**Planning Singapore** Walter de  
Gruyter GmbH & Co KG  
Who was this man who could  
walk through brick walls and,

with a snap of his fingers, vanish  
elephants? In these pages you will  
meet the astonishing  
Houdini—magician, ghost chaser,  
daredevil, pioneer aviator, and  
king of escape artists. No jail cell  
or straitjacket could hold him! He  
shucked off handcuffs as easily as  
gloves. In this fresh, witty  
biography of the most famous  
bamboozler since Merlin, Sid  
Fleischman, a former professional  
magician, enriches his warm  
homage with insider information  
and unmaskings. Did Houdini  
really pick the jailhouse lock to let  
a fellow circus performer escape?  
Were his secrets really buried with  
him? Was he a bum magician, as  
some rivals claimed? How did he  
manage to be born in two cities, in

two countries, on two continents at  
the same instant? Here are the  
stories of how a knockabout kid  
named Ehrich Weiss, the son of an  
impoverished rabbi, presto-  
changed himself into the  
legendary Harry Houdini. Here,  
too, are rare photographs never  
before seen by the general reader!

Ensino De Geografia E RepresentaÇÃO Do Espaço Geográfico Page  
Street Publishing  
The early chapters comprehensively review the optical and transport properties of silicon. Light trapping is described in detail. Limits on the efficiency of silicon cells are discussed as well as material requirements necessary to approach these limits. The status of current

---

approaches to passivating surfaces, contacts and bulk regions is reviewed. The final section of the book describes the most practical approaches to the fabrication of high-efficiency cells capable of meeting the efficiency targets for both concentrated and non-concentrated sunlight, including a discussion of design and processing approaches for non-crystalline silicon.

*Chronic Granulomatous*

*Disease: New Insights for the Healthcare Professional: 2011 Edition* CRC Press

Starting with the simplest semiclassical approaches and ending with the description of complex fully quantum-mechanical methods for quantum transport analysis of state-of-the-art devices,

Computational

Electronics: Semiclassical and Quantum Device Modeling and Simulation provides a comprehensive overview of the essential techniques and methods for effectively analyzing transport in semiconductor devices. With the transistor reaching its limits and new device designs and paradigms of

---

operation being explored, this timely resource delivers the simulation methods needed to properly model state-of-the-art nanoscale devices. The first part examines semiclassical transport methods, including drift-diffusion, hydrodynamic, and Monte Carlo methods for solving the Boltzmann transport

equation. Details regarding numerical implementation and sample codes are provided as templates for sophisticated simulation software. The second part introduces the density gradient method, quantum hydrodynamics, and the concept of effective potentials used to account for quantum-

mechanical space quantization effects in particle-based simulators. Highlighting the need for quantum transport approaches, it describes various quantum effects that appear in current and future devices being mass-produced or fabricated as a proof of concept. In this context, it introduces the

---

concept of effective of the open potential used to approximately include quantum-mechanical space-quantization effects within the semiclassical particle-based device simulation scheme. Addressing the practical aspects of computational electronics, this authoritative resource concludes by addressing some

questions related to quantum transport not covered in most books. Complete with self-study problems and numerous examples throughout, this book supplies readers with the practical understanding required to create their own simulators.

**Galaxy S II.** Indiana

University Press  
Gandh?ran art is often regarded as the epitome of cultural exchange in antiquity. The ancient region of Gandh?ra, centred on what is now the northern tip of Pakistan, has been called the 'crossroads of Asia'. The Buddhist art produced in and around this area in the first few centuries AD exhibits extraordinary connections with other traditions across Asia and as far as the Mediterranean. Since

---

the nineteenth century, and extensive, but the wrestle with old the Graeco-Roman explanation of this controversies, associations of 'influence' remains particularly the notion Gandh?ran art have puzzling and elusive. that Gandh?ran art is a attracted particular The Gandh?ra legacy of Hellenistic attention. Classically Connections project at Greek rule in Central educated soldiers and the University of Asia and the growing administrators of that Oxford's Classical Art consensus around the era were astonished by Research Centre was important role of the the uncanny resemblance initiated principally Roman Empire in shaping of many works of to cast new light on it. But they also seek Gandh?ran sculpture to this old problem. This to present a more Greek and Roman art volume is the third set complex and expansive made thousands of miles of proceedings of the view of the networks in to the west. More than project's annual which Gandh?ra was a century later we can workshop, and the first embedded. Adopting a recognize that the to address directly the global perspective on the Gandh?ran artists' question of cross- subject, they appropriation of cultural influence on examine aspects of classical iconography and by Gandh?ran art. Gandh?ra's connections and styles was diverse The contributors both within and beyond

---

South Asia and Central Asia, including the profound influence which Gandhian art itself had on the development of Buddhist art in China and India.

