The Global Connections of  
Gandharan Art

TAB/Electronics

"Gripping from start to finish . .

. with twists that left me shocked."—Victoria Aveyard, #1 New York Times bestselling author of *Red Queen* For fans of Gillian Flynn and *Pretty Little Liars*, *The Darkest Corners* is a psychological thriller about the lies little girls tell, and the deadly truths those lies become. There are secrets around every corner in Fayette, Pennsylvania. Tessa left when she was nine and has been trying ever since not to think about what happened there that last summer. She and her childhood best friend Callie never talked about what they saw. Not before the trial. And certainly not after. But ever since she left, Tessa has had questions. Things have never quite added up. And now she has to go back to Fayette—to Wyatt Stokes, sitting on death row; to Lori Cawley, Callie's dead cousin; and to the one other person who may be hiding the truth. Only the closer Tessa gets to what really happened, the closer she gets to a killer—and this time, it

won't be so easy to run away. And don't miss Kara's next "eerie and masterly psychological thriller" Little Monsters—on sale now (SLJ)! The Librarian's Report Classical Art Research Centre

Gandhāran art is often regarded as the epitome of cultural exchange in antiquity. The ancient region of Gandhāra, centred on what is now the northern tip of Pakistan, has been called the 'crossroads of Asia'. The Buddhist art produced in and around this area in the first few centuries AD exhibits extraordinary connections with other traditions across Asia and as far as the Mediterranean. Since the nineteenth century, the Graeco-Roman associations of Gandhāran art have attracted particular attention. Classically educated soldiers and administrators of that era were astonished by the uncanny resemblance of many works of Gandhāran sculpture to Greek

and Roman art made thousands of miles to the west. More than a century later we can recognize that the Gandhāran artists' appropriation of classical iconography and styles was diverse and extensive, but the explanation of this 'influence' remains puzzling and elusive. The Gandhāra Connections project at the University of Oxford's Classical Art Research Centre was initiated principally to cast new light on this old problem. This volume is the third set of proceedings of the project's annual workshop, and the first to address directly the question of cross-cultural influence on and by Gandhāran art. The contributors wrestle with old controversies, particularly the notion that Gandhāran art is a legacy of Hellenistic Greek rule in Central Asia and the growing consensus around the important role of the Roman Empire in shaping it. But they also seek to present a more complex and

---

expansive view of the networks in which Gandhāra was embedded. Adopting a global perspective on the subject, they examine aspects of Gandhāra's connections both within and beyond South Asia and Central Asia, including the profound influence which Gandhāran art itself had on the development of Buddhist art in China and India.

#### Hip Hop Decoded Ember

Deals with electrical and electronic circuit processes. Based on research findings that unify the two concepts, this book includes topics on the mechanism of conduction, operation of capacitive and inductive circuits subject to steady and alternating voltages; and, operation of motors, generators, microphones and loudspeakers and p-n junctions.

The early chapters comprehensively review the

optical and transport properties of silicon. Light trapping is described in detail. Limits on the efficiency of silicon cells are discussed as well as material requirements necessary to approach these limits. The status of current approaches to passivating surfaces, contacts and bulk regions is reviewed. The final section of the book describes the most practical approaches to the fabrication of high-efficiency cells capable of meeting the efficiency targets for both concentrated and non-concentrated sunlight, including a discussion of design and processing approaches for non-crystalline silicon.

Retronics Pearson Education  
Hundreds of millions of people believe that Jesus came back from the dead.

This cogent, forcefully argued book presents a decidedly

---

unpopular view —namely, that the central tenet of Christianity, the resurrection of Jesus, is false. The author asks a number of probing questions: Is the evidence about Jesus as it has been relayed to us over the centuries of sufficient quantity and quality to justify belief in the resurrection? How can we accept the resurrection but reject magic at the Salem witch trials? What light does contemporary research about human rationality from the fields of behavioral economics, empirical psychology, cognitive science, and philosophy shed on the resurrection and religious belief? Can we use contemporary research about the reliability of people's beliefs in the supernatural, miracles, and the paranormal to shed light on the origins of Christianity and other religions? Does it make sense that the all-powerful creator of the universe would employ miracles to achieve his ends? Can a Christian believe by faith alone and yet reasonably deny the supernatural claims of other religions? Do the arguments against Christianity support atheism? By carefully answering each of these questions, this book undermines Christianity and theism at their foundations; it gives us a powerful model for better critical reasoning; and it builds a compelling case for atheism. Without stooping to condescension or arrogance, the author offers persuasive arguments that are accessible, thoughtful, and new.

about, this text provides every manager with strategies to facilitate a successful, dynamic and creative workforce. Backed by psychological theory, the book is a highly practical read.

