reducing swelling caused by fluid build up after cancer treatment. There are different types of manual lymphatic drainage (MLD). They include Vodder, Földi, Casley-Smith and Fluoroscopy guided manual lymphatic drainage (FG-MLD). Read about fluoroscopy guided manual lymphatic drainage (FG-MLD)

Lymphatic drainage | The Royal Marsden NHS Foundation Trust

Manual Drain This is the simplest common drain system and can be in the form of a screwed plug, sprung button, needle or ball valve at the bottom of the bowl that requires an operator to regularly release the condensate and depending on the plant (and their safety regs or lack of), this can be into a catch tank, surface drain or just on to the floor to evaporate back into the atmosphere.

Manual lymphatic drainage - Wikipedia

Manual lymph drainage uses a specific amount of pressure (less than 9 ounces per square inch or about 4 kPa) and rhythmic circular movements to stimulate lymph flow. Clinical studies of MLD conclude that further study of the practice is required before recommending it as an effective health treatment.