**Exhibit A** Harper Collins

The Change Process in Psychotherapy During Troubling Times invites readers to consider what it is psychotherapists do that leads to change. The book highlights

different theoretical approaches, questions old paradigms, and illustrates the change process when working with people facing a range of life challenges such as the survivors of childhood trauma, refugees, and people dealing with traumatic loss. Moving between consideration of

micro-moments when working with individual clients and bigger questions about how to promote change in the face of current world problems, it addresses issues that touch us all. At the same time, the book acknowledges the unprecedented challenges in today's world such as the pace of

---

change, the thousands of displaced people who seek refuge in other countries, the illness and loss caused by the coronavirus pandemic, and the impact of climate change on lifestyles and the environment. The book presents a topical consideration of the relevance of therapeutic

assumptions, theories, and practices to current global crises. With the breadth of presenting issues considered and the examples of a variety of creative approaches supporting change, the book will be useful to psychotherapists in practice and in training working in a range of settings

with different populations. It will also be of interest to others working in the helping professions.

**The Change Process in Psychotherapy During Troubling Times**

Royal Society of Chemistry  
Two hundred years ago, Sir Stamford Raffles established the modern settlement of Singapore with the intent of seeing it become 'a great commercial emporium

---

and fulcrum'. But by Singapore's the time independence remarkable was achieved in 1965, achievements in the the city faced first half century daunting problems of after its housing shortage, independence is now slums and high unemployment. Since widely known. In then, Singapore has Planning Singapore: become one of the The Experimental richest countries on City, Stephen Hamnett earth, providing, in and Belinda Yuen have brought together a set of chapters on Singapore's planning achievements, aspirations and challenges, which are united in their focus on what might happen next in the planning of the island-state. Chapters range over Singapore's planning system, innovation and future economy, housing, biodiversity, water and waste, climate change, transport, and the potential transferability of Singapore's planning knowledge. A key question is whether the planning approaches, which have served Singapore so well until now,

---

will suffice to meet the emerging challenges of a changing global economy, demographic shifts, new technologies and the existential threat of climate change. Singapore as a global city is becoming more unequal and more diverse. This has the potential to weaken the social compact which has largely existed since independence and to undermine the social resilience undoubtedly needed to cope with the shocks and disruptions of the twenty-first century. The book concludes, however, that Singapore is better-placed than most to respond to the challenges which it will certainly face thanks to its outstanding systems of planning and implementation, a proven capacity to experiment and a highly developed ability to adapt quickly, purposefully and pragmatically to changing circumstances.

*Computational Electronics* Cengage Learning

In a time of great agricultural and rural change, the notion of 'multifunctionality' has remained under-theorized and poorly linked to the debates in the social sciences. This book analyses the extent to which the proposed transition towards

---

post-productivist agriculture holds up to scientific scrutiny, and proposes a new transition theory.

**Municipal Solid Waste Incinerator Residues**

"O'Reilly Media, Inc."

This work identifies patterns in the fields of character, narrative, and setting in the French cinema of the early sound period.

**Polymer-graphene Nanocomposites**

Morgan Kaufmann

Publishers

This text covers a broad spectrum of topics pertinent to the management of incinerator residues.

Background information includes a history of incineration, and the influence of municipal waste composition, incinerator type air pollution control technologies on

residue quality.

Physical, chemical and leaching characteristics for the various ash streams are described, along with recommended sampling and evaluation methodologies. Residue handling and management options, including, treatment utilisation and disposal are also discussed in

---

detail.

**The Australian Official Journal of Trademarks** Routledge

The National Nanotechnology Initiative (NNI) is a multiagency, multidisciplinary federal initiative comprising a collection of research programs and other activities funded by the participating agencies and linked

by the vision of "a future in which the ability to understand and control matter at the nanoscale leads to a revolution in technology and industry that benefits society." As first stated in the 2004 NNI strategic plan, the participating agencies intend to make progress in realizing that vision by working toward four goals. Planning, coordination, and

---

management of the NNI Initiative is the of applications in  
are carried out by latest National nanotechnology that  
the interagency Research Council will provide  
Nanoscale Science, review of the NNI, an economic, societal,  
Engineering, and assessment called for and national security  
Technology (NSET) by the 21st Century benefits to the  
Subcommittee of the Nanotechnology United States. In its  
National Science and Research and assessment, the  
Technology Council Development Act of committee found it  
(NSTC) Committee on 2003. The overall important to  
Technology (CoT) with objective of the understand in some  
support from the review is to make detail-and to  
National recommendations to describe in its  
Nanotechnology the NSET Subcommittee report-the NNI's  
Coordination Office and the NNCO that structure and  
(NNCO). Triennial will improve the organization; how the  
Review of the NNI's value for basic NNI fits within the  
National and applied research larger federal  
Nanotechnology and for development research enterprise,

---

as well as how it can and should be organized for management purposes; and the initiative's various stakeholders and their roles with respect to research. Because technology transfer, one of the four NNI goals, is dependent on management and coordination, the committee chose to address the topic of technology transfer last, following its discussion of

definitions of success and metrics for assessing progress toward achieving the four goals and management and coordination. Addressing its tasks in this order would, the committee hoped, better reflect the logic of its approach to review of the NNI. Triennial Review of the National Nanotechnology Initiative also provides concluding remarks in the last

chapter.