High Efficiency Silicon Solar Cells SAGE Publications Limited

Two hundred years ago, Sir Stamford Raffles established the modern settlement of Singapore with the intent of seeing it become ‘ a great commercial emporium and fulcrum ’ . But by the time independence was achieved in 1965, the city faced daunting problems of housing shortage, slums and high unemployment. Since then, Singapore has become one of the richest countries on earth, providing, in Sir Peter Hall ’ s words, ‘ perhaps the most extraordinary case of economic development in

the history of the world ’ .

The story of Singapore ’ s remarkable achievements in the first half century after its independence is now widely known. In *Planning Singapore: The Experimental City*, Stephen Hamnett and Belinda Yuen have brought together a set of chapters on Singapore ’ s planning achievements, aspirations and challenges, which are united in their focus on what might happen next in the planning of the island-state. Chapters range over Singapore ’ s planning system, innovation and future economy, housing, biodiversity, water and waste, climate change, transport, and the potential transferability of Singapore ’ s planning knowledge. A key question is whether the planning approaches, which have served Singapore so well until now, will suffice to meet the

---

emerging challenges of a changing global economy, demographic shifts, new technologies and the existential threat of climate change. Singapore as a global city is becoming more unequal and more diverse. This has the potential to weaken the social compact which has largely existed since independence and to undermine the social resilience undoubtedly needed to cope with the shocks and disruptions of the twenty-first century. The book concludes, however, that Singapore is better-placed than most to respond to the challenges which it will certainly face thanks to its outstanding systems of planning and implementation, a proven capacity to experiment and a highly developed ability to adapt quickly, purposefully

and pragmatically to changing circumstances.

Hip Hop - you already know the history, now uncover the mystery. Warning! This book is not for everyone. If you feel that there's nothing wrong with the current state of Hip Hop, then this book is not for you. If you feel that gangsta rap, pimpin hos, violence, drugs, thug activity, and half naked women in videos have elevated Hip Hop as an art form; then this book is definitely not for you. If, on the other hand, you feel that listening to the same songs over and over on the radio that are laced with negative lyrics, watching soft porn or graphically violent videos, while reading the watered down Hip Hop magazines that endorse this way of life has shaped the minds of our youth, and are collectively being used as part of a mind control operation to mentally and spiritually enslave

---

our future generations; then welcome to... "Hip Hop Decoded:" From Its Ancient Origin to Its Modern Day Matrix.

### The PowerPC Architecture

Trans Tech Publications Ltd

This up-to-date introduction to the changing nature and context of industrial relations in contemporary Europe shows how different national systems of industrial relations offer varying models of relations between employers and workers.

### Planning Singapore

By definition, winning means that you competed and you came out ahead. Human nature requires us to compete in order to survive. Therefore, winning and survival have the element of success in common. To ascend to a winning position, you need a goal, a desire to achieve it, and the qualities of discipline, perseverance and action to attain it. Having your goal and setting yourself up to achieve your goal is the first step in

the process. You adjust your mindset and begin to plan diligently. Goals may be as different as DNA, but methodologies have much in common. Furthermore, your plans and expectations will need adjustments as you go along. That is why the knowledge shared by the CelebrityExperts(r) in this book will be of importance to you. The advice and suggestions of these CelebrityExperts(r) are based on their experiences - both their accomplishments and their shipwrecks. The knowledge they share will allow you to make plans that can propel you in the right direction. That is the function of a mentor - to guide you where you are going and to advise what to avoid. If you wish to develop The Winning Way to your goals, read on... You will never win if you never begin. Helen Row
