative reference work will be invaluable to students, amateur naturalists, and nonspecialist readers with an interest in the subject. In addition to ecology, the subjects covered include evolutionary concepts, animal behavior, Earth history, cell structure and function, physiology, zoogeography, taxonomic principles, and genetics. There are also brief biographical notes on some of the most important figures in the development of the relevant disciplines. The taxa covered include invertebrates, with particular emphasis on arthropods, fish, reptiles, amphibians, birds, and mammals. The Dictionary is edited by Michael Allaby, a well-known writer on the environment and the editor or author of numerous books including The Oxford Dictionary of Natural History and The Concise Oxford Dictionary of the Earth Sciences

Sapiens Dark Horse Comics

Principles of Corporate Finance is the worldwide leading text that describes the theory and practice of corporate finance. Throughout the book, the authors show how managers use financial theory to solve practical problems and as a way to respond to change by showing not just how, but why companies and management act as they do. This text is a valued reference for thousands of practicing financial managers. The Tenth Edition has been rewritten, refreshed, and fully updated to reflect the recent financial crisis and is now accompanied by Connect Finance, an exciting new homework management system.

CALCULUS, 7TH ED (With CD ) CRC Press

A symposium and celebration was held at Aberdeen Proving Ground (APG), Maryland, in November 1996, to recognize and commemorate seminal Army contributions to the birth and development of modern computing. Primarily inspired by the 50th anniversary of the invention of the world's first general purpose electronic computer (the ENIAC), this two-day event also celebrated the dedication at APG of significant new computational resources provided by the Office of Secretary of Defense. On this occasion, scores of computing pioneers gathered at APG to reminisce about the accomplishments that stemmed from the Army's computation needs during World War II in particular, the need for the firing and bombing tables that were essential for

accurate targeting of ground- and air-delivered ordnance.

Hindsight- The Foresight Saga Elsevier

This book concludes a trilogy that began with Intelligent Cities: Innovation, Knowledge Systems and digital spaces (Routledge 2002) and Intelligent Cities and Globalisation of Innovation Networks (Routledge 2008). Together these books examine intelligent cities as environments of innovation and collaborative problem-solving. In this final book, the focus is on planning, strategy and governance of intelligent cities. Divided into three parts, each section elaborates upon complementary aspects of intelligent city strategy and planning. Part I is about the drivers and architectures of the spatial intelligence of cities, while Part II turns to planning processes and discusses top-down and bottom-up planning for intelligent cities. Cities such as Amsterdam, Manchester, Stockholm and Helsinki are examples of cities that have used bottom-up planning through the gradual implementation of successive initiatives for regeneration. On the other hand, Living PlanIT, Neapolis in Cyprus, and Saudi Arabia intelligent cities have started with the top-down approach, setting up urban operating systems and common central platforms. Part III focuses on intelligent city strategies; how cities should manage the drivers of spatial intelligence, create smart environments, mobilise communities, and offer new solutions to address city problems. Main findings of the book are related to a series of models which capture fundamental aspects of intelligent cities making and operation.

---

These models consider structure, function, planning, strategies toward intelligent environments and a model of governance based on mobilisation of communities, knowledge architectures, and innovation cycles.
