We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

[The Calf: Nutrition and health](#) Routledge

The history of technology is often troubled by good ideas that do not, for one reason or another, take off right away--sometimes for millennia. Sometimes,

technology comes to a standstill, and sometimes, it even reverses itself. Thus, unlike science, which seems to proceed at a reasonable and calm rate, the progress of technology is difficult to theorize about. While in science many developments are predictable to a certain extent and this predictability may, at times, direct or stymie science's progress--as with stem-cell research and cloning--technological advances, such as the Internet, are often sudden and unpredictable, and therefore frightening. In *Theory of Technology*, David Clarke brings together nine authors who try to understand technology from a variety of viewpoints. Rias van Wyk, in "Technology," parses the concept into many angles, including its anatomy, taxonomy, and evolution. Karol Pelc, in "Knowledge Mapping,"

---

discusses tracking the evolution of the emerging discipline of technology management. Jon Beard, in "Management of Technology," pursues a similar mapping endeavor, but looks to the patterns of the literature of technology management. Thomas Clarke, in "Unique Features of an R&D Work Environment and Research Scientists and Engineers," takes the reader on a tour of how people of technology present unique challenges to not just management but whole organizations. Richard Howey, in "Understanding Software Technology," places enterprise software into a meaningful pattern of technology management. Fred Foldvary and Daniel Klein, in "The Half-Life of Policy Rationales," discuss how new technology affects old policy issues. John Cogan, in "Some Philosophical Thoughts on the Nature of Technology," maintains that our Aristotelian search for the essence of technology is doomed. And Peter Bond, in "The Biology of Technology," establishes a basis for the development of a socio-biological approach to understanding the pheno

The Calf is a comprehensive text reference work, covering all aspects of calf nutrition in a concise, straightforward presentation for students and professional farmers, as well as for scientists and animal specialists. It presents detailed information about calf nutrition and about calf diseases caused by nutritional or environmental deficiencies. The book includes numerous instructive tables and illustrations as well as extensive literature lists for each chapter.

The Newer Temples of the Greeks University Park : Pennsylvania State University Press

This is a volume of twelve essays published in the successful tradition of Essays in Philosophy (Mourant and others; The Pennsylvania State University Press, 1962). These essays in metaphysics merge the eternal, the historical, and the immediately encountered dimensions of man's experience to illustrate what is permanently valuable in the tradition of Western thought. Contributors: John M. Anderson; Karel Berka; Hiram Canton; Joseph C. Flay; Richard A Gotshalk;

Carl R. Hausman; Henry W. Johnstone, Jr.; Joseph J. Kockelmans; Robert G. Price; Stanley H. Rosen; Albert Tsugawa; Carl G. Vaught.
